Enlightenment Feike Dietz, 2021-05-22 This book presents a rigorous hugely informative analysis of the early history of Dutch children's literature pedagogical developments and emerging family formations Thoroughly researched Dietz's study will be essential for historians of eighteenth century childhood education and children's books both in the Dutch context and more widely Matthew Grenby Newcastle University UK A rich informative well documented and effectively illustrated discussion of the ways Dutch eighteenth century educators tried to transform youth into responsible readers It does so in a wide international context and masterfully connects this process to the radical politicization and de politicization of Dutch society in the revolutionary period Wijnand W Mijnhardt formerly of Utrecht University the Netherlands and the University of California at Los Angeles USA This book explores how children's literature and literacy could at once regulate and empower young people in the eighteenth century Dutch Republic Rather than presenting the history of childhood as a linear story of increasing agency it suggests that we view it as a continuous struggle with the impossibility of full agency for young people This volume demonstrates how this struggle informed the production of books in a historical context in which the development of independent youths was high on the political agenda In close interaction with international children's literature markets Dutch authors developed new strategies to make the members of young generations into capable readers and writers equipped to organize their own minds and bodies properly and to support a supposedly declining fatherland
