Creating Economic Opportunities The Role Of Labo:

The Global Economy, National States and the Regulation of Labour Paul K. Edwards, Tony Elger, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **Monthly Labor Review**, 1995-12 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews Job Creation and Local Economic Development 2024 The Geography of Generative AI OECD, 2024-11-28 Regions across the OECD face a range of labour market challenges and are undergoing a significant transformation An ageing workforce low labour productivity growth persistent regional disparities pervasive labour shortages and new technologies will require both people and places to undergo transitions This report Job Creation and Local Economic Development 2024 The Geography of Generative AI examines the health of regional and local labour markets including through new estimates on regional labour shortages and their drivers New tools and technologies such as Generative AI could help policymakers address these challenges and seize new opportunities for job creation and local economic growth This report provides novel evidence of the geography of the impact of Generative AI on jobs across the OECD It examines which places within countries and types of workers are most exposed to Generative AI and contrasts this with the labour market impact of past waves of technologies that drove automation Finally it discusses local and place based actions and policies for seizing the benefits of Generative AI such as boosting productivity mitigating labour shortages and demographic change as well as for mitigating risks of job displacement **Report of the Director-General** International Labour Office, 1996 Changing Work Relationships in Industrialized Economies Isik U. Zeytinoglu, 1999-01-01 This book examines changing work relationships in industrialized economies within the context of economic restructuring and demographic variables The goal of this book is to examine experiences of industrialized economies in dealing with changing work relationships and discuss policy implications of creating such work relationships The thesis of the book is that non standard employment forms in restructuring economies affected all workers but particularly females and the youth Other demographic variables of education level race ethnicity immigrant status ability and economic class were also underlying forces in the construction and arrangements of non standard work Research shows both positive and negative effects of changing work relationships on workers though there is no conclusive result whether one or the other affect is stronger The discussion in this book pays attention to this debate and sheds light on it This book differs from others in its comprehensiveness of the coverage of work relationships referring to part time temporary casual telework and self employment without employees in its examination of a variety of variables including gender age race ethnicity immigrant status ability education level and economic class in the analysis of the topic in relation with the economic restructuring and in its initiative in collaboration of researchers from a variety of backgrounds and regions of the world that have expertise on changing work relationships *Your Voice at Work* International Labour Office, 2000 Your voice at work underscores the crucial role of freedom of association and the effective right to collective

bargaining in achieving decent work for all in today's globalizing world. It outlines the challenges and opportunities that accelerated structural and technological change has brought in its wake and examines trends, some of them quite disturbing in relation to the respect shown for these principles and rights around the globe. The Report regrets that violations are still occurring and stresses how good governance of the labour market based on respect for these principles and rights is essential. *Labour Economics. Theory and practice* Kalandar Abdurakhmanov, 2020-10-01. Issues of labour economics and evolution of the economic views of Eastern thinkers, the process of attracting and using labour power, new forms of employment, the labour market, the economics of social and labour relations, organization and wages, incomes of workers, level and quality of life of the population as well as the strategy of decent work in innovative conditions of economic development are considered in the textbook. For students of economic specialization of Central Asia studying in Europe and the United States and the widest range of readers interested in problems of Economics, Republic of Uzbekistan. The New Role of Labor Unions in the AI Era Arenas Falótico, Andrés J., Bayón Pérez, Jessica, 2025-06-04. As artificial intelligence (AI) is introduced on a day-to-day basis, its use as a tool is an effective and transformative tool for companies and even labor unions. As AI reshapes industries, tasks, and redefines jobs, unions must adapt to compete with its implementation. Traditionally, unions negotiate wages and working conditions; now they are fighting for job security and worker representation with the introduction of AI. This new role positions labor unions as crucial mediators between technological innovation and worker rights, ensuring that AI benefits all rather than deepening inequality. *The New Role of Labor Unions in the AI Era* explores the transformative role of AI and how it is affecting the field of business and management. It further discusses how technologies are reshaping business strategies, operations, and the overall management landscape. Covering topics such as automation, labor markets, and workplace harassment, this book is a useful resource for researchers, academicians, students, and more.

Economic Wealth Creation and the Social Division of Labour Robert P. Gilles, 2019-02-09. This is the second book of a two-volume set that continues Adam Smith's work using the tools mathematical, experimental, and behavioural economists have developed since 1776. As in the first volume, markets are not the central organising principle. Instead, attention centres on social institutions and the division of labour that they enable. The book studies this via the endogenous division of labour that existing institutions help form. The first book in the series examined this problem deeply, resorting minimally to formal mathematical modelling; the second volume is where the formal

modelling blossoms General equilibrium theory meets network theory and receives a breath of fresh air including a new viewpoint on economic inequality the newly resurgent bane of capitalism What I said for the first volume applies to this second volume equally if you care to understand the economy this book belongs to your bookshelf Dimitrios Diamantaras Temple University Philadelphia USA This textbook introduces and develops new tools to understand the recent economic crisis and how desirable economic policies can be adopted Gilles provides new institutional concepts for wealth creation such as network economies which are based on the social division of labour This second volume introduces mathematical theories of the endogenous formation of social divisions of labour through which economic wealth is created Gilles also investigates the causes of inequality in the social division of labour under imperfectly competitive conditions These theories frame a comprehensive innovative and consistent perspective on the functioning of the twenty first century global economy explaining many of its failings Suitable reading for advanced undergraduate MSc and postgraduate students in microeconomic analysis economic theory and political economy

Routledge Handbook on Labour in Construction and Human Settlements Edmundo Werna,George Ofori,2023-12-12 Routledge Handbook on Labour in Construction and Human Settlements presents a detailed and comprehensive examination of the relationship between labour and the built environment and synergises these critical focus areas in innovative ways This unrivalled edited collection of chapters analyses problems and presents possible solutions related to the employment and conditions of workers in the construction industry It provides comprehensive coverage of the relationship between the global workforce and the built environment and is divided into four topical areas how labour and the built environment relate to development employment generation in the built environment quality of employment in the built environment and the impact of the built environment on labour in other sectors Underpinning the entire book is the premise that the way the built environment is produced and its main products buildings cities and towns have an impact on large numbers of workers At the same time the quality of the built environment requires construction workers who are well

trained and with good working conditions While cities and towns are the engines of economic growth they will not be able to fulfil their economic potential if poverty in the workforce is not addressed Those who are unemployed underemployed or work in unfavourable conditions cannot fully contribute to production and at the same time are limited in their ability to purchase goods and services therefore limiting economic growth and restricting improvements in their living standards In addition investments in infrastructure housing and inner city redevelopment cannot be sustainable if labour issues i e poverty are not addressed This book aims at analysing this complex set of issues comprehensively and will be essential reading to a wide range of researchers across the interdisciplinary intersections of construction business and management economic development urban studies sociology political science and project management
