*Fake Physics: Spoofs, Hoaxes and Fictitious Science* Andrew May,2019-04-12 People are used to seeing fake physics in science fiction concepts like faster than light travel antigravity and time travel to name a few The fiction label ought to be a giveaway but some SF writers especially those with a background in professional science are so adept at technobabble that it can be difficult to work out what is fake and what is real To confuse matters further Isaac Asimov's 1948 piece about the fictitious time travelling substance thiotimoline was written not as a short story but in the form of a spoof research paper The boundaries between fact and fiction can also be blurred by physicists themselves sometimes unintentionally sometimes with tongue in cheek sometimes to satirize perceived weaknesses in research practices Examples range from hoaxes aimed at exposing poor editorial standards in academic publications through thought experiments that sound like the plot of a sci fi movie to April Fools jokes Even the latter may carry a serious message whether about the sociology of science or poking fun at legitimate but far out scientific hypotheses This entertaining book is a joyous romp exploring the whole spectrum of fake physics from science to fiction and back again

**Hoaxes, Myths, and Manias** Robert E. Bartholomew,Benjamin Radford,2003 Thinking is an innate ability that most people take for granted But like writing well or speaking effectively before the public thinking well is a skill that can be learned and improved with practice In this unique introduction to critical thinking Robert Bartholomew and Benjamin Radford first lay out the principles of critical thinking and then invite readers to put these principles to the test by examining a series of unusual and challenging case studies Assembling a wide range of bizarre but actual incidents from

many cultures and various time periods they demonstrate how the tools of critical thinking can help to unravel alleged paranormal events and seemingly mysterious behavior What factors led to the Martian panic of 1938 Why did many people conclude that an alien spaceship crashed in Roswell New Mexico in 1947 How do we explain the panic expressed by otherwise normal Southeast Asian men who came to believe that a contagious disease was causing their genitals to shrink or the frenzied dance manias that captivated thousands of Europeans during the Middle Ages Bartholomew and Radford show that reality is very much a social construction that cultural assumptions play a large part in our judgments about what is normal and what is deviant and that the use of critical reasoning is our best means of ensuring an objective perspective

**Prank Science** Michael Brown,AI,2025-03-06 Prank Science explores the surprising science and psychology behind harmless practical jokes arguing that their success stems from a careful balance of surprise cognitive dissonance and shared understanding The book reveals how pranks often dismissed as mere mischief are actually carefully engineered social experiments that offer insights into human behavior For example the element of surprise in a prank triggers specific neurological responses while successful pranks often exploit cognitive biases to create humor The book

begins by establishing the historical and social context of pranks then moves to dissecting the psychological mechanisms behind different types of pranks using case studies and experimental psychology It examines how timing target selection and the element of surprise contribute to a prank's effectiveness Finally the book considers the ethical dimensions of pranking navigating the line between harmless fun and potentially harmful actions

Global Stigmas and Attitudes Towards Persons With Disabilities Phasha, Nareadi Tlakale, 2025-09-25 Inclusion requires changed mindsets and actions towards every

member of society particularly towards the historically marginalized and people with disabilities Their inclusion has been a major problem due to numerous factors such as conceptions about disability and what it constitutes as they often come with stigma and stereotypes Current sources often present disability conceptions in general terms as if they apply to all categories of disabilities making it difficult to extract correct information about each disability Disability is not a homogenous category Conceptions about each category may differ among cultures and communities Uncovering conceptions about each category is a crucial step towards creating positive living and safe educational environment for people with disabilities Global Stigmas and Attitudes Towards Persons With Disabilities discusses conceptions about different disabilities children or family members with a disability and organizations for people with disabilities It demonstrates how negative conceptions influence service provision in various sectors and perpetuates their exclusion in education and society Covering topics such as stereotypes support services and promoting dignity this book is an excellent resource for sociologists caregivers educators policymakers advocates business owners researchers academicians and more

Another Throat Ryan Sharp, 2024-10-25 The early twenty first century has seen a sharp rise in Black US poets employing the mask of persona often including and

interrogating archival materials as they do While some have observed this rise and noted its connection to historical figures Ryan Sharp explores it more deeply as a project based historical and poetic practice Sharp examines its sustained use of historical persona and capacity for conjuring Black speakers as a countermeasure against the archival silencing and misrepresentation of Black voices and histories a tactic he theorizes as poetic fabulation through the poetry of Elizabeth Alexander Cornelius Eady Adrian Matejka Patricia Smith Natasha Trethewey and Frank X Walker This poetic practice is not only about looking back but about critically and creatively re imagining the past to expand the possibilities for Black presents and futures Through his argument Sharp demonstrates how the unique aesthetic and rhetorical license afforded to poetry along with the interiority of persona empowers such historically minded projects to be concurrently invested in the curation of Black narratives and identities
