Broken Timelines - Book 2: Mesopotamia Jack Stornoway, 2019-04-16 The current conventional Mesopotamian timeline of dynastic Mesopotamia is impossible Believing in it means endorsing the idea the Egyptians lagged thousand years behind the Sumerians technologically during the Middle Kingdom This timeline forces the bronze age Harappan civilization to have existed as recently as 1200 BC even as an iron age civilization had existed on the Ganges since at least 1800 BC It is also not what the ancient Sumerians actually recorded so believing it means believing that modern Assyriologists know more about ancient Sumer than the ancient Sumerians themselves Given that the ancient Sumerians lived through it and all Assyriologists have to go on is random bits of clay tablets and mostly ruined city mounds this seems like an incredible stretch of the imagination The fact is Assyriologists cant and don t need to explain the anachronisms because the Mesopotamian timeline is synchronized with the Egyptian timeline which Egyptologists insist on keeping as short as possible The idea that the ancient Sumerians built their earliest cities in the marshlands of Southern Iraq using stone imported from other countries is entirely illogical they would have simply built them using mud bricks as they did in the later periods As the stone had to have been locally quarried the region could not have been a marshland when the earliest cities built meaning that the oldest levels of Uruk and Eridu must date back to before the region began turning into a marshland circa 9 000 years ago The fact that they switched to using mud bricks simply proves that the water levels rose during the course of Sumerian history flooding their farmlands and ultimately forcing the Mesopotamian cultures to migrate northward to Akkadia Babylonia and Assyria The fact that Assyriologists ignore the ancient Sumerian records of the antediluvian era is probably for the best as they cannot even accept that the 1st Kish Dynasty went back to 25 000 BC even though it has been proven that grains was being farmed in the region at that time Unfortunately the timeline of Egypt and Sumer are the two pillars that ancient history is built around As the early Sumerians were trading with the early Egyptians Assyriologists have been forced to synchronize the Mesopotamian timeline with the preposterous timeline used by Egyptologists While this means that most of Sumerian history is has to be ignored is also effects the timelines of all other Eurasian cultures in contact with the Mesopotamian The Harappan civilization of ancient India was trading with the Sumerians throughout its history and went into decline around the end of the Sumero Akkadian dynastic period which means the entire Harappan civilization is forced to correlate with the short Conventional Mesopotamian Timeline This forced the entire Harappan timeline into a period of 2000 years even though some of the archaeological sites in Pakistan and India have been carbon dated back to over 8000 BC These broken timelines

Of Human Born Caroline Arni, 2024-03-12 A new history of the concept of fetal life in the human sciences At a time when the becoming of a human being in a woman's body has once again become a fraught issue from abortion debates and surrogacy controversies to prenatal diagnoses and assessments of fetal risk *Of Human Born* presents the largely unknown history of how the human sciences came to imagine the unborn in terms of life before birth Caroline Arni shows how these sciences created the concept of fetal life by way of experimenting on animals pregnant women and newborns how they worried about the influence of the expectant mother's living conditions and how they lingered on the question of the beginnings of human subjectivity Such were the concerns of physiologists pediatricians psychologists and psychoanalysts as they advanced the novel discipline of embryology while at the same time grappling with age-old questions about the coming into being of a human person *Of Human Born* thus draws attention to the fundamental way in which modern approaches to the unborn have been intertwined with the configuration of the human in the age of scientific empiricism Arni revises the narrative that the modern embryo is quintessentially an embryo disembedded from the pregnant woman's body On the contrary she argues that the concept of fetal life cannot be separated from its dependency on the maternal organism countering the rhetorical discourses that have fueled the recent rollback of abortion rights in the United States
