He planned several calculating machines but none was built in his lifetime. On his death his youngest son Henry P. Babbage was charged with the task of completing an unfinished volume of papers on the machines which was finally published in 1889 and is reissued here. The papers by a variety of authors were collected from journals including *The Philosophical Magazine*, *The Edinburgh Review* and *Scientific Memoirs*. They relate to the construction and potential application of Charles Babbage's calculating engines, notably the Difference Engine and the more complex Analytical Engine which was to be programmed using punched cards. The book also includes correspondence with members of scientific societies as well as proceedings catalogues and drawings. Included is a complete catalogue of the drawings of the Analytical Engine *Charles Babbage and His Calculating Engines* Philip Morrison, 1971 **Science and Reform** Charles Babbage, 1989-05-18 Charles Babbage was a key figure of a great era of British history. This compilation of his writings, in addition to those of several of his contemporaries, illuminates the work that led to the development of the calculator. Essential reference for anyone interested in the history of computing technology *The Difference Engine* Doron Swade, 2002 Drawing on previously unused archival material, *The Difference Engine* is a tale of both Babbage's nineteenth century quest to build a calculating engine and its twentieth century sequel. For in 1991 Babbage's vision was finally realized, at least in part, by the completion at the Science Museum in London of the first full-sized Babbage engine, finished in time for the 200th anniversary of Babbage's birth. The two quests are mutually illuminating and are recounted here by the then Curator of Computing, Doron Swade, one of the main protagonists of the successful resumption of Babbage's extraordinary work. **BOOK JACKET** **Babbage's Calculating Engines** Henry Prevost Babbage, 1982 **The Works of Charles Babbage Vol 3** Charles Babbage, Martin Campbell-Kelly, 2024-10-28 A set of 11 volumes which contains all the known works of Charles Babbage, who has been described as the pioneer of the computer.
