## Of Scientific Discovery:

**Scientific Discovery in the Social Sciences** Mark Addis, Peter C. R. Lane, Peter D. Sozou, Fernand Gobet, 2019-09-12

This volume offers selected papers exploring issues arising from scientific discovery in the social sciences. It features a range of disciplines including behavioural sciences, computer science, finance and statistics, with an emphasis on philosophy. The first of the three parts examines methods of social scientific discovery. Chapters investigate the nature of causal analysis, philosophical issues around scale development in behavioural science, research imagination in social scientific practice, and relationships between paradigms of inquiry and scientific fraud. The next part considers the practice of social science discovery. Chapters discuss the lack of genuine scientific discovery in finance, where hypotheses concern the cheapness of securities, the logic of scientific discovery in macroeconomics, and the nature of that what discovery with the Solidarity movement as a case study. The final part covers formalising theories in social science. Chapters analyse the abstract model theory of institutions as a way of representing the structure of scientific theories, the semi-automatic generation of cognitive science theories, and computational process models in the social sciences. The volume offers a unique perspective on scientific discovery in the social sciences. It will engage scholars and students with a multidisciplinary interest in the philosophy of science and social science.

This book is part of a series presenting 84 important discoveries in science that identify or explain parts of the natural world. Volume 2 explores scientific discoveries commencing with the letters D G. Each discovery is explored over a double page spread which covers information on who made the discovery, how the discovery was made, the significance of the discovery, change [The Logic of Scientific Discovery](#) Karl Raimund Popper, 1961 *The Art of Scientific Discovery* George Gore, 1878 **The Art of**

**Scientific Discovery** George Gore, 2015-06-25. Excerpt from *The Art of Scientific Discovery*. Or the General Conditions and Methods of Research in Physics and Chemistry. The object of the following treatise is to describe the nature of original Scientific Research, the chief personal conditions of success in its pursuit, the general methods by which discoveries are made in Physics and Chemistry, and the causes of failure, and thus to elucidate so far as possible the special mental conditions and processes by means of which the mind of man ascends from the known to the unknown in matters of science. Some of the conditions described are such as I have in my own experience found to be necessary, and some of the methods are those I have frequently employed in my own researches. activity and the analysis of scientific reasoning illuminate the processes which give rise to moments of discovery and the complex network of consequences which follow upon such moments. Understanding discovery has not been until recently a major concern of modern philosophy of science. Whether the act of discovery was regarded as mysterious and inexplicable or obvious and in no need of explanation, modern philosophy of science in effect bracketed the question. It concentrated instead on the logic of scientific explanation or on the issues of validation or justification of scientific theories or laws. The recent revival of interest in the context of discovery indeed in the acts of discovery on the part of philosophers and historians of science represents no one particular methodological or philosophical orientation. It proceeds as much from an empiricist and analytical approach as from a sociological or historical one, from considerations of the logic of science as much as from the logical or extralogical contexts of scientific thought and practice. But in general this new interest focuses sharply on the actual historical and contemporary cases of scientific discovery and on an examination of the act or moment of discovery in situ.
