produced for the United Kingdom Backgammon Federation *Unquiet Things* Colin Jager, 2015 In Great Britain during the Romantic period governmental and social structures were becoming more secular as religion was privatized and depoliticized. If the discretionary nature of religious practice permitted spiritual freedom and social differentiation, however, secular arrangements produced new anxieties. *Unquiet Things* investigates the social and political disorders that arise within modern secular cultures and their expression in works by Jane Austen, Horace Walpole, Samuel Taylor Coleridge, Lord Byron, and Percy Shelley among others. Emphasizing secularism rather than religion as its primary analytic category, *Unquiet Things* demonstrates that literary writing possesses a distinctive ability to register the discontent that characterizes the mood of secular modernity. Colin Jager places Romantic era writers within the context of a longer series of transformations begun in the Reformation and identifies three ways in which romanticism and secularism interact: the melancholic mood brought on by movements of reform, the minoritizing capacity of literature to measure the disturbances produced by new arrangements of state power, and a prospective romantic thinking. Jager calls after the secular. The poems, novels, and letters of the Romantic period reveal uneasy traces of the spiritual past haunted by elements that trouble secular politics at the same time they imagine new and more equitable possibilities for the future. In the twenty-first century, Jager contends, we are still living within the terms of the Romantic response to secularism when literature and philosophy first took account of the consequences of modernity.

ETHICAL CONSIDERATIONS IN MACHINE LEARNING Dr. R. John Martin, 2024-05-18 There have been significant breakthroughs made in the area of automated learning which is also known as statistical learning and is more often referred to as machine learning These developments have occurred in recent times A major example of these breakthroughs occurred in 2016 when the AlphaGo programme triumphed against Lee Sedol the world champion Go player This victory was the most famous illustration of these advancements The field of machine learning has a broad variety of applications some of which include

search engines voice and image recognition automatic translation and chatbots These applications are beginning to find their way into a wide variety of various areas such as the banking industry the energy industry the transportation industry the education industry and the healthcare industry Increases in computer power as well as the capacity to store and analyse enormous quantities of data commonly referred to as big data are the driving force behind the successes of machine learning which is one of the subfields of artificial intelligence AI research Machine learning includes the ability to store and analyse massive volumes of data After these occurrences sensationalist and incorrect media stories have been released which have stated that technology particularly robots may someday take the place of humans These claims have been made in response to the events that have occurred Despite the fact that this scenario is still beyond the capabilities of the science that is currently available it is still true that there is a need for ethical considerations to be given to the appropriate application of learning algorithms and the ever increasingly sophisticated massive and pervasive amounts of data This is because there is a need for ethical considerations to be given to the implementation of these algorithms Since 2015 there has been a profusion of projects along similar lines which include both governmental and corporate initiatives at the national European or international levels These initiatives include a variety of different levels of government Against this background the purpose of the present material is to Raise awareness and provide researchers with food for thought and particular waymarks and the like
