

Chance

If you looked in the corners,
You'd find her right there,
Hidden by darkness,
And the curls in her hair,
Her nose in a book,
With her head in the clouds,
Hiding her feelings,
Away from the crowds,
If you sat by her side,
While the world passed you by
She'd tell you the story,
Behind the pain in her eyes,
If you gave her five minutes,
You'd see how her smile,
Makes even the bad things
In life seem worthwhile,
But you don't look in corners,
You don't even glance,
So she sits there still waiting,
To be given a chance.

Of Poems Thoughts Things:

The Nature and Elements of Poetry Edmund Clarence Stedman, 1892 **On the Nature of Poetry** Kenneth Verity, 2012-08-08 Some guides to a subject could more or less be written by any expert in that field but a small minority are unique creations of a rare individual who has their own view Unfortunately most of the latter types of guides fail to be good general guides Verity's genius makes him the exception This book is arranged in chronological chapters that trace the evolution of poetry as an art form At the same time each chapter gives a most practical explanation of how that aspect of poetry that it covers works and why The book is immensely readable hugely informative and adds to the ability of the reader to enjoy and to create poetry It is a classic Epictetus Amazon review The great merit of Verity's approach is that he quotes lavishly throughout not only from the poems themselves but also from a variety of critics LIBRARY REVIEWS Of his first book of sonnets Kingsley Amis wrote They belong within the corpus of English poetry Excerpts of Interview with Kenneth Verity on The Vanessa Phelps BBC Radio programme on June 2009 on the News Page off the Home page The amount of reading which underpins this book is breathtaking The great merit of Verity's approach is that he quotes lavishly throughout not only from the poems themselves but also from a variety of critics The chapter on poetry's figurative element is a model of lucid definition and telling illustration showing how many layers of meaning may lie behind a single word LIBRARY REVIEWS The author writes The intention of this book is to examine and analyse the essential nature of the phenomenon we call poetry to seek an understanding of the power this art form exerts over mind and heart to comprehend its potency and to explain its perennial ability to command the respect of mankind Almost a library in one volume this unusual book written by an accomplished poet examines the 4000 years old phenomenon of poetry **A New Library of Poetry and Song** William Cullen Bryant, 1895 **A Concordance to the Poetry of Thomas Traherne** George R. Guffey, 2024-03-29 Concordance to the Poetry of Thomas Traherne offers an essential systematic tool for scholars of seventeenth century literature and poetry particularly those exploring Traherne's unique spiritual and philosophical verse Drawing from H M Margoliouth's definitive 1958 edition this concordance meticulously catalogs each word and line from Traherne's complete poetic works providing a valuable resource for textual analysis interpretation and comparative study By indexing Traherne's poetry according to individual manuscripts published books and marginalia it brings clarity to the complexities of his textual variations and orthographic idiosyncrasies The concordance includes only the authoritative texts from the Dobell Folio eschewing Philip Traherne's later revisions and focuses on Traherne's intended compositions Concordance entries facilitate cross referencing within Traherne's poetic canon capturing his language's nuances and revealing thematic connections such as his profound engagement with concepts of innocence divinity and the natural world Scholars will find the inclusion of rare words specialized spellings and titles annotated for source consistency a critical aid in interpreting Traherne's linguistic style and theological insights This title was originally published in 1974 Concordance to the Poetry of Thomas Traherne offers an

essential systematic tool for scholars of seventeenth century literature and poetry particularly those exploring Traherne's unique spiritual and philosophical verse Drawing from H M Margoliouth's **The Cambridge Companion to Wallace Stevens** John N. Serio, 2007-01-18 Wallace Stevens is a major American poet and a central figure in modernist studies and twentieth century poetry This Companion introduces students to his work An international team of distinguished contributors presents a unified picture of Stevens poetic achievement The Introduction explains why Stevens is among the world's great poets and offers specific guidance on how to read and appreciate his poetry A brief biographical sketch anchors Stevens in the real world and illuminates important personal and intellectual influences The essays following chart Stevens poetic career and his affinities with both earlier and contemporary writers artists and philosophers Other essays introduce students to the peculiarity and distinctiveness of Stevens voice and style They explain prominent themes in his work and explore the nuances of his aesthetic theory With a detailed chronology and a guide to further reading this Companion provides all the information a student or scholar of Stevens will need **The Household Book of Poetry** Charles Anderson Dana, 1882

Emptying The Soul from A to Z With A Twist of Poetry Uganda Reed, 2009-01-01 This work of non fiction was written to help others bring closure to their past in order to step into the now It is a story about a unique and gifted young lady leaving the street life and stepping into spirituality It also talks about the true blood line and finding your true father It is a very touching story on not giving up despite of your environment or circumstances **Poetry as a Representative Art** George Lansing Raymond, 1899 The Poems of William Wordsworth William Wordsworth, 1849 The Family Library of Poetry and Song William Cullen Bryant, 1880 The Universal Deep Structure of Modern Poetry John A.F. Hopkins, 2020-04-02 With something of a poetry renaissance currently under way worldwide there is now more than ever a need for a solidly based methodology for interpreting poems something more empirical than traditional lit crit approaches and something more linguistically informed than the version of postmodernism rampant in certain Anglophone universities The latter approach which tends to allow the individual reader to do what he/she likes with a poetic text is inadequate to interpret modernist poetry whose English language precursors may be found in the late Romantics its pioneers were already writing in France as early as 1840 What is so different about the modernists Most importantly their works are monumental in that they are strongly resistant to deconstruction Contributing to this resistance is the fact that they are built around two deep level propositions each of which generates a set of indirectly signifying images sharing the same internal structure but having a different vocabulary Thus they do not signify according to linear narrative but according to these propositions and the relation between them which may be reconstructed by a careful comparison of images on the textual surface Every text as subject sign refers to an intertextual object sign which is usually another poem but may also be a film or other form of art Mediating between these two signs is their reader constructed interpretant which completes the semiotic triad As this book shows the novelty of this sign is thrown into relief by the contrast it makes with a lexical counterpart from the reader's

experience which differs from the interpretant in structure The book's inclusion of French and Japanese as well as English poems shows that deep level signifying mechanisms may well be universal with considerable research and pedagogical implications

Literature, 1899 *Half-hours with the Best Authors* Charles Knight, 1850 **Socrates at Verse and**

Other Philosophical Poems Christopher Norris, 2020-03-07 These poems by a well known philosopher and literary theorist take a lead from Plato's intriguing account of how Socrates turned to composing verse during his last few days despite having famously denounced its corrupting moral, social and political effects. Writing as a convinced formalist, Christopher Norris deploys a range of meters, stanza forms and rhyme schemes by way of exploring how the discipline of verse might relate to that of philosophical enquiry as practiced across the ages. Some of his poems have to do with individual thinkers such as Berkeley, Hume, Kant, Schopenhauer, Kierkegaard, Nietzsche, Wittgenstein, Adorno and Derrida. Others are concerned with wider debates like those around the nature of time, the status of mathematical truths, the enduring puzzles of quantum mechanics, Kurt Gödel's Undecidability Theorem, the mind/body problem, the ontology of art, the nature of rules and the role of luck in matters of moral judgment. Others again are philosophical in the non-specialist sense of confronting often asked questions about love, memory, identity, character, social roles, choice, evolution and animal sentience.
