Creative Couples In The Sciences:

Creative Couples in the Sciences Helena Mary Pycior, Nancy G. Slack, Pnina G. Abir-Am, 1996 Can two scientists work and live together Marie and Pierre Curie proved that it was indeed possible to have a happy marriage and do brilliant research together This collection of seventeen original essays explores the interplay between marriage and scientific work in the lives of two dozen couples in the nineteenth and twentieth century It is the first book to discuss the professional and personal lives of scientific couples For much of this period marriage was the only acceptable way a woman could gain access to the tools space and colleagues indispensable to doing science Yet collaboration with her husband could also mean the denial of full credit for her work inability to move to better jobs and the juggling of domestic and scientific responsibilities For the husband collaboration with his skilled unpaid wife could bring greater achievements than he might have achieved alone but also meant the suspicion of his professional peers and the necessity of supporting the household The creative couples described in this volume range from Nobel Prize winners and world renowned social scientists to obscure field biologists The essays describe marriages and scientific collaborations that were a joy to both partners as well as those that proved disastrous In addition to the editors the contributors are Marianne Gosztonyi Ainley Barbara J Becker Bernadette Bensaude Vincent Mildred Cohn Janet Bell Garber Christiane Groeben Joy Harvey Susan Hoecker Drysdale Pamela M Henson Maureen J Julian Sylvia W McGrath Marilyn Bailey Ogilvie John Stachel Linda Tucker and Sylvia Wiegand They provide unique insights into the nature of cross gender collaboration and intimacy This volume will be of enormous interest to contemporary scientists to historians of science and to anyone interested in the ways women and men share marriage and work

Collaborative Couples in the Sciences** Annette Lykknes, Donald L. Opitz, Brigitte Van Tiggelen, 2012-06-05 In this volume a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced heterosexual and homosexual aristocratic and working class and politically right and left The contributors analyze cases shaped by their particular geographical locations ranging from retreat settings like the English countryside and Woods Hole Massachusetts to university laboratories and urban centers in Berlin Stockholm Geneva and London The volume demonstrates how the terms and meanings of collaboration variably shaped by disciplinary imperatives cultural mores and the agency of the collaborators themselves illuminate critical intellectual and institutional
