Laboratory Safety for Chemistry Students Robert H. Hill, Jr., David C. Finster, 2016-05-02. Provides knowledge and models of good practice needed by students to work safely in the laboratory as they progress through four years of undergraduate laboratory work. Aligns with the revised safety instruction requirements from the ACS Committee on Professional Training 2015 Guidelines and Evaluation Procedures for Bachelor's Degree Programs. Provides a systematic approach to incorporating safety and health into the chemistry curriculum. Topics are divided into layers of progressively more advanced and appropriate safety issues so that some topics are covered 2-3 times at increasing levels of depth. Develops a strong safety ethic by continuous reinforcement of safety to recognize, assess, and manage laboratory hazards and to plan for response to laboratory emergencies. Covers a thorough exposure to chemical health and safety so that students will have the proper education and training when they enter the workforce or graduate school.

The Saturday Review of Politics, Literature, Science and Art, 1875 **The Saturday Review of Politics, Literature, Science, Art, and Finance**, 1875 Learning Conversations in Museums Gaea Leinhardt, Kevin Crowley, Karen Knutson, 2003-01-30. What do people learn from visiting museums and how do they learn it? The editors approach this question by focusing on conversations as both the process and the outcome of museum learning. People do not come to museums to talk, but they often do talk. This talk can drift from discussions of managing the visit to remembrances of family members and friends not present to close analyses of particular objects or displays. This volume explores how these conversations reflect and change a visitor's identity, discipline-specific knowledge, and engagement with an informal learning environment that has been purposefully constructed by an almost invisible community of designers, planners, and educators. Fitting nicely into a small but rapidly expanding market, this book presents one of the first theoretically grounded sets of studies on museum learning: an explicit presentation of innovative and rich methodologies on learning in museums; information on a variety of museums and subject matter; a study on exhibitions ranging from art to science content; authors from the museum and the academic world; a range of methods from the analysis of diaries written to record museum visits to studies of preservice teachers using pre and post museum visit tests; an examination of visitors ranging from age 4-75 years of age and from known and unknown sample populations; and a lens that examines museum visits in a fine-grained 1-second or big picture week-year-long way.

Performing Knowledge, 1750-1850 Mary Helen Dupree, Sean B. Franzel, 2015-07-31. The period between 1750 and 1850 was a time when knowledge and its modes of transmission were reconsidered and

reworked in fundamental ways Social and political transformations such as the French Revolution and the Industrial Revolution went hand in hand with in new ways of viewing sensing and experiencing what was perceived to be a rapidly changing world This volume brings together a range of essays that explore the performance of knowledge in the period from 1750 to 1850 in the broadest possible sense The essays explore a wide variety of literary theatrical and scientific events staged during this period including scientific demonstrations philosophical lectures theatrical performances stage design botany primers musical publications staged Schiller memorials acoustic performances and literary declamations These events served as vital conduits for the larger process of generating differentiating and circulating knowledge By unpacking the significance of performance and performativity for the creation and circulation of knowledge in Germany during this period the volume makes an important contribution to interdisciplinary German cultural studies performance studies and the history of knowledge
