environment as he went A teacher for more than 60 years and a figure of immense importance in the field he was central to an expansive network of associations from Frank Lloyd Wright Louis Kahn and Robert Venturi to Robert Stern Harold Bloom and Norman Mailer Scully's extensive body of work coalesced around the core belief that all architecture shapes society and responds above all else to the human need for community and connection This timely appraisal provides a platform for reassessing the legacy of these values as well as raising fresh questions about how we write and think about architecture in the twenty first century

Under Blue Cup Rosalind E. Krauss, 2024-02-06 A personal journey leads a celebrated critic to discover knights of the medium contemporary artists who battle the aesthetic meaninglessness of the post medium condition In Under Blue Cup Rosalind Krauss explores the relation of aesthetic mediums to memory her own memory having been severely tested by a ruptured aneurysm that temporarily washed away much of her short term memory The title Under Blue Cup comes from the legend on a flash card she used as a mnemonic tool during cognitive therapy Krauss emphasizes the medium as a form of remembering contemporary artists in what she terms the post medium condition reject that scaffolding Krauss explains the historical emergence of the post medium condition and describes alternatives to its aesthetic meaninglessness examining works by knights of the medium contemporary artists who extend the life of the specific medium These artists including Ed Ruscha William Kentridge Sophie Calle Harun Farocki Christian Marclay and James Coleman reinstate the recursive rules of a modernist medium by inventing what Krauss terms new technical supports battling the aesthetic meaninglessness of the post medium condition The technical support is an underlying ground for aesthetic practice that supports the work of art as canvas supported oil paint The technical support for Ruscha's fascination with gas stations and parking lots is the automobile for Kentridge the animated film for Calle photojournalism for Coleman a modification of PowerPoint for Marclay synchronous sound Their work Krauss argues recuperates more than a century of modernist practice The work of the post medium condition conceptual art installation and relational aesthetics advances the idea that the white cube of the museum or gallery wall is over Krauss argues that the technical support extends the life of the white cube restoring autonomy and specificity to the work of art

Groat, David Wang, 2013-04-12 ARCHITECTURAL RESEARCH METHODS ARCHITECTURE GENERAL A PRACTICAL GUIDE TO RESEARCH FOR ARCHITECTS AND DESIGNERS NOW UPDATED AND EXPANDED From searching for the best glass to prevent glare to determining how clients might react to the color choice for restaurant walls research is a crucial tool that architects must master in order to effectively address the technical aesthetic and behavioral issues that arise in their work This book's unique coverage of research methods is specifically targeted to help professional designers and researchers better conduct and understand research Part I explores basic research issues and concepts and includes chapters on relating theory to method and design to research Part II gives a comprehensive treatment of specific strategies for investigating built forms In all the book covers seven types of research including historical qualitative correlational experimental simulation

logical argumentation and case studies and mixed methods Features new to this edition include Strategies for investigation practical examples and resources for additional information A look at current trends and innovations in research Coverage of design studio based research that shows how strategies described in the book can be employed in real life A discussion of digital media and online research New and updated examples of research studies A new chapter on the relationship between design and research Architectural Research Methods is an essential reference for architecture students and researchers as well as architects interior designers landscape architects and building product manufacturers **Immaterial Architecture**

Jonathan Hill, 2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill's explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice **Memory & Oblivion** A.W. Reinink, Jeroen Stumpel, 2012-12-06

Memory is a subject that recently has attracted many scholars and readers not only in the general historical sciences but also in the special field of art history However in this book in which more than 130 papers given at the XXIXth International Congress of the History of Art Amsterdam 1996 have been compiled Memory is also juxtaposed to its counterpart Oblivion thus generating extra excitement in the exchange of ideas The papers are presented in eleven sections each of which is devoted to a different aspect of memory and oblivion ranging from purely material aspects of preservation to social phenomena with regard to art collecting from the memory of the art historian to workshop practices from art in antiquity to the newest media from Buddhist iconography to the Berlin Wall The book addresses readers in the field of history history of art and psychology **July**
