Algebraic and Logic Programming Jan Grabowski, Pierre Lescanne, Wolfgang Wechler, 2005-07-06 This volume contains the proceedings of the First International Workshop on Algebraic and Logic Programming held in Gaussig German Democratic Republic from November 14 to 18 1988 The workshop was devoted to Algebraic Programming in the sense of programming by algebraic specifications and rewrite rule systems and Logic Programming in the sense of Horn clause specifications and resolution systems This includes combined algebraic logic programming systems mutual relations and mutual implementation of programming paradigms completeness and efficiency considerations in both fields as well as related topics

Algebraic and Logic Programming Helene Kirchner, Giorgio Levi, 1992-08-19 This volume contains the proceedings of the Third International Conference on Algebraic and Logic Programming held in Pisa Italy September 2 4 1992 Like the two previous conferences in Germany in 1988 and France in 1990 the third conference aims at strengthening the connections between algebraic techniques and logic programming On the one hand logic programming has been very successful during the last decades and more and more systems compete in enhancing its expressive power On the other hand concepts like functions equality theory and modularity are particularly well handled in an algebraic framework Common foundations of both approaches have recently been developed and this conference is a forum for people from both areas to exchange ideas results and experiences The book covers the following topics semantics of algebraic and logic programming integration of functional and logic programming term rewriting narrowing and resolution constraint logic programming and theorem proving concurrent features in algebraic and logic programming languages and implementation issues

Algebraic and Logic Programming Michael Hanus, Jan Heering, Karl Meinke, 1997-08-20 This book constitutes the refereed proceedings of the 6th International Conference on Algebraic and Logic Programming ALP 97 and the 3rd International Workshop on Higher Order Algebra Logic and Term Rewriting HOA 97 held jointly in Southampton UK in September 1997 The 18 revised full papers presented in the book were selected from 31 submissions The volume is divided in sections on functional and logic programming higher order methods term rewriting types lambda calculus and theorem proving methods

Programming and Mathematical Method Manfred Broy,2012-12-06 The Summer School in Marktoberdorf 1990 had as its overall theme the development of programs as an activity that can be carried out based on and supported by a mathematical method In particular mathematical methods for the development of programs as parts of distributed systems were included Mathematical programming methods are a very important topic for which a lot of research in recent years has been carried out In the Marktoberdorf Summer School outstanding scientists lectured on mathematical programming methods The lectures centred around logical and functional calculi for the specification refinement verification of programs and program systems Some extremely remarkable examples were given Looking at these examples it becomes clear that proper research and teaching in the area of program methodology should always show its value by being applied at least to small examples or case studies It is one of the problems of computing science that examples and case studies have to be short and small to be

presentable in lectures and papers of moderate size. However, even small examples can tell a lot about the tractability and adequacy of methods, and being able to treat small examples does at least prove that the method can be applied in modest ways. Furthermore, it demonstrates to some extent the notational and calculational overhead of applying formal methods.
