Alzheimer Discourse Some Sociolinguistic Dimensions:

Alzheimer Discourse Vai Ramanathan, 2013-11-05 This book deals with the narrative discourse specifically lifestories of 16 patients suffering from Alzheimer's disease AD. It attempts to understand the discourse of these patients in contextual terms. Thus far, the dominant explanation for incoherence in AD speech has been largely provided by research in psycholinguistics, much of which has understood AD speech in terms of the progressively deteriorating nature of the disease. This study provides a complementary view by examining ways in which some social factors, audiences, setting, and time influence the extensiveness and meaningfulness of AD talk. By offering both an examination of interactions across the data as well as analyzing particular cases in detail, this unusual study attempts to juxtapose some general insights regarding AD discourse with case-specific ones. Sociolinguistic analyses of the data demonstrate how certain audiences and particular settings set in motion discourse activities that either facilitate the patient's ability to recall their pasts or impede it. This analysis also includes a critical look at the researcher's contribution in negotiating and reinforcing these activities. Ethnographic details about the social worlds of some of these patients shed light on how larger social contexts at least indirectly contribute to exacerbating the patient's conditions or stabilizing them. The analyses of both context and language provides a more global understanding of the Alzheimer experience. This study also discusses some interactional strategies by which professionals can begin to engage AD patients in meaningful talk as well as ways by which they can better hear AD patients' cues at narrating. Throughout this book, it underscores the need to factor in social factors when making assessments regarding AD patients' communicative abilities.

The Routledge International Handbook of Psycholinguistic and Cognitive Processes Jackie Guendouzi, Filip Loncke, Mandy J. Williams, 2023-06-02 This handbook provides a comprehensive overview of the theories of cognition and language processing relevant to the field of communication disorders Thoroughly updated in its second edition the book explores a range of topics and issues that illustrate the relevance of a dynamic interaction between both theoretical

and applied clinical work Beginning with the origins of language evolution the authors explore a range of both developmental and acquired communication disorders reflecting the variety and complexity of psycholinguistics and its role in extending our knowledge of communication disorders The first section outlines some of the major theoretical approaches from psycholinguistics and cognitive neuroscience that have been influential in research focusing on clinical populations while Section II features examples from researchers who have applied this body of knowledge to developmental disorders of communication Section III features examples focusing on acquired language disorders and finally Section IV considers psycholinguistic approaches to gesture sign language and alternative and augmentative communication AAC The new edition features new chapters offering fresh perspectives further reading recommendations and a new epilogue from Jackie Guendouzi This valuable text serves as a single interdisciplinary resource for graduate and upper level undergraduate students in cognitive neurosciences psychology communication sciences and disorders as well as researchers new to the field of communication disorders or to psycholinguistic theory

Studies in Language and Social Interaction Jennifer Mandelbaum, 2003-01-30 This collection offers empirical studies and theoretical essays about human communication in everyday life The writings come from many of the world's leading researchers and cut across academic boundaries engaging scholars and teachers from such disciplines as communication sociology anthropology linguistics and education Chapters emphasize empirical qualitative studies of people's everyday uses of talk in interaction and they feature work in such areas as sociolinguistics conversation analysis discourse analysis and ethnography The volume is dedicated to and highlights themes in the work of the late Robert Hopper an outstanding scholar in communication who pioneered research in Language and Social Interaction LSI The contributors examine various features of human interaction such as laughter vocal repetition and hand gestures occurring naturally within a variety of settings at a dinner table a doctor's office an automotive repair shop and so forth whereby interlocutors accomplish aspects of their interpersonal or institutional lives resolve a disagreement report bad medical news negotiate a raise and more all of which may relate to larger social issues including police brutality human spirituality death and optimism The chapters in this anthology show that social life is largely a communicative accomplishment and that people constitute the social realities experienced every day through small and subtle ways of communicating carefully orchestrated but commonly taken for granted In showcasing the diversity of contemporary LSI research this volume is appropriate for scholars and graduate students in language and social interaction communication sociology research methods qualitative research methods discourse analysis conversation analysis linguistics and related areas

The Politics of TESOL Education Vai Ramanathan, 2002 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company

Language, Body, and Health Paul McPherron, Vaidehi Ramanathan, 2011-11-30 This edited book addresses ways in which bodies conceived broadly get languaged and ways in which ideas of normalcy and normal bodies are held in place and reproduced The articles show how it is through this medium that people with ailments or

unusual bodies get positioned and slotted in certain ways The present volume represents a departure from other works in at least two ways First it brings in discourses around bodies per se into language related research a realm that previous research has not directly engaged Second it ushers in discussions about bodies by critically addressing the language by which experiences around bodily breakdowns and ailments occur Calling attention to a host of discourses biomedical societal poststructuralist and drawing on a variety of disciplinary perspectives critical theories ethnographically gathered materials and extant data the chapters pierce the general veil of silence that we have collectively drawn regarding how some of our most intimate body dis functions impact our everyday living and sense of normalcy **Arguing** Dale Hample,2006-04-21

