Deciding Roger Estall, Grant Purdy, 2020-04-03 Deciding by Roger Estall and Grant Purdy This book is intended to help decision makers of all types make even better decisions The central thesis is that whether Deciders realise it or not all decisions are made using what the authors describe as the universal method of decision making The adequacy of each decision therefore depends on how skilfully the method is applied whether Deciders achieve sufficient certainty about the outcomes that will flow from the decision and the contribution made by those outcomes to the organisation s Purpose The authors shun jargon The eight chapters and five appendices of the book include many practical tips with examples and anecdotes from various sectors that explain the universal method Issues such as context assumptions and detecting and responding to change after the decision is made are addressed and there are clear simple diagrams including an easy to follow illustration of the universal method to help the reader grasp the main concepts The authors say that Deciding is a book for thinkers rather than for those seeking a formulaic or procedurally rigid methodology They will have realised their goal they say if Deciding causes readers to reflect on the way they apply the universal method reinforce what they already do well and recognise opportunities to improve The Authors Roger Estall and Grant Purdy who first met in 2003 have similar yet separate 40 year careers as both Deciders and advisers They have each chaired and served on boards and held executive and technical management roles in multiple areas of the public private and not for profit sectors Now based in Sydney and Melbourne respectively their careers have taken them to many parts of the world **Decision Time** Laurence Alison, Neil Shortland, 2021-10-07 Should I change careers Is it time to end my relationship Can I move halfway across the world We have to make choices everyday big and small but it s the life changing ones that often cause us to freeze or react too quickly without thinking What can we do differently Laurence Alison and Neil Shortland have spent over 20 years helping soldiers police officers doctors and other professionals in high stakes environments make tough decisions when lives are on the line In Decision Time they show us how those same decision making techniques apply to everyday life whether that s deciding to take a new job or change career later in life end a relationship move across the world or declaring your undying love for your best friend With tips studies interviews and observations from their training with police officers together with role play scenarios for you to try this book will help you identify and fight off the common enemies of good decision making inertia procrastination and indecision and empower you to make the choices that matter the most Highly accessible and interactive Decision Time will guide you through each step of the decision making process so next time you a find yourself at the crossroads you ll be able to make your way with confidence [The Little Black Book of Decision Making](#) Michael Nicholas, 2017-08-28 The secret to making the right call in an increasingly complex world The decisions we make every day frequently automatic and incredibly fast impact every area of our lives The Little Black Book of Decision Making delves into the cognition behind decision making guiding you through the different ways your mind approaches various scenarios You ll

learn to notice that decision making is a matter of balance between your rational side and your intuition the trick is in honing your intuition to steer you down the right path Pure reasoning cannot provide all of the answers and relying solely on intuition could prove catastrophic in business There must be a balance between the two and the proportions may change with each situation This book helps you quickly pinpoint the right mix of logic and gut feeling and use it to find the best possible solution Balance logic and intuition in your decision making approach Avoid traps set by the mind s inherent bias Understand the cognitive process of decision making Sharpen your professional judgement in any situation Decision making is the primary difference between organisations that lead and those that struggle The Little Black Book of Decision Making helps you uncover errors in thinking before they become errors in judgement

How to Make a Decision Tanya Barad,2018-02-11 In this self development book I will explain the different factors in Decision Making where people often get stuck and suggest how to overcome these Actively thinking through these

