Er T Washington Papers Vol 9 1906 1908:

Du Bois and His Rivals Raymond Wolters, 2002 W E B Du Bois was the preeminent black scholar of his era. He was also a principal founder and for twenty eight years an executive officer of the nation's most effective civil rights organization the National Association for the Advancement of Colored People NAACP. Even though Du Bois was best known for his lifelong stance against racial oppression he represented much more. He condemned the racism of the white world but also criticized African Americans for mistakes of their own. He opposed segregation but had reservations about integration. Today he would be known as a pluralist. In *Du Bois and His Rivals* Raymond Wolters provides a distinctive biography of this great pioneer of the American civil rights movement. Readers are able to follow the outline of Du Bois's life but the book's main emphasis is on discrete scenes in his life especially the controversies that pitted Du Bois against his principal black rivals. He challenged Booker T Washington because he could not abide Washington's conciliatory approach toward powerful whites. At the same time Du Bois's pluralism led him to oppose the leading separatists and integrationists of his day. He berated Marcus Garvey for giving up on America and urging blacks to pursue a separate destiny. He also rejected Walter White's insistence that integration was the best way to promote the advancement of black people. Du Bois felt that American blacks should be full fledged Americans with all the rights of other American citizens. However he believed that they should also preserve and develop enough racial distinctiveness to enable them to maintain and foster a sense of racial identity, community and pride. *Du Bois and His Rivals* shows that Du Bois stood for much more than protest against racial oppression. He was also committed to pluralism and his pluralism emphasized the importance of traditional standards and of internal cooperation within the black community. Anyone interested in the civil rights movement, black history or the history of the United States during the early twentieth century will find this book valuable.

Measurement of Vessels for the Panama Canal Emory Richard Johnson, 1913. A report submitted to the secretary of war including a code of Panama measurement rules and a form of certificate to be issued to vessels measured for Panama canal tonnage. [The Paper Book of the Delta Theta Phi Law Fraternity, International](#), 1988. [Centennial History of the Carnegie Institution of Washington: Volume 1, The Mount Wilson Observatory: Breaking the Code of Cosmic Evolution](#) Allan Sandage, Louis Brown, 2004. Since its foundation in 1904 the Mount Wilson Observatory has been at the centre of the development of astrophysics. Perched atop a mountain wilderness two mammoth solar tower telescopes and the 60 and 100 inch behemoth night time reflectors were all the largest in the world. Research has centred around two main themes the evolution of stars and the development of the universe. This first volume in a series of five histories of the Carnegie Institution describes the people and events the challenges and successes that the Observatory has witnessed. It includes biographical sketches of forty of the most famous Mount Wilson pioneer astronomers working during the first half of the twentieth century. Contemporary photographs illustrate the development and use of some of the innovative instruments that filled the observatory during this time. This story brings
