Moore, 2020 This book assays how the remarkable discoveries of contemporary neuroscience impact upon our conception of ourselves and our responsibility for our choices and our actions Dramatic and indeed revolutionary changes in how we think of ourselves as agents and as persons are commonly taken to be the implications of those discoveries of neuroscience Indeed the very notions of responsibility and of deserved punishment are thought to be threatened by these discoveries Such threats are collected into four groupings 1 the threat from determinism that neurosciences shoes us that all of our choices and actions are caused by events in the brain that precede choice 2 the threat from epiphenomenalism that our choices are shown by experiment not to cause the actions that are the objects of such choice but are rather mere epiphenomena co effects of common causes in the brain 3 the threat from reductionist mechanism that we and everything we value is nothing but a bunch of two valued switches going off in our brains and 4 the threat from fallibilism 5 that we are not masters in our own house because we lack the privileged knowledge of our own minds needed to be such masters The book seeks to blunt such radical challenges while nonetheless detailing how law morality and common sense psychology can harness the insights of an advancing neuroscience to more accurately assign moral blame and legal punishment to the truly deserving      Bibliotheca Sacra and Theological Review , 1877      **Nature's Experiments and the Search for Symbolist Form** Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature s experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de si cle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism *Nature s Experiments and the Search for Symbolist Form* demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism      *The elements of sociology; a text-book for colleges and schools* Franklin Henry