factors allows us to take control and be more confident in our decision making This book will look at some of the basic principles of Decision Making such as why and how we make decisions We will explore what kind of learner you are your natural biases and help you personalise your approach to decision making From Chapter 3 each chapter will introduce a factor of Decision Making that I have found crucial to being able to confidently make decisions quickly These include Decision Biases Environment Size Complexity Priority Motivation Satisfaction Level Research and Past Experiences Deadlines Consequences and Risks Feasibility Support Contingency Plans Accountability and Responsibility Stakeholders and Politics Handling a Wrong Decision So have a read see where your bottleneck is and get on making those decisions *New Advances in Intelligent Decision Technologies* Gloria Phillips-Wren, 2009-04-28 IDT Intelligent Decision Technologies seeks an interchange of research on intelligent systems and intelligent technologies which enhance or improve decision making in industry government and academia The focus is interdisciplinary in nature and includes research on all aspects of intelligent decision technologies from fundamental development to the applied system It constitutes a great honor and pleasure for us to publish the works and new research results of scholars from the First KES International Symposium on Intelligent Decision Technologies KES IDT 09 hosted and organized by University of Hyogo in conjunction with KES International Himeji Japan April 2009 The symposium was concerned with theory design development implementation testing and evaluation of intelligent decision systems Its topics included intelligent agents fuzzy logic multi agent systems artificial neural networks genetic algorithms expert systems intelligent decision making support systems information retrieval systems geographic information systems and knowledge management systems These technologies have the potential to support decision making in many areas of management international business finance accounting marketing healthcare military applications production networks traffic management crisis response and human interfaces *The Art of Decision Making* Tim Castle, 2020-03-27 Making good decisions quickly is what marks out truly great leaders from the rest of us Decision making is one of the most sought after skills today but most of us have never been taught but one most of us have never been taught Aged 19 I went off piste snowboarding way before I had the skills or experience to do so and very quickly found myself hurtling towards the edge of a cliff face on sheet ice Within minutes I was literally hanging onto a boulder for dear life with my legs dangling over the precipice Every single decision I made over the next few hours was life or death There were no easy choices Each right decision could be undone by a wrong one and I was very aware of how close I was to death the whole time the cold the wind the fading light the fact no one knew where I was the fact I had no food or water on me That day my brain worked overtime to keep me alive What I learned has actually been a enabled me to approach decisions in all areas of my life with ease In addition to sharing my story with you I will also explore 6 of the best decision making models as well as teach you how to maintain the mindset of a master decision maker After reading this book you ll find making good decisions quick and easy and will no longer waste time stressing over them or avoid stepping up to make them *Fuzzy Decision*

Making in Modeling and Control Joao M. C. Sousa, 2002 Decision making and control are two fields with distinct methods for solving problems and yet they are closely related This book bridges the gap between decision making and control in the field of fuzzy decisions and fuzzy control and discusses various ways in which fuzzy decision making methods can be applied to systems modeling and control Fuzzy decision making is a powerful paradigm for dealing with human expert knowledge when one is designing fuzzy model based controllers The combination of fuzzy decision making and fuzzy control in this book can lead to novel control schemes that improve the existing controllers in various ways The following applications of fuzzy decision making methods for designing control systems are considered OCo Fuzzy decision making for enhancing fuzzy modeling The values of important parameters in fuzzy modeling algorithms are selected by using fuzzy decision making OCo Fuzzy decision making for designing signal based fuzzy controllers The controller mappings and the defuzzification steps can be obtained by decision making methods OCo Fuzzy design and performance specifications in model based control Fuzzy constraints and fuzzy goals are used OCo Design of model based controllers combined with fuzzy decision modules Human operator experience is incorporated for the performance specification in model based control The advantages of bringing together fuzzy control and fuzzy decision making are shown with multiple examples from real and simulated control systems

Decision Science and Technology James Shanteau, Barbara A. Mellers, David A. Schum, 2012-12-06 Decision Science and Technology is a compilation of chapters written in honor of a remarkable man Ward Edwards Among Ward s many contributions are two significant accomplishments either of which would have been enough for a very distinguished career First Ward is the founder of behavioral decision theory This interdisciplinary discipline addresses the question of how people actually confront decisions as opposed to the question of how they should make decisions Second Ward laid the groundwork for sound

normative systems by noticing which tasks humans can do well and which tasks computers should perform This volume organized into five parts reflects those accomplishments and more The book is divided into four sections Behavioral Decision Theory examines theoretical descriptions and empirical findings about human decision making Decision Analysis examines topics in decision analysis Decision in Society explores issues in societal decision making The final section Historical Notes provides some historical perspectives on the development of the decision theory Within these sections major multi disciplinary scholars in decision theory have written chapters exploring some very bold themes in the field as an examination of the book s contents will show The main reason for the health of the Decision Analysis field is its close links between theory and applications that have characterized it over the years In this volume the chapters by Barron and Barrett Fishburn Fryback Keeney Moreno Pericchi and Kadane Howard Phillips Slovic and Gregory Winkler and above all von Winterfeldt focus on those links Decision science originally developed out of concern with real decision problems and applied work such as is represented in this volume will help the field to remain strong

