Writing Embodiment in Victorian Microscopy Meegan Kennedy, 2024-12-02 Writing Embodiment in Victorian Microscopy examines a revolutionary period in microscopical technology and practice At first considered a mere toy by 1900

the microscope rivaled the railway and telegraph as an emblem of modernity and enjoyed an astonishing diversity of applications. This technology could drive scientific debates on subjects like cell theory, vitalism, and bacteriology; guide workers in classrooms, laboratories, and businesses; and inspire a personal hobby or a mass entertainment. Victorian microscopy productively cuts across the ostensibly separate domains of science, religion, commerce, art, education, entertainment, and domestic life. *Writing Embodiment* reads nineteenth-century microscopy across scientific, literary, religious, and popular texts. It argues that Victorian microscopists saw their vision and cognition as fully embodied experiences, the images emerging through a material entanglement of bodies, observer, instrument, apparatus, object, in a dynamic, unstable system. These ideas echo the work of physiological psychologists who proposed mind as a system of embodied, distributed, and dynamic processes shaped by automatic or unconscious reflex action, attention, mental training, and fatigue. Striving to regulate this complex system, microscopists circulated tropes of embodiment through the varied forms of nineteenth-century print culture. They adapted existing concepts such as beauty, the sublime, natural theology, and fairylands, or coined new phrases such as many-sided comprehension to promote favored forms of embodiment and enculturate microscopy as a difficult but valuable pursuit. *Beautiful Mechanism* draws on important work in book history and periodical studies by emphasizing the circulation of these tropes in intermedial conversations across diverse print forms. Victorians understood wonder and skepticism not as incommensurate approaches to scientific observation but rather as complementary forms of embodiment. Romantic tropes of wonder solicit affective flows from observer to wriggling animalcule and back, while skeptical, realist tropes offer to train the reader's eye, hand, body, and judgment and to formalize microscopical practice. Microscopical narratives may manipulate wonder and skepticism in productive tension or create virtual storyspaces that enlist the reader in virtual witnessing. These tropes shape every level of microscopical interest and proficiency. By analyzing their use and circulation, *Writing Embodiment* illuminates wider patterns of Victorian thought on embodiment, scientific practice, and community.

Women Bishops in the Church of England? Church of England. House of Bishops, 2004. In July 2000 the General Synod of the Church of England passed a motion asking the House of Bishops to initiate further theological study on the episcopate, focusing on the issues that need to be addressed in preparation for the debate on women in the episcopate in the Church of England. This report is the result of that reflection. The report sets out as clearly and objectively as possible the options open to the Church of England in this matter and outlines the surrounding theological and practical issues. The report discusses the background to the debate, the historical development of episcopacy, the parameters for a theologically responsible debate on women and the episcopate, the development of women's ministry, the timing, whether now is the right time to ordain women bishops, the theological and practical consequences of possible future options.
