Demissie, 2016-12-05 Colonial architecture and urbanism carved its way through space ordering and classifying the built environment while projecting the authority of European powers across Africa in the name of science and progress The built urban fabric left by colonial powers attests to its lingering impacts in shaping the present and the future trajectory of postcolonial cities in Africa Colonial Architecture and Urbanism explores the intersection between architecture and urbanism as discursive cultural projects in Africa Like other colonial institutions such as the courts police prisons and schools that were crucial in establishing and maintaining political domination colonial architecture and urbanism played a pivotal role in shaping the spatial and social structures of African cities during the 19th and 20th centuries Indeed it is the cultural destination of colonial architecture and urbanism and the connection between them and colonialism that the volume seeks to critically address The contributions drawn from different interdisciplinary fields map the historical processes of colonial architecture and urbanism and bring into sharp focus the dynamic conditions in which colonial states officials architects planners medical doctors and missionaries mutually constructed a hierarchical and exclusionary built environment that served the wider colonial project in Africa **The Politics of Heritage in Africa** Derek R. Radical Pedagogies Beatriz Colomina,Ignacio G. Galán,Evangelos Kotsioris,Anna-Maria

Meister,2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice In the decades after World War II new forms of learning transformed architectural education These radical experiments sought to upend disciplinary foundations and conventional assumptions about the

nature of architecture as much as they challenged modernist and colonial norms decentered building imagined new roles for the architect and envisioned participatory forms of practice Although many of the experimental programs were subsequently abandoned terminated or assimilated they nevertheless helped shape and in some sense define architectural discourse and practice This book explores and documents these radical pedagogies and efforts to defy architecture's status quo The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa a movement to design for every body including the disabled by architecture students and faculty at the University of California Berkeley the founding of a support network for women interested in the built environment regardless of their academic backgrounds and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design Viewed through their dissolution and afterlife as well as through their founding stories these projects from the last century raise provocative questions about architecture's role in the new century [Africa Beyond the Post-Colonial](#)

Alfred B. Zack-Williams, 2017-07-05 Drawing together contributions from academics based in Africa and its diaspora this work is unique in considering the situation and status of Africans globally It explores a broad range of contemporary issues from development and culture to linguistics within the socio political framework of Africa in the 21st century **Building the Ghanaian Nation-State** H. Fuller, 2014-12-10 Ghana has always held a position of primacy in the African political and historical imagination due in no small part to the indelible impression left president Kwame Nkrumah This study examines the symbolic strategies he used to construct the Ghanaian state through currency stamps museums flags and other public icons **Constructing African Art Histories for the Lagoons of C d'Ivoire** Monica Blackmun Visonà, 2017-07-05

Constructing African Art Histories for the Lagoons of C d'Ivoire is an investigation of the methods employed by art historians who study creative production in Africa While providing insights into the rich visual arts of the Lagoon Peoples of southeastern C d'Ivoire this study is one of the few attempts by an Africanist to situate local and regional artistic practices in the context of the global art market and to trace the varied receptions an African art work is given as it leaves a local context and enters an international one Drawing on her three seasons of fieldwork among Akan populations in C d'Ivoire Monica Blackmun Visonà provides a comprehensive account of a major art producing region of Africa and explores such topics as gender roles in performance the role of sculpture in divination and the interchange of arts and ideas across ethnic boundaries The book also addresses issues inherent in research practices such as connoisseurship and participant observation and examines theoretical positions that have had an impact on the discipline of African art history **City Halls and Civic Materialism** Swati Chattopadhyay, Jeremy White, 2014-03-14 The town hall or city hall as a place of local governance is historically related to the founding of cities in medieval Europe As the space of representative civic authority it aimed to set the terms of public space and engagement with the citizenry In subsequent centuries as the idea and built form travelled beyond Europe to become an established institution across the globe the parameters of civic representation

changed and the town hall was forced to negotiate new notions of urbanism and public space City Halls and Civic Materialism Towards a Global History of Urban Public Space utilizes the town hall in its global historical incarnations as bases to probe these changing ideas of urban public space The essays in this volume provide an analysis of the architecture iconography and spatial relations that constitute the town hall to explore its historical ability to accommodate the public in different political and social contexts in Europe Asia Australia Africa and the Americas as the relation between citizens and civic authority had to be revisited with the universal franchise under fascism after the devastation of the world wars decolonization and most recently with the neo liberal restructuring of cities As a global phenomenon the town hall challenges the idea that nationalism imperialism democracy the idea of citizenship concepts that frame the relation between the individual and the body politic travel the globe in modular forms or in predictable trajectories from the West to East North to South Collectively the essays argue that if the town hall has historically been connected with the articulation of bourgeois civil society then the town hall as a global spatial type architectural space urban monument and space of governance holds a mirror to the promise and limits of civil society

Tombs of the Great Leaders Gwendolyn Leick, 2013-11-15 A visit to Ankara Turkey would include a trip to Anitkabir the burial site of Turkey's founder and first president Ataturk The massive stone building houses numerous sculptures and a large ceremonial plaza and is surrounded by an elaborate park Ataturk is far from the only former leader to be remembered by such decorative means Since the beginning of human history societies have built tombs and mausoleums to house the remains of people who changed the course of history These grave sites exist not only as sites of memory for different cultures but also serve the political needs of subsequent regimes Tracing the development of the political burial places since the Bronze Age *tumuli* *Tombs of the Great Leaders* explores what attracts pilgrimages to these sites how politics play out in these locations how they convey meaning and safeguard a person's immortality and how history is commemorated through these structures Looking in depth at tombs built in the twentieth and twenty first centuries Gwendolyn Leick surveys the history of these modern leaders their deaths and the creation of the mausoleums She traverses the globe investigating the memorial sites of Communist leaders such as Lenin Mao Zedong Ho Chi Minh and Kim Il Sung Fascist rulers Franco and Mussolini and founding fathers of new nations including Ziaur Rahman in Dhaka Mohammed Ali Jinnah in Karachi and Sun Yat sen in Nanjing Leick describes the experience of visiting the sites the responses they elicit and the context in which they are viewed today Combining history architecture and travel writing *Tombs of the Great Leaders* is a revealing study of the self perpetuation of politicians despots and dictators alike
