Alienation and Identification Morton A. Kaplan, 1976

Alienation and Identification Austin J. McGrath, 2021

Consider your love for something you believe valuable perhaps a friend or your child Contrast this love with the kind of hate that drug addicts typically have toward their addiction Some philosophers would call your desire for your friend s or child s wellbeing an identified with attitude and the addict s desire for their drug an alien attitude Many use identification and alienation as standards for among other things moral responsibility and autonomy arguing that identifying with an attitude that leads one to act is sufficient or necessary for moral responsibility for and autonomy in that act whereas being alienated from the attitude that leads to action is sufficient or necessary for not being morally responsible for nor autonomous in the act Even non philosophers seem to use alienation and identification often we use them as standards for living our best lives our best lives fit with what we really believe and want that is attitudes we identify with The problem is extant and natural theories of alienation and identification are almost universally recognized as deeply problematic I argue for new theories of both alienation and identification that I also argue solve these problems The first chapter starts with the idea that the concepts of alienation and identification mutually exclude each other If an attitude is alien we cannot think it is identified with and if an attitude is identified with we cannot think it is alien I ask the question which relation between alienation and identification most plausibly secures their mutual exclusivity Beside the answer being interesting it will ensure that our theories of alienation and identification do not allow for the impossible alien identified with attitude and it may help us develop a theory of one from the other for example if alienation were merely not identifying with an attitude then once we have a theory of identification we immediately have one of alienation The relation that I argue most plausibly secures their mutual exclusivity is a certain kind of opposition which allows for neutral attitudes attitudes that we neither identify with nor are alienated from The next chapter begins by explaining certain deep apparently intractable problems for extant and natural theories of alienation Very roughly the main problems are that none of the views can handle cases in which we manipulate you into alienation they all imply that alienation can be the result of manipulation nor can they provide a principled reason why the attitudes they point to as those constituting our alienation are of the right kind are special enough to ground our alienation for example a rejection of another attitude doesn t seem to have any particularly special features allowing it to constitute our alienation with another attitude The view I argue for that I also argue solves these problems is roughly an attitude is alien just when and because the relevant negative attitude toward it makes sense in light of all of our attitudes collectively The rough argument for this view is that an attitude is alien just when and because our rejection of it reflects our view and this happens just when and because the rejection makes sense to us The thesis of the next chapter naturally follows if the first two are right an attitude is identified with just and because the relevant pro attitude toward it makes sense in light of our attitudes collectively For example when you say endorsement of your desire for your friend or child s wellbeing makes

sense in light of your other attitudes collectively when your full actual self rationalizes the endorsement then and only then is your desire identified with Not surprisingly I argue for this view in roughly the same way I argue for the alienation view of the previous paper

Escaping Alienation Warren Frederick Morris,2002 Relying nearly exclusively on Hegel s ontological conception of the authentic self the author seeks to explicate the causes of alienation and offer a method for overcoming it Hegel s idea that human history is the quest through rational freedom towards spirit is advanced as the fundamental truth for overcoming alienation Annotation copyrighted by Book News Inc Portland OR

Somaesthetics of Discomfort: Addressing Identity, Normativity, and Alienation M.D. Tschaepe,2024-12-02 This book is about bodies and discomfort Specifically it is about how to recognize discomfort as a motivating source for critical reflection This book is about how people project their discomfort onto others in harmful ways that alienate and it is also about how those who are alienated may use their discomfort to fight against those harms Based in work from pragmatist feminist antiracist queer and disability studies and informed by lessons from personal narratives and philosophical analysis this book develops somaesthetics of discomfort as it examines interrogates and addresses issues concerning identity normativity and alienation

Alienation Vs. Identification Souran Mardini,2015

Alienation and Theatricality Phoebe von Held,2017-07-05

Alienation Vefremdung is a concept inextricably linked with the name of twentieth century German playwright Bertolt Brecht with modernism the avant garde and Marxist theory However as Phoebe von Held argues in this book alienation as a sociological and aesthetic notionavant la lettre had already surfaced in the thought of eighteenth century French philosopher and writer Denis Diderot This original study destabilizes the conventional understanding of alienation through a reading of *Le Paradoxe sur le comedien* *Le Neveu de Rameau* and other works by Diderot opening up new ways of interpretation and aesthetic practices If alienation constitutes a historical development for the Marxist Brecht for Diderot it defines an existential condition Brecht uses the alienation effect to undermine a form of naturalism based on subjectivity identification and illusion Diderot by contrast plunges the spectator into identification and illusion to produce an aesthetic of theatricality that is profoundly alienating and yet remains anchored in subjectivity

Jansen,Gert Roodt,2014-10-08 This book provides a systematic overview on issues and challenges related to work identity and identification at work in the new South African workplace It shares results and measures of a work identity research project that was conducted in a variety of modern South African workplaces It looks at the concept of work identity in the light of a keen and growing interest in why people are becoming attached to involved in engaged with or committed to their work Still a relatively unexplored concept built on the foundations of different identity theory streams the concept of work identity provides a fundamental reconsideration of explaining engaging behaviours at work Against the backdrop of a changing political and economic landscape and the impact these radical changes had on the South African workplace the main research question of the project was the South African employees question Who am I at work In search of the answer to that question the book explores the impact of South African employees life spheres and life roles on their choice of work related identification foci It further explores how identity work tactics and strategies are being used to develop and define their own work identities resulting in the conceptualisation and development of a work based identity measure Ecological