Human-Like Decision Making and Control for Autonomous Driving Peng Hang,Chen Lv,Xinbo Chen,2022-07-25 This book details cutting edge research into human like driving technology utilising game theory to better suit a human and machine hybrid driving environment Covering feature identification and modelling of human driving behaviours the book explains how to design an algorithm for decision making and control of autonomous vehicles in complex scenarios Beginning with a review of current research in the field the book uses this as a springboard from which to present a new theory of human like driving framework for autonomous vehicles Chapters cover system models of decision making and control driving safety riding comfort and travel efficiency Throughout the book game theory is applied to human like decision making enabling the autonomous vehicle and the human driver interaction to be modelled using noncooperative game theory approach It also uses game theory to model collaborative decision making between connected autonomous vehicles This framework enables human like decision making and control of autonomous vehicles which leads to safer and more efficient driving in complicated traffic scenarios The book will be of interest to students and professionals alike in the field of automotive engineering computer engineering and control engineering

Evolutionary Decision Trees in Large-Scale Data Mining Marek Kretowski, 2019-06-05 This book presents a unified framework based on specialized evolutionary algorithms for the global induction of various types of classification and regression trees from data The resulting univariate or oblique trees are significantly smaller than those produced by standard top down methods an aspect that is critical for the interpretation of mined patterns by domain analysts The approach presented here is extremely flexible and can easily be adapted to specific data mining applications e g cost sensitive model trees for financial data or multi test trees for gene expression data The global induction can be efficiently applied to large scale data without the need for extraordinary resources With a simple GPU based acceleration datasets

composed of millions of instances can be mined in minutes In the event that the size of the datasets makes the fastest memory computing impossible the Spark based implementation on computer clusters which offers impressive fault tolerance and scalability potential can be applied

Decision Systems and Nonstochastic Randomness V. I. Ivanenko, 2010-05-17 Decision Systems and Non stochastic Randomness is the first systematic presentation and mathematical formalization including existence theorems of the statistical regularities of non stochastic randomness The results presented in this book extend the capabilities of probability theory by providing mathematical techniques that allow for the description of uncertain events that do not fit standard stochastic models The book demonstrates how non stochastic regularities can be incorporated into decision theory and information theory offering an alternative to the subjective probability approach to uncertainty and the unified approach to the measurement of information This book is intended for statisticians mathematicians engineers economists or other researchers interested in non stochastic modeling and decision theory

Decision-Driven Analytics Bart De Langhe, Stefano Puntoni, 2024-05-14 Companies have more data at their fingertips than ever before Yet studies show that many executives and organizations fail to extract real value from it Challenging the conventional wisdom of data driven decision making marketing professors and behavioral scientists Bart De Langhe and Stefano Puntoni argue that many analytics efforts flounder because data analyses are disconnected from the decisions to be made In their important book they offer a new approach they call decision driven analytics Counterintuitively they argue that the key to making good decisions with data is to start by putting data in the background Drawing from their own research and teaching as well as real world business cases De Langhe and Puntoni offer four pillars of decision driven analytics and guide you around common mistakes that have held back many organizations from using data for impact In Decision Driven Analytics you will learn how to Avoid common pitfalls in data driven decision making Close the gap between managers and decision making on one side and data scientists and data analytics on the other Enhance the impact of data analytics on business outcomes Think without data to make better decisions Prepare for artificial intelligence s impact on data analytics and Evaluate the costs and benefits of decision driven analytics A must read for anyone who wants to harness the power of data for competitive advantage Decision Driven Analytics will equip you with the skills and tools you need to more effectively use data for business outcomes and to make better decisions in today s complex and data rich world
