## Of Europe:

**A Certain Idea of Europe** Craig Parsons, 2018-07-05 The quasi federal European Union stands out as the major exception in the thinly institutionalized world of international politics Something has led Europeans and only Europeans beyond the nation state to a fundamentally new political architecture Craig Parsons argues in *A Certain Idea of Europe* that this something was a particular set of ideas generated in Western Europe after the Second World War In Parsons's view today's European Union reflects the ideological and perhaps visionary project of an elite minority His book traces the progressive victory of this project in France where the battle over European institutions erupted most divisively Drawing on archival research and extensive interviews with French policymakers the author carefully traces a fifty year conflict between radically different European plans Only through aggressive leadership did the advocates of a supranational community Europe succeed at building the EU and binding their opponents within it Parsons puts the causal impact of ideas and their binding effects through institutions at the center of his book In so doing he presents a strong logic of social construction a sharp departure from other accounts of EU history that downplay the role of ideas and ideology *An Historical Geography of Europe* Norman John Greville Pounds, 1990 The central theme of this book is the changing spatial pattern of human activities during the last 2 500 years of Europe's history Professor Pounds argues that three factors have determined the locations of human activities the environment the attitudes and forms of social organization of the many different peoples of Europe and lastly the levels of technology Within the broad framework of the interrelationships of environment society and technology several important themes pursued from the fifth century BC to the early twentieth century settlement and agriculture the growth of cities the development of manufacturing and the role of trade Underlying each of these themes are the discussions of political organization and population Although the book is based in part of Professor Pound's magisterial three volumes *An Historical Geography of Europe* 1977 1980 1985 it was written especially for students and readers interested in a general survey of the subject **Russia and the Idea of Europe** Iver B. Neumann, 1996 Drawing on a wide array of Russian sources Iver Neumann outlines the Russian debate about Europe it unfolded over the last 200 years

*America, Germany, and the Future of Europe* Gregory F. Treverton, 2014-07-14 Gregory Treverton reviews the significant episodes in Europe's history after World War II emphasizing America's preoccupation with Europe and the decisive effect of U S foreign policy on European security and economic arrangements during the postwar years Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Turbulent Era, the Year of Europe in Retrospect*, Florence, 1974 Benjamin S.

Rosenthal,Donald MacKay Fraser,1974      Political Economy of Europe Hardy Hanappi,2021-11-29 The development of European unification has reached a critical stage Despite 75 years of peace increases in welfare and growth since World War 2 there is now a growing scepticism of the European agenda from various quarters most notably embodied in the exit of the United Kingdom from the European Union To fully understand the dynamics at work this book presents an introduction to the development of the political economy of Europe from 1900 to 2020 The first part of the book provides an overview of European economic and political history from 1900 to the present It is clear from this history that Europe s population and most notably its leaders have been deeply influenced by ideology during this time This sets the context for the second part of the book which takes a closer look at some major paradigms framing European dynamics 1 the market oriented paradigm 2 Marx s paradigm and 3 the fascist paradigm In this part the essential core of each of these paradigms is presented and critiqued In the third part the current bottlenecks of European evolution the migration crisis Brexit rise of new Fascism the climate crisis the COVID 19 pandemic are investigated in the light of a possible emergence of a new scientific paradigm Europe s role in the global division of labour its possibility to serve as a role model for the advantages of democratically governing a highly diverse set of populations is also explained This book is an ideal text for students undertaking courses on the political economy of Europe in either economics or politics departments      **The Construction of Europe S.**

Martin,2013-03-09 Stephen Martin The fourteen essays that constitute this work provide a coherent review of the past and present of the European Community and consider some of its possible futures Werner Abelshauser and Richard Griffiths offer separate perspectives on the precursors of the European Community Abelshauser argues that comparison of the fates of the European Coal and Steel Community and the European Defense Community demonstrate the dominance of political over economic considerations in the integration process Griffiths considers the stillborn European Political Community many of the proposed features of which somewhat transformed were embodied in the Treaty of Rome Both suggest that as a practical matter a coming together of French and German interests has been a precondition for advances in European integration Stephen Martin and Andrew Evans discuss the development of the Com munity s Structural Funds first envisaged as tools to smooth the transition from a collection of regional economies to a continent wide single market now increasingly seen as devices to guide adjustment to long term struc tural problems Stuart Holland emphasizes the role of the Structural Funds as one element in a broad range of strategies to ensure social and economic cohesion as the Maastricht Treaty ushers the European Union into the next stage of its development      **Introduction to the Literature of Europe in the Fifteenth,**

**Sixteenth, and Seventeenth Centuries** Henry Hallam,1880      Climate Change and the Future of Europe Michael Kaeding,Johannes Pollak,Paul Schmidt,2023-03-28 While the ambitious objectives outlined in the EU s Green Deal aim at making Europe the first climate neutral continent by 2050 national implementation greatly varies depending on local geographies history culture economics and politics This book analyses Member States and EU neighbours national efforts to

combat climate change It subsequently draws on these factors to highlight local challenges tensions and opportunities on the road towards climate neutrality In the context of inter country dependencies following Russia s war against Ukraine it addresses strategic questions regarding EU integration the transformation of our economies the reduction of energy dependencies and public perception of the above The book also makes concrete recommendations in various policy areas on how individual countries and the EU as a whole should deal with the climate crisis **European Muslims and the Qur'an**