Democracy Odin Lysaker,2023-12-01 Ecological Democracy offers an original thought provoking and engaging treatment of why and how democracy should be re imagined in reaction to today s ecological crisis The book explains that one need to re imagine both the view on nature and democratic ideals within the same framework in the Anthropocene the present geological epoch of human made instability in the Earth system and its planetary boundaries This book proposes unique and challenging readings of green political theory and its development of ecological democracy in the last four decades The book is the first to offer a systematic and detailed interpretation of the role of critical theory vis vis green political theory through an update regarding current non anthropocentric critical theorists and how they may contribute to the further development of ecological democracy Ecological Democracy builds further on deep ecology ecophenomenology and animism by articulating an ecocentric view on nature which defends an intrinsic moral value of all existence as well as formulating the democratic principle of all ecologically affected parties This book provides a sophisticated convincing and accessible argument for how to re imagine ecological democracy as ecocentrism in practice ecological love To love ecologically means caring for and encountering all existence on the Earth and in the cosmos This book is multi disciplinary and will be of great value to researchers as well as undergraduate and postgraduate students from many disciplines The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **Toward a Feminist Lacanian Left** Alicia Valdés,2022-03-21

While traditional feminist readings on antagonism have pivoted around the sole axis of sex and or gender a broader and

intersectional approach to antagonism is much needed this book offers an innovative feminist and discursive reading on the Lacanian concept of sexual position as a way to problematize the concepts of political antagonism and political subjects Can Lacanian psychoanalysis offer new grounds for feminist politics This discursive mediation of Lacan's work presents a new theoretical framework upon which to articulate proposals for intersectional political theory The first part of this book develops the theoretical framework and the second part applies it to the construction of woman's identity in European politics and economy It concludes with notes for a feminist political and economic praxis through community currencies and municipalism The interdisciplinary approach of this book will appeal to scholars interested in the fields of psychoanalysis feminisms and political philosophy as well as multidisciplinary scholars interested in discourse theory sexuality and gender studies cultural studies queer theory and continental philosophy Students at master's and PhD level will also find this a useful feminist introduction to Lacanian psychoanalysis discourse and gender

Moral Psychology Today David K. Chan, 2008-02-03 Moral Psychology Today David K Chan Philosophers working in the field of moral psychology concern themselves with issues and questions that straddle across more than one sub discipline in philosophy The answers that they propose and the theories that they propound have implications for moral philosophy the philosophy of mind epistemology and metaphysics Philosophers with an interest in the will or the motivational psychology of human action divide between those investigating psychological and behavioral concepts for their own sake and those working on action theory for the sake of answering larger questions especially ethical ones The essays in this volume all of which were presented at a conference on Values Rational Choice and the Will belong largely in the latter category of research The essays here contribute to debates and discussions on a wide range of topics that are of current interest in moral psychology These essays demonstrate both the breadth of the field of moral psychology and the importance of the questions investigated Artificial boundaries between sub disciplines of philosophy are crossed in putting these essays together in the same anthology There are essays here in meta ethics and in normative ethics There are essays in ethical theory and in applied ethics There are essays that draw on discoveries in empirical psychology

New Zionism and the Foreign Policy System of Israel (RLE Israel and Palestine) Ofira Seliktar, 2015-05-22 The invasion of Lebanon was the culmination of an extraordinary change which New Zionism created in Israel's foreign policy system This book first published in 1986 examines how New Zionism came to dominate Israeli politics and it investigates the implications of this new ideology for the future of the Middle East The author agrees that after the creation of the State of Israel the belief system of the evolving society gradually changed After the Six Day War the ideology of Socialist Zionism became increasingly discredited and replaced by the New Zionist quest for Eretz Israel Hardened by the harsh experience of the continuing Arab Israeli conflict and enhanced by the threatening image of the enemy the political culture in Israel became less tolerant and more receptive to the language of New Zionism As a result Begin's Likud came to power in 1977 and quickly changed the whole basis of Israel's foreign policy Instead of the cautious

pragmatism of Socialist Zionism the Begin government pursued the grand design that had enjoyed a long tradition in Revisionist thinking Although General Sharon was responsible for the actual conduct of the war it was the New Zionist propensity to use military force to introduce a new order in the Middle East which was responsible for the invasion The book suggests that it is still too early to assess the full impact of the war in Lebanon on New Zionism Although the war failed to validate any of the grand design tenets of New Zionism the violent Shiite response in Southern Lebanon may serve to strengthen the New Zionist hard line This could hasten the annexation of the occupied territories as the final stage of turning the State of Israel into the Land of Israel