Arguing Exchanging Reasons Face to Face describes the process and products of face to face argument Author Dale Hample presents arguing as a type of interpersonal interaction rather than as a kind of text or a feature of a public speech He focuses primarily on argument production and explores the rhetorical and philosophical traditions of arguing keeping as the volume s main focus the integration of arguing into the literatures on message production conflict management and interpersonal communication Distinctive in its approach this volume offers a synthesis of empirical research on situational and individual differences in arguing an exploration of argument frames perceptions and expectations about arguing an examination of the conversational and rational natures of argument products a psychological description of inventional processes and a full chapter on the emotional experience of arguing This unique work is appropriate for scholars and graduate students in argumentation discourse persuasion conflict management interpersonal communication organizational communication and message production *Learning from the Talk of Persons with Dementia* Trini Stickle,2020-08-03 This book offers an in

depth analysis of the interactional challenges that arise due to various dementias and in a variety of social contexts By assessing conversations between persons with dementia and their family members caregivers and clinicians it shares insights into both the language and actions selected by the participants Using several different research methods authors highlight competencies and areas of struggle as well as choices that ease interactions along with those that seem to complicate them Each chapter provides practical strategies to help readers better navigate day to day interactions with persons with dementia The book is part of a continuing effort to offer guidance and hope to those for whom such conversations have become part of their daily lives It presents concrete recommendations for specific groups such as family members caregivers and clinicians it will also be of interest to researchers in the field of dementia and early career scholars interested in the methodologies discussed *Illness Narratives in Practice: Potentials and Challenges of Using Narratives in Health-Related Contexts*

Gabriele Lucius-Hoene,Christine Holmberg,Thorsten Meyer,2018 Comprehensive overview of illness narratives in practice divided into eight distinct parts The clear layout allows the readers to focus on the area essential to them and get a comprehensive overview and reflective stance of narratives in that field Constructing the Beginning Simon

Locke,2014-04-04 In *Constructing the Beginning* Simon Locke offers a new approach to considering the enigma of creation

science using the perspective of discourse analysis Using the publications of the British Creation Science Movement to perform a detailed analysis of the creationist case Locke demonstrates that the discourses and rhetorics used by natural and social scientists are also employed by non scientists Out of this study a view of science as a cultural resource develops questioning the adequacy of perceived sociological wisdom that sees science as the source and embodiment of cultural rationalization As a case study of the use of science as a discursive resource in everyday life Constructing the Beginning speaks to scholars of discourse analysis constructionism rhetorics and the public understanding of science It will also be of great interest to scholars in the areas of cultural studies sociology of scientific knowledge and of religion postmodernism and sociological theory Additional Copy Creation science is the target of much attack these days from both within and outside of the orthodox scientific community This book however takes a different approach It is not an attack on creationism nor is it a defense The author s interest is not in creationism at all but rather it is in the questions of the role and significance of science in modernity or the public understanding of science Locke s approach to this issue is a discursive and rhetorical one Creationism is treated as a case study of the argumentative engagement between science and non science which in his view is as central to the commonsense lifeworld of modernity as much as it is to the lives of its intellectuals An important dimension of the public meaning of science in modernity is its limits and its relations with other modes of thought and belief which continue to survive as discourses in the wider culture Creationism is merely one example of this general feature The book begins with a discussion of the current issues in the public understanding of science in relation to traditional sociological views of the impact of science on modernity This is examined through rationalization and the contrasting view derived from the sociology of scientific knowledge which points to the likelihood of a much more complex and variable relationship than rationalization proposes It continues with an argument and detailed analysis that focuses on three main points the problem of a competing account of reality the world in the form of evolution the problem of competing accounts of the Bible the Word in the form of different versions of Christianity and the realization that both of these problems must be managed together in such a way that creationists own version s of the world and of the Word are compatible a compatibility achieved through a discursive syncretism The final chapter brings together the strands of the argument to further develop the implications of the dilemma of science for the public understanding of science through the idea of science as a cultural resource and its possible relation to other such cultural resources within modernity such as Christianity It is suggested that much so called anti science could be made sense of in these terms and proposes further research in this direction

Ethnography and Language Policy Teresa L. McCarty, 2014-04-04 Seeking to expand policy discourses in ways that lead to social justice for all this volume uses a critical sociocultural and ethnographic approach to address a variety of pressing language planning and policy issues contextualized in case studies **Literature and Medicine** Anna M. Elsner, Monika Pietrzak-Franger, 2024-01-18 The experiences of health and illness death and dying the normal and the

pathological have always been an integral part of literary texts This volume considers how the two dynamic fields of medicine and literature have crossed over and how they have developed alongside one another It asks how medicine as both science and practice shapes the representation of illness and transforms literary form It considers how literary texts across genres and languages of disease have put forward specific conceptions of medicine and impacted its practice Taking into account the global multilingual and multicultural contexts this volume systematically outlines and addresses this double sidedness of the literature medicine connection Literature and Medicine covers a broad spectrum of conceptual thematic theoretical and methodological approaches that provide a solid foundation for understanding a vibrant interdisciplinary field

The Routledge Handbook of Multilingualism Marilyn Martin-Jones, Adrian Blackledge, Angela Creese, 2012-05-31 The Routledge Handbook of Multilingualism provides a comprehensive survey of the field of multilingualism for a global readership and an overview of the research which situates multilingualism in its social cultural and political context The handbook includes an introduction and five sections with thirty two chapters by leading international contributors The introduction charts the changing landscape of social and ethnographic research on multilingualism theory methods and research sites and it foregrounds key contemporary debates Chapters are structured around sub headings such as early developments key issues related to theory and method new research directions This handbook offers an authoritative guide to shifts over time in thinking about multilingualism as well as providing an overview of the range of contemporary themes debates and research sites The Routledge Handbook of Multilingualism is the ideal resource for postgraduate students of multilingualism as well as those studying education and anthropology
