

Translation and Transposition

I suppose that the broadest distinction ever drawn between ways of transferring literary matter from one language to another in the distinction between translations and verse. And the broadest account of these distinctions is that where a critic proposes to take care of the letter of the original, a translation must attend to the spirit. But that is broad indeed, as John Leishman of a distinction, and for the purposes of this paper I intend to insert a subtle wedge between translations and verse. The term I propose is "transposition". Transposition, in the sense I choose to give it, means when the language of the matter to be translated meets some strength in the language of the translator—in age, ideas, cultural habits and so on—so that he can follow the letter with a fair hope of keeping faith with the spirit. Translating a modern French novel from English is thus mainly a matter of transposition. Poetry is more difficult, because its verbal organization is usually more concentrated and more personal; nevertheless a good deal of modern verse can usually be transposed. Take the English version of the poems of Claudel by Professor Macgregor. It is, in a perfectly honestable sense, essentially a first reading; yet as an account of the matter (and more) of Claudel it is very serviceable and will stand well next time an account is needed—and of course permitted by the laws of copyright—for another's poetic recreation; yet, in other words, a translation. A somewhat more ambitious example of transposition is the version of Rilke's *Deine Klänge* by Leishman and Spensley. It reads like poetry, and as such, it seems to reproduce something of the spirit of Rilke's poems, and yet it is close enough to the letter of the original to help the reader who needs to see Claudel in English as Rilke's German words.

The further one moves back in time, the more transposition must approximate to translation. There is nevertheless a definite element of what I am calling transposition even in the loose modern rendering of a poem relatively as distant as the *Divine Comedy*. In the sense that Lawrence Binns would call a modern English equivalent for Dante's medieval Italian, this is true translation. But since Dante's language and the particular of his poems are still just within halting distances, Binns was able to transpose. He could for example take over Dante's term *rima* more or less unchanged, though as a loose reader, the reader who helps to give Dante's line its peculiar concentration; he was able to follow the context of the poem and even the patterning of the movement. Let me quote a single stanza:

The Translator's Visibility Larisa Cercel, Alice Leal, 2025-05-05 This collection illuminates the epistemological

and philosophical underpinnings of Lawrence Venuti's seminal *The Translator's Invisibility* extending these conversations through a contemporary lens of epistemic justice while also exploring its manifestations and transposing it to different disciplines and contexts. The volume is divided into five parts. The opening chapters provide contemporary foundations and a clear epistemological apparatus to conceptualise the debate on the translator's visibility and explore some of the philosophical underpinnings of the debate. The following chapters offer analysis of some contemporary manifestations and illustrations of the translator's visibility among translators and translation thinkers and restage the debate in diverse contexts such as in European Union identity politics and Chinese Buddhist translation and disciplines such as film studies. A final chapter takes stock of the impact of machine translation to critically reflect on the future of translation and translator studies. This book will be of interest to students and scholars in translation and interpreting studies, philosophy, cultural studies and literary studies as well as the humanities more broadly.