Subjectivity and Otherness Lorenzo Chiesa, 2007-09-28 The evolution of the concept of subjectivity in the works of Jacques Lacan Countering the call by some pro Lacanians for an end to the exegesis of Lacan's work and the dismissal by anti Lacanians of Lacan as impossibly impenetrable Subjectivity and Otherness argues for Lacan as a paradoxically systematic thinker and for the necessity of a close analysis of his texts Lorenzo Chiesa examines from a philosophical perspective the evolution of the concept of subjectivity in Lacan's work carrying out a detailed reading of the Lacanian subject in its necessary relation to otherness according to Lacan's orders of the Imaginary the Symbolic and the Real Chiesa emphasizes the continuity underlying apparently incompatible phases of Lacan's examination of the subject describing Lacan's theory as a consistent philosophical system but one that is constantly revised and therefore problematic Chiesa analyzes each old theory of the subject within the framework of a new elaboration and reassesses its fundamental tenets from the perspective of a general psychoanalytic discourse that becomes increasingly complex From the 1960s on writes Chiesa the Lacanian subject amounts to an irreducible lack that must be actively confronted and assumed this subjectivized lack Chiesa argues further offers an escape from the contemporary impasse between the death of the subject alleged by postmodernism and a return to a traditional substantialist notion of the subject An original treatment of psychoanalytic issues Subjectivity and Otherness fills a significant gap in the existing literature on Lacan taking seriously the need for a philosophical investigation of Lacanian concepts

Character and Identity: Philosophical foundations of political and sociological perspectives Morton A. Kaplan, 1998 Character and Identity Philosophical Foundations of Political and Sociological Perspectives is designed by editor Morton A Kaplan to show despite the fundamental flaws in the classical Greek accounts of truth and knowledge why its quest for rational knowledge remains legitimate and vital to the concepts of character and identity To set the stage Part One includes a statement of the classical Greek position by Dean Jude Dougherty an account of the contemporary anticlassical stories position by John Simpson and an initial attempt to restore the Greek concept of rational inquiry by Lloyd Eby In subsequent chapters Kaplan restates the Greek position and shows why developments in science and philosophy are

incompatible with the Greek concepts of truth and knowledge A brief excursus through the history of philosophy is intended to show how the Greek quest can be pursued in a manner consonant with the contemporary realm of knowledge In the course of this argument it will be shown why Leo Strauss who regarded contemporary philosophy as the prisoner of a mistaken seventeenth century paradigm fatally misconceived the role of seventeenth century philosophy and its relationship to contemporary thought Kaplan argues that contemporary philosophy is in large part a response to the breakdown of Hegel a great attempt to provide a modern alternative to Aristotle's synoptic philosophy an attempt that brings history and historicity into the center of the picture Kaplan shows why postmodernism is based on an incomplete and ultimately incoherent understanding of the consequences of the collapse of the Hegelian system and of the character of language In a version of pragmatism that restores the concept of objective truth Kaplan then explores the political and sociological aspects of this philosophical position and shows how it relates to character and identity He then shows how a weakly ordered but relevant position with respect to ethics and morals is consistent with a sustainable contemporary understanding of the quest for rational objective knowledge

Unconscious Politics R D Hinshelwood, 2024-09-19 The social sciences and psychology see the origins of human experience from opposite directions the inner world of the individual vs demands by society to conform Politicians tend to follow the ideas of the social scientists and mostly ignore unconscious factors Psychoanalysts on the other hand tend to focus on the human unconscious and mostly ignore the complexities of society economics and history Yet both disciplines are rooted in humanity Social forces impact on individuals and society is but the creation of individuals themselves Thus factors from both sources have validity and must impact on each other Hinshelwood has turned to psychoanalysis as the subjective science to balance the attempted objectivity of social sciences The creation of a psychosocial model to bring the sparring disciplines together has been attempted many times on a conceptual level but Hinshelwood starts with a singularly interesting convergence at the level of observation At a time where we face the imminent collapse of human civilisation and possible extinction of the human species it is important we attempt to understand the processes that have led us here We need to find out where the forces of society and the imperatives of our individual selves converge in these particular threats In order to regenerate some real optimism for our future we need psychoanalysis to investigate the unconscious dynamics in where we went wrong A predominant theme identified by Hinshelwood is the gradual long term dehumanisation of humans which has led to widespread alienation from both society and the self This takes place alongside the convergence of the value of money with the value of a person Hinshelwood's use of the psychoanalytic theory of the unconscious mind to investigate humanity society and capitalism brings fresh insight to the intractable fractures we see in our social systems worldwide and hope for change

Inequality, Polarization and Conflict Satya R. Chakravarty, 2015-03-12 This monograph initially offers a systematic

treatment of the theory and methodology of alternative notions of income polarization and related issues It then goes on to analyze social polarization ordinal polarization and the relations between inequality polarization fractionalization and likelihood of conflicts Axiomatic approaches to the measurement of polarization from different perspectives are analyzed rigorously In order to understand the difference between inequality and polarization a discussion on income inequality is also included The American Decisions ,1886
