Creating and Consuming Culture in North-East England, 1660-1830 Helen Berry,Jeremy Gregory,2019-07-16
Historians of the long eighteenth century have recently recognised that this period is central both to the history of cultural production and consumption and to the history of national and regional identity Yet no book has as yet directly engaged with these two areas of interest at the same time By uniting interest in the history of culture with the history of regional identity Creating and Consuming Culture in North East England 1660 1830 is of crucial importance to a wide range of historians and intervenes in a number of highly important historical and conceptual debates in a timely and provocative way The book makes a substantial contribution to eighteenth century studies Not only do these essays demonstrate that in thinking about cultural production and consumption in the eighteenth century there are important continuities as well as changes that need to be considered but also they complicate the commonplace assumption of metropolitan led cultural change and cultural innovation Rather than the usual model of centre periphery diffusion a number of contributions show that cultural change in the provinces was happening at the same time as in or in some cases even before London The essays also indicate the complex relationship between cultural consumption and social status with some cultural forms being more inclusive than others

Life on the Tyne Peter D. Wright,2016-05-06 Whilst the early modern period has long been recognized as witnessing a growth in trade and consumerism the majority of studies to date have tended to focus upon London and southern England In

order to provide a more balanced understanding of the dynamics at work on a national level this book explores the local economy and waterborne trades of Newcastle and the River Tyne in North East England Drawing upon a variety of primary sources including parish records probate inventories Newcastle Exchequer port books and the previously unpublished diary of an apprentice hostman none of which have been examined previously in this context the study adds significantly to our understanding of the growing community in North East England In particular it underlines the expansion of a thriving middling class with an associated culture of consumption driving a rapid increase in the import and often re export of a wide range of luxury items of food clothing and soft furnishings As the coal trade and a flourishing general trade with London and other home and overseas ports grew the book highlights the major impact upon the size and variety of work in the port and the subsequent increasing size and complexity of the water trades community and its associated business networks

Meeting Places: Scientific Congresses and Urban Identity in Victorian Britain Louise Miskell,2016-04-22 The promotion of knowledge was a major preoccupation of the Victorian era and beginning in 1831 with the establishment of the British Association for the Advancement of Science a number of national bodies were founded which used annual week long meetings held each year in a different town or city as their main tool of knowledge dissemination Historians have long recognised the power of cultural capital in the competitive climate of the mid Victorian years as towns raced to equip themselves with libraries newspapers Lit and Phil societies and reading rooms but the staging of the great annual knowledge

festivals of the period have not previously been considered in this context The four national associations studied are the British Association for the Advancement of Science BAAS the National Association for the Promotion of Social Science NAPSS the Royal Archaeological Institute RAI and the Royal Agricultural Society of England RASE who held annual meetings in 62 different provincial towns and cities from 1831 to 1884 In this book it is contended that these meetings were as important as royal visits and major civic ceremonies in providing towns with an opportunity to promote their own status and identity By deploying a wealth of primary source material much of which has not been previously utilised by urban historians this book offers a new and genuinely Britain wide perspective on a period when comparison and competition with

neighbouring places was a constant preoccupation of town leaders **Stagestruck** Lauren R. Clay, 2013-02-15 Stagestruck traces the making of a vibrant French theater industry between the reign of Louis XIV and the French Revolution During this era more than eighty provincial and colonial cities celebrated the inauguration of their first public playhouses These theaters emerged as the most prominent urban cultural institutions in prerevolutionary France becoming key sites for the articulation and contestation of social political and racial relationships Combining rich description with nuanced analysis based on extensive archival evidence Lauren R Clay illuminates the wide ranging consequences of theater s spectacular growth for performers spectators and authorities in cities throughout France as well as in the empire s most important Atlantic colony Saint Domingue Clay argues that outside Paris the expansion of theater came about through local initiative civic engagement and entrepreneurial investment rather than through actions or policies undertaken by the royal government and its agents Reconstructing the business of theatrical production she brings to light the efforts of a wide array of investors entrepreneurs directors and actors including women and people of color who seized the opportunities offered by commercial theater to become important agents of cultural change Portraying a vital and increasingly consumer oriented public sphere beyond the capital Stagestruck overturns the long held notion that cultural change flowed from Paris and the royal court to the provinces and colonies This deeply researched book will appeal to historians of Europe and the Atlantic world particularly those interested in the social and political impact of the consumer revolution and the forging of national and imperial cultural networks In addition to theater and literary scholars it will attract the attention of historians and sociologists who study business labor history and the emergence of the modern French state **Strange Vernaculars** Janet Sorensen, 2020-09-08

While eighteenth century efforts to standardize the English language have long been studied from Samuel Johnson s Dictionary to grammar and elocution books of the period less well known are the era s popular collections of odd slang criminal argots provincial dialects and nautical jargon Strange Vernaculars delves into how these published works presented the supposed lexicons of the common people and traces the ways that these languages once shunned and associated with outsiders became objects of fascination in printed glossaries from The New Canting Dictionary to Francis Grose s Classical Dictionary of the Vulgar Tongue and in novels poems and songs including works by Daniel Defoe John Gay Samuel

associated with this rapid demobilization Through interlocking stories of duels highway robberies smuggling riots binge drinking and even two earthquakes Rogers captures the anxieties of a half decade and assesses the social reforms contemporaries framed and imagined to deal with the crisis He argues that in addressing these events contemporaries not only endorsed the traditional sanction of public executions but wrestled with the problem of expanding the parameters of government to include practices and institutions we now regard as commonplace censuses the regularization of marriage through uniform methods of registration penitentiaries and police forces
