Charge Transfer Interactions of Biomolecules Michael A. Slifkin, 1971 **Many-Body Effects and Electrostatics in Biomolecules** Qiang Cui, Markus Meuwly, Pengyu Ren, 2016-03-30 As computational hardware continues to develop at a rapid pace quantitative computations are playing an increasingly essential role in the study of biomolecular systems One of the most important challenges that the field faces is to develop the next generation of computational models that strike the proper balance of computational efficiency and Analyzing Biomolecular Interactions by Mass Spectrometry Jeroen Kool, Wilfried M. A. Niessen, 2015-05-04 This monograph reviews all relevant technologies based on mass spectrometry that are used to study or screen biological interactions in general Arranged in three parts the text begins by reviewing techniques nowadays almost considered classical such as affinity chromatography and ultrafiltration as well as the latest techniques The second part focusses on all MS based methods for the study of interactions of proteins with all classes of biomolecules Besides pull down based approaches this section also emphasizes the use of ion mobility MS capture compound approaches chemical proteomics and interactomics The third and final part discusses other important technologies frequently employed in interaction studies such as biosensors and microarrays For pharmaceutical analytical protein environmental and biochemists as well as those working in pharmaceutical and analytical laboratories The Chemistry of Biomolecules Takashi Okano, 2023-09-29 This textbook is for students studying medicine and other biosciences Understanding biochemistry requires basic understanding of organic chemistry The main purpose of this book is therefore to help students to understand biomolecule related organic chemistry Fundamental theories such as the molecular orbital method thermodynamic law frontier orbital theory and molecular interactions which have not been covered in basic organic chemistry textbooks are explored The book also describes the chemistry of important biomolecules such as carbohydrates lipids proteins and nucleic acids as well as discussing organic photochemistry **Modelling of Biomolecular Structures and Mechanisms** A. Pullman, Joshua Jortner, 2012-12-06 Gathering together a number of the best experts in the world the 27th Jerusalem Symposium was devoted to the theme of the modelling of biomolecular structures and mechanisms As a result of recent growth in both importance and audience the papers contained in this volume present a thorough evaluation of the status of the present knowledge in this field The main topics covered by this year's Symposium include nucleic acids and their interactions proteins and their interaction membranes and their interactions enzymatic processes and the pharmacological and medical aspects of these subjects Readers will benefit from the interdisciplinary approach which provides an extensive coverage of both theoretical and experimental advances Biomolecular Crystallography Bernhard Rupp, 2009-10-20 Synthesizing over thirty years of advances into a comprehensive textbook Biomolecular Crystallography describes the fundamentals practices and applications of protein crystallography Illustrated in full color by the author the text describes mathematical and physical concepts in accessible and accurate language Biomolecular Crystallography will be
