Chromatographic Fingerprint Analysis of Herbal Medicines Hildebert Wagner, Rudolf Bauer, Dieter Melchart, Pei-Gen Xiao, Anton Staudinger, 2011-11-24. This manual to be published in two volumes provides a condensed overview of the analytical investigation of 80 Chinese Herbal Drugs which are most frequently in use. Thin layer chromatographic, high pressure liquid chromatographic and gas chromatographic fingerprint analytical techniques allow the detection of all main low molecular constituents of a plant drug and even single constituents can be visualized. Analytical results thereof are shown in numerous color figures. The quality proof of the investigation meets the standard of the European Drug Regulatory Authority. Furthermore, this volume gives a detailed description of the analytical methods used for several drugs. Bioactive constituents, pharmacological and biological activities of several single herbal drugs as well as their therapeutic applications are discussed.

Hence it is necessary to have baseline data regarding the use of herbal remedies and to educate future health professionals about various aspects of herbal remedies Stereoselective Synthesis of Drugs and Natural Products Vasyly