Gulnaz Sibgatullina, Gerard Wiegers, 2023-12-18 This edited volume aims to advance a Muslim centered perspective on the study of Islam in Europe To do so it brings together a range of case studies that illustrate how European Muslims engaged with their Sacred Scripture while being part of a Christian dominated social and political space The research presented in this volume seeks to analyse Muslims practices of translating interpreting and using the Qur an as a sacred object and thus pursues three main research agendas Part I focuses on the issues of Muslim Christian relations in Europe and studies how these relations have engendered discursive connections between Muslim and Christian produced texts related to the study and interpretation of the Qur an Part II aims to bring scholarly attention to the under represented cases of Muslim communities in Europe This part introduces new research on Polish Belarusian Daghestani Bosnian and Kazan Tatars and examines local traditions of producing vernacular Qur ans and commodification of Qur anic manuscripts The final section of the volume Part III contributes to filling in the gaps related to the theoretical and conceptual framing of Muslim translation activities The history of religious thought and practice in European history is in many ways still uncharted territory This book aims to contribute to a better understanding of the cultural history of the Qur an and Muslim agency in interpreting transmitting and translating the Sacred Scripture **History of Europe from the Commencement of the French Revolution in M. DCC. LXXXIX to the Restoration of the Bourbons in M. DCCC. XV.** Archibald Alison, 1855

**Glimpses of Europe, ed. by W.C. Procter** Europe, 1889 **Sciences in the Universities of Europe, Nineteenth and Twentieth Centuries** Ana Simões, Maria Paula Diogo, Kostas Gavroglu, 2015-04-20 This book focuses on sciences in the universities of Europe in the nineteenth and twentieth centuries and the chapters in it provide an overview mostly from the point of view of the history of science of the different ways universities dealt with the institutionalization of science teaching and research A useful book for understanding the deep changes that universities were undergoing in the last years of the 20th century The book is organized around four central themes 1 Universities in the longue dur e 2 Universities in diverse political contexts 3 Universities and academic research 4 Universities and discipline formation The book is addressed at a broad readership which includes scholars and researchers in the field of General History Cultural History History of Universities History of Education History of Science and Technology Science Policy high school teachers undergraduate and graduate students of sciences and humanities and the general interested public **Tea Cultures of Europe: Heritage and Hospitality** Hartwig Bohne, 2024-06-04 Shortlisted for the 2024 Gourmand Awards Category Drinks No matter where you

are in the world you are at home when tea is served Earlene Grey Tea has its very own significance in every consumer's life. However, above all, tea represents enjoyment, the ritual of preparation and the appreciation of the moment. In this sense, tea creates hospitality and peace; tea brings people together to talk and to make time for each other. Tea needs time; tea spends time. In this pioneering book featuring hospitality embraced by tea culture, you will read of fascinating tea ceremonies, impressive tea china and comfortable tea houses, as well as different national and regional tea-related habits in European countries. Nearly 50 contributions provide unique insights: Samowars in the East, Dresden blue porcelain in Germany, tulip glasses in Turkey, and around silver tea pots in Great Britain and many more. The first tea plantations in Portugal or Georgia are discussed, as well as tea in arts, tea events, tea flavoured signature products, tea pairing and impulses for entrepreneurship and education. *Tea Cultures of Europe* is written for tea lovers, educators and students, as well as industry practitioners, tea sommeliers, tea masters and entrepreneurs.

*A History of the Birds of Europe, Not Observed in the British Isles* Charles Robert Bree, 1875

**European Union Law** Damian Chalmers, Gareth Davies, Giorgio Monti, 2010-06-24 This eagerly awaited new edition has been significantly revised after extensive user feedback to meet current teaching requirements. The first major textbook to be published since the rejuvenation of the Lisbon Treaty, it retains the best elements of the first edition: the engaging, easily understandable writing style, extracts from a variety of sources showing the creation, interpretation and application of the law, and comprehensive coverage. In addition, it has separate chapters on EU law in national courts, governance and external relations, reflecting the new directions in which the field is moving. The examination of the free movement of goods and competition law has been restructured. Chapter introductions clearly set out what will be covered in each section, allowing students to approach complex material with confidence and detailed further reading sections encourage further study. Put simply, it is required reading for all serious students of EU law.

*The Rights of Immigrant Workers in the European Union* Joanna Apap, 2002-09-01 This book is one of the very few studies that evaluates the evolving policies towards third country nationals residing and working in the European Union. EU. Other studies have analysed the existing legal framework of citizenship and migrants' rights in the EU and the flow of migrants into the Community. However, much less comparative research has been carried out about the actual position and the practice of migrants' rights in the receiving countries in the context of an ever-integrating EU and the removal of internal borders. The focus of this book is on the consequences of the increasing number of Maghreb workers residing in Italy and Spain, both for EU policy and with respect to these two countries as relatively new receiving states. The book examines: What public policy implications does the labour immigration from the Maghreb countries have for the EU as a supranational Community rather than for the Member states individually? To what extent can citizenship rights be extended to third country nationals legally residing in a European Union to make their status as close as possible to that of European citizens?

*The Geopolitics of Europe's Identity* N. Parker, 2008-02-04 This book pursues an original perspective on Europe's shifting extent and geopolitical standing, how

countries and spaces marginal to it impact on Europe as a center A theoretical discussion of borders and margins is developed and set against nine studies of countries regions and identities seen as marginal to Europe      **Tariff Levels and the Economic Unity of Europe** H. Liepmann, 2017-10-10 The years between the Wars saw rapid and far reaching changes to the character and distribution of the world's trade Governments of the world attempted to mould and control their own economies and economic nationalism grew to unseen levels This book first published in 1938 is the comprehensive examination of the European tariffs of the time and it traces their effects upon the actual course of trade and in so doing is one of the few factual studies on the reality of tariffs      *America's Perceptions of Europe* L. Eliasson, 2010-07-05 This book seeks to rectify Americans views of its closest ally Europe an ambitious task but one sorely lacking in the literature Many prejudices about Europe surface in headlines while others remain latent but they are real pervasive and ingrained
