Naval Facilities Engineering Command,1985   *Computer-Aided Transit Scheduling* Martin Desrochers,Jean-Marc Rousseau,2012-12-06 This volume consists of papers presented at the Fifth International Workshop on Computer Aided Scheduling of Public Transport which was held in Montreal from August 19th to the 23rd 1990 Since the first Workshop in Chicago in 1975 the field had matured considerably In 1975 there were no presentations that described systems which had been implemented and used on a regular basis By 1980 in Leeds and certainly by 1983 in Montreal several systems were in regular use They were based on both heuristics and mathematical programming techniques In 1990 there were more than one hundred transit companies using computer aided scheduling tools in their regular operations The scope of the Workshop was broadened in 1987 in Hamburg so that topics related to scheduling may be introduced We find for example in this book several papers on the technology related to the collection of data and or the data bases required for scheduling and planning activities   *Formal Models of Agents* John-Jules C. Meyer,Pierre-Yves Schobbens,2003-07-31 This volume provides a selection of strictly refereed papers first presented during a workshop held within the context of the ESPRIT ModelAge Project in Certosa di Pertignano Italy in 1997 The 15 revised full papers presented together with an introductory survey by the volume editors were carefully reviewed for inclusion in the book The book is devoted to the interdisciplinary study of formal models of agency and intelligent agents from the points of view of artificial intelligence software engineering applied logic databases and organization theory Among the topics addressed are various types of agents and multi agent systems cooperation communication specification verification deontic logic diagnosis and decision making   **Thermal Stresses—Advanced Theory and Applications** Richard B. Hetnarski,M. Reza Eslami,2019-04-11 This is an advanced modern textbook on thermal stresses It serves a wide range of readers in particular graduate and postgraduate students scientists researchers in various industrial and government institutes and engineers working in mechanical civil and aerospace engineering This volume covers diverse areas of applied mathematics continuum mechanics stress analysis and mechanical design This work treats a number of topics not presented in other books on thermal stresses for example theory of coupled and generalized thermoelasticity finite and boundary element method in generalized thermoelasticity thermal stresses in functionally graded structures and thermal expansions of piping systems The book starts from basic concepts and principles and these are developed to more advanced levels as the text progresses Nevertheless some basic knowledge on the part of the reader is expected in classical mechanics stress analysis andmathematics including vector and cartesian tensor analysis This 2nd enhanced edition includes a new chapter on Thermally Induced Vibrations The method of stiffness is added to Chapter 7 The variational principle for the Green Lindsay and Green Naghdi models have been added to Chapter 2 and equations of motion and compatibility equations in spherical coordinates to Chapter 3 Additional problems at the end of chapters were added   Telephone and Service Directory National Institutes of Health
