Corneanu,2012 Nu s au introdus date The Cambridge World History of Genocide: Volume 2, Genocide in the Indigenous, Early Modern and Imperial Worlds, from c.1535 to World War One Ned Blackhawk,Ben Kiernan,Benjamin Madley,Rebe Taylor,2023-05-04 Volume II documents and analyses genocide and extermination throughout the early modern and modern eras It tracks their global expansion as European and Asian imperialisms and Euroamerican settler colonialism spread across the globe before the Great War forging new frontiers and impacting Indigenous communities in Europe Asia North America Africa and Australia Twenty five historians with expertise on specific regions explore examples on five continents providing comparisons of nine cases of conventional imperialism with nineteen of settler colonialism and offering a substantial basis for assessing the various factors leading to genocide This volume also considers cases where genocide did not occur permitting a global consideration of the role of imperialism and settler Indigenous relations from the sixteenth to the early twentieth centuries It ends with six pre 1918 cases from Australia China the Middle East Africa and Europe that can be seen as premonitions of the major twentieth century genocides in Europe and Asia Pillars in the History of Biblical Interpretation, Volume 2 Stanley E. Porter,Sean A. Adams,2016-11-03 This two volume set is part of a growing body of literature concerned with the history of biblical interpretation The ample introduction first situates key players in the story of the development of the major strands of biblical interpretation since the Enlightenment identifying how different theoretical and methodological approaches are related to each other and describing the academic environment in which they emerged and developed Volume 1 contains fourteen essays on twenty two interpreters who were principally active before 1980 and volume 2 has nineteen essays on twenty seven of those who were active primarily after this date Each chapter provides a brief biography of one or more scholars as well as a detailed description of their major contributions to the field This is followed by an often new application of the scholar s theory By focusing on the individual scholars and their work the book recognizes that interpretive approaches arise out of certain circumstances and that scholars are influenced by and have influences upon both other interpreters and the times in which they live This set is ideal for any class on the history of biblical interpretation and for those who want a greater understanding of how the current field of biblical studies developed A History of the Laws of War: Volume 2 Alexander Gillespie,2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians

examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself
