Brian Newsome, 2009 French Urban Planning 1940 1968 explores the creation and progressive dismantling of France s centralized authoritarian system of urban and architectural planning Established in the wake of World War II to facilitate the reconstruction and expansion of cities this planning program led to the evolution of large suburban housing estates plagued by inter intra family conflict juvenile delinquency and other social difficulties which sociologists connected to poor planning and design Critics began calling for the democratization of planning to remedy design problems and the government of Charles de Gaulle started reforming planning procedures in the late 1950s and early 1960s This book moves beyond technical and political issues to explore forces of religion gender and class that affected planning practices Key critics and state officials emerged from the Catholic Left Some were women from

working class backgrounds and they manipulated gender stereotypes to insert working and middle class women into the design process Sometimes in opposition but often together these reformers initiated the most significant change of architectural and urban planning until the introduction of François Mitterrand's decentralization reforms in the 1980s French Urban Planning 1940-1968 will appeal to scholars and students interested in architectural urban and social trends in twentieth century France

French Urbanism in Foreign Lands Ambe J. Njoh, 2015-12-10 This book will seek to close the gaps on the role of France in exporting Eurocentric spatial and environmental design principles and practice It does so by analyzing the major spatial and physical development projects that French colonial authorities implemented in France's colonial empire and elsewhere from the 15th to the 20th century French urban planning ideology principles and practice were not exported exclusively to territories under French colonial suzerainty Accordingly the book focuses on major physical and spatial planning schemes inspired by French planning thought in territories without a history of French colonialism

Labor in America, 1985 **Forging the Franchise** Dawn Langan Teele, 2018-09-18 The important political motivations behind why women finally won the right to vote In the 1880s women were barred from voting in all national level elections but by 1920 they were going to the polls in nearly thirty countries What caused this massive change Why did male politicians agree to extend voting rights to women Contrary to conventional wisdom it was not because of progressive ideas about women or suffragists pluck In most countries elected politicians fiercely resisted enfranchising women preferring to extend such rights only when it seemed electorally prudent and in fact necessary to do so Through a careful examination of the tumultuous path to women's political inclusion in the United States France and the United Kingdom Forging the Franchise demonstrates that the formation of a broad movement across social divides and strategic alliances with political parties in competitive electoral conditions provided the leverage that ultimately transformed women into voters As Dawn Teele shows in competitive environments politicians had incentives to seek out new sources of electoral influence A broad based suffrage movement could reinforce those incentives by providing information about women's preferences and an infrastructure with which to mobilize future female voters At the same time that politicians wanted to enfranchise women who were likely to support their party suffragists also wanted to enfranchise women whose political preferences were similar to theirs In contexts where political rifts were too deep suffragists who were in favor of the vote in principle mobilized against their own political emancipation Exploring tensions between elected leaders and suffragists and the uncertainty surrounding women as an electoral group Forging the Franchise sheds new light on the strategic reasons behind women's enfranchisement

Cultures of Confinement Frank Dikötter,Ian Brown,2018-07-05 Prisons are on the increase from the United States to China as ever larger proportions of humanity find themselves behind bars While prisons now span the world we know little about their history in global perspective Rather than interpreting the prison s proliferation as the predictable result of globalization Cultures of Confinement underlines the fact that the prison was never simply imposed by colonial powers or copied by elites eager to emulate the West but was reinvented and transformed by a host of local factors its success being dependent on its very flexibility Complex cultural negotiations took place in encounters between different parts of the world and rather than assigning a passive role to Latin America Asia and Africa the authors of this book point out the acts of resistance or appropriation that altered the social practices associated with confinement The prison in short was understood in culturally specific ways and reinvented in a variety of local contexts examined here for the first time in global perspective
