Robert Moss,2013-03-19 Our earliest poets were shamans Today as in the earliest times true shamans are poets of consciousness who know the power of song and story to teach and to heal They understand that the right words open pathways between the worlds and draw closer the gods and goddesses who wish to live through us Robert Moss brings this ancient bardic tradition to life in this collection of poems and stories that stream directly from dreams and shamanic adventures in the world behind the world You ll be carried into a reality where everything is alive and conscious where tigers and bears can lend you their forms and raven and hawk can give you their sight where the ancestors are talking talking and the gates to the Otherworld open from wherever you are You ll awaken through these pages to how shamans use poetic speech to call the soul back home into the bodies of those who have lost vital energy through pain or trauma or heartbreak You ll travel to the Island of No Pain where lost boys and girls are kept safe And you ll learn to make the return journey and sing the lost soul back into the body where it belongs

**American Book Publishing Record**, 1995

*Dreaming* Jennifer M. Windt, 2015-06-05 A comprehensive proposal for a conceptual framework for describing conscious experience in dreams integrating philosophy of mind sleep and dream research and interdisciplinary consciousness studies Dreams conceived as conscious experience or phenomenal states during sleep offer an important contrast condition for theories of consciousness and the self Yet although there is a wealth of empirical research on sleep and dreaming its potential contribution to consciousness research and philosophy of mind is largely overlooked This might be due in part to a lack of conceptual clarity and an underlying disagreement about the nature of the phenomenon of dreaming itself In *Dreaming* Jennifer Windt lays the groundwork for solving this problem She develops a conceptual framework describing not only what it means to say that dreams are conscious experiences but also how to locate dreams relative to such concepts as perception hallucination and imagination as well as thinking knowledge belief deception and self consciousness Arguing that a conceptual framework must be not only conceptually sound but also phenomenologically plausible and carefully informed by neuroscientific research Windt integrates her review of philosophical work on dreaming both historical and contemporary with a survey of the most important empirical findings This allows her to work toward a systematic and comprehensive new theoretical understanding of dreaming informed by a critical reading of contemporary research findings Windt's account demonstrates that a philosophical analysis of the concept of dreaming can provide an important enrichment and extension to the conceptual repertoire of discussions of consciousness and the self and raises new questions for future research

**Temiar Religion, 1964-2012** Geoffrey Benjamin, 2014-09-12 The Temiars a Mon Khmer speaking Orang Asli society living in the uplands of northern Peninsular Malaysia have long attracted popular attention in the West for reports that ascribed to them the special psychotherapeutic technique known as

Senoi Dreamwork However the reality of Temiar religion and society as studied and recorded by Geoffrey Benjamin is even more fascinating than that popular portrayal which he shows to be based on a serious misrepresentation of Temiar practice When Benjamin first lived in the isolated villages of the Temiars between 1964 and 1965 he encountered a people who lived by swidden farming supplemented by hunting and fishing They practised their own localised animistic religion in an area where the main religion was once Mahayana Buddhism and is now Islam Half a century later the Temiars have become much more deeply embedded in broader Malaysian society while retaining their distinctive way of life and maintaining their complex animistic religious beliefs Benjamin s ongoing fieldwork in the 1970s 1990s and 2000s followed the Temiars through processes of religious disenchantment and re enchantment as they reacted in various ways to the advent of Baha i Islam and Christianity Some Temiars even developed a new religion of their own In addition to its rich ethnographic reportage the book proposes a novel theory of religion and in the process develops a deeply insightful account of the changing intellectual framework of anthropology over the past half century
