Knowledge and Social Structure Peter Hamilton, 2014-08-13 The primary concern of this study is to present elucidate and analyse the developments which have characterized the sociology of knowledge and which have set for it the outlines of its major problematics Peter Hamilton examines the most distinctive approaches to the determinate relationship between knowledge and social structure He considers the three main pre paradigms of the sociology of knowledge based on the work of Marx Durkheim and Weber and looks at the contribution of Scheler Mannheim and phenomenological studies to this complex field He explores the intellectual context particularly that of Enlightenment philosophy in which the problems involved in producing a sociology of knowledge first came to light In conclusion the author suggests an inclusive perspective

Social Structure and Forms of Consciousness István Mészáros, 2011 In *The Dialectic of Structure and History Volume Two of Social Structure and Forms of Consciousness* Istvan Meszaros brings the comprehension of our condition and the possibility of emancipatory social action beyond the highest point reached to date Building on the indicatory flashes of conceptual lightning in the Grundrisse and other works of Karl Marx Meszaros sets out the relations of structure and agency individual and society base and superstructure nature and history in a dialectical totality open to the future The project is brought to its conclusion by means of critique an analysis that shows not only the inadequacies of the thought critiqued but at the same time their social historical cause The crucial questions are addressed through critique of the highest point of honest and brilliant thought in capital s ascending phase that of Adam Smith Kant and Hegel as well as the irrationalities and dishonesty of the apologists of the capital system s descending phase such as Hayek and Popper The dead ends of both Levi Strauss s structuralism and post modernism arising from their denial of history are placed in their context as capital apologetics What Meszaros the leading Marxist philosopher of our times has achieved is of world historical importance He has cleared the philosophical ground to permit the illumination of a path to transcend the destructive death spiral of the capital system **Social Structure and Forms of Consciousness, Volume 2** István Mészáros, 2010 This new work by the

leading Marxian philosopher of our day is a milestone in human self understanding It focuses on the location where action emerges from freedom and necessity the foundation of all social science Today as never before the investigation of the close relationship between social structure defined by Marx as arising from the life process of definite individuals and the various forms of consciousness is particularly important We can only perceive what is possible by first identifying the historical process that constrains consciousness itself and therefore social action The relationship between social structure and forms of consciousness discussed in this volume is multifaceted and profoundly dialectical It requires the presentation of a great

wealth of historical material and the assessment of the relevant philosophical literature from Descartes through Hegel and the Liberal tradition to the present together with their connections with political economy and political theory István Mészáros moves beyond both abstract solutions to the surveyed methodological questions and one-sided structuralist evaluation of the important substantive issues bringing the process of our understanding of social structure and consciousness to a level not previously attained Above all in the spirit of the Marxian approach even the most complicated problems are analyzed in relation to the major practical concerns of our time The primary aim of this work is to outline the dialectical intelligibility of historical development toward a viable societal reproductive order Social Structure and Forms of Consciousness is of the highest importance as both a political and philosophical work illuminating the place from where we must act today Publisher's note *Elements of Social Organization* Raymond Firth, 2004 An illuminating introduction to the methods and problems of social anthropology this book draws on a wide range of illustrations including Raymond Firth's own experiences in New Zealand Malaya and the Solomon Islands The concept of social organisation is discussed with special reference to the role of individual choice and decision in social affairs and the nature of social change Social organisation in relation to economic aesthetic moral and religious values is also examined First published in 1951 This re-issue is of the third 1961 edition

Communications & Social Order Pp. Hugh Dalziel Duncan, In this highly influential study of art forms as models for a theory of communications Hugh Dalziel Duncan demonstrates that without understanding of the role of symbols in society social scientists cannot hope to develop adequate models for social analysis He reviews critically major contributions to communication theory during the past century Freud's analysis of dream symbolism Simmel's concept of sociability James' insights into religious experience and Dewey's relating of art to experience Library of Congress Subject Headings Library of Congress, Library of Congress. Art and the Social Order Dilman Walter Gotshalk, 1962 **How to Study Art Worlds** Hans Maanen, 2025-10-01 This necessary and thought provoking study brings together the organisational side of the world of the arts and the understanding of the many functions art fulfills in our culture The author sets out to establish how the organisation of art worlds serves the functioning of the arts in society The book is divided into three sections the first of which presents a comparative study of approaches to the art world as practiced by Dickie Becker Bourdieu Heinich and Luhmann among others The second part focuses on the philosophical debates concerning aesthetic experience Besides Kant scholars such as Gadamer Foster Shustermann Schaeffer and Carroll come to the fore In the third part the author traces the consequences of these theoretical approaches for the organization of art world practices *Constructing a Sociology of the Arts* Vera L. Zolberg, 1990-02-23 At a time when a pile of bricks is displayed in a museum when music is composed for performance underwater and the boundaries between popular and fine art are fluid conventional understandings of art are strained in describing what art is what it includes or excludes whether and how it should be evaluated and what importance should be assigned the arts in

society In this book Vera Zolberg examines diverse theoretical approaches to the study of the arts Ranging over humanistic and social scientific views representing a variety of scholarly traditions American and European she then develops a sociological approach that evaluates the institutional economic and political influences on the creation of art while also affirming the importance of the question of artistic quality The author examines the arts in the social contexts in which they are created and appreciated focusing on the ways in which people become artists the institutions in which their careers develop the supports and pressures they face the publics they need to please and the political forces with which they must contend Particular subjects covered include the process by which works are created and re created at different times with changed meanings and for new social uses the role of the audience in the realization of artistic experiences the social consequences of taste preferences the reasons for change in artistic styles and for the coexistence of many art forms and styles
