*Music, Authorship, and the Book in the First Century of Print* Kate van Orden, 2013-10-19 What does it mean to author a piece of music What transforms the performance scripts written down by musicians into authored books In this fascinating cultural history of Western music's adaptation to print Kate van Orden looks at how musical authorship first developed through the medium of printing When music printing began in the sixteenth century publication did not always involve the composer printers used the names of famous composers to market books that might include little or none of their music Publishing sacred music could be career building for a composer while some types of popular song proved too light to support a reputation in print no matter how quickly they sold Van Orden addresses the complexities that arose for music and musicians in the burgeoning cultures of print concluding that authoring books of polyphony gained only uneven cultural traction across a century in which composers were still first and foremost performers Studies in the history of book binding Mirjam M. Blok, 2021-10-18 This book gives a detailed account of the most interesting period in the life of the Dutch humanist scholar Isaac Vossius Leiden 1618

Windsor 1689 It is largely based on Vossius's extensive correspondence much of which has never been published before In particular Isaac's correspondence with his father Gerardus Joannes Vossius has been thoroughly investigated and is a prime source of information here Isaac Vossius's travels through England France and Italy followed his formative years at Leiden and Amsterdam during which time he had come under the strong influence of the French scholar Claude Saumaise A narrative account of these travels is given and Vossius's contacts with the various circles of scholars that he encountered are discussed in detail Such contacts allowed him to enter libraries otherwise difficult of access and there he continued his search for manuscripts Vossius's period as a wandering scholar can be said to have been rounded off with the year that he spent in Paris as secretary to Hugo Grotius All this time Vossius was building up his own collection of books and the fruits of these library researches were the philological editions that he began to publish in the four years that followed A new phase of Vossius's life opened in 1648 when Queen Christina of Sweden invited him then still only thirty to come to her court The following six years were the most turbulent in the scholar's life He became the queen's tutor in Greek and also her personal confidant Under Vossius's guidance the queen steeped herself in the study of Plato and the Neoplatonists while the philosophy of Descartes whom she likewise invited to Stockholm seems to have held little interest for her It was while Vossius was at the Swedish court that he finally came into open conflict with Saumaise his former mentor Vossius built up a magnificent library for Christina This collection was however dispersed even before it has been completed though unfortunately not before Vossius's own books had been inadvertently incorporated into that library With the queen's approval Vossius then selected a new collection for himself from the royal library In 1655 Vossius disillusioned withdrew to the quiet of his own study in The Hague Since 1690 his collection of books and manuscripts has been housed in the University Library at Leiden where it forms the basis of the international fame of that institution
