Cleary, 2002-01-03 The history of partition in the twentieth century is one steeped in controversy and violence *Literature Partition and the Nation State* offers an extended study of the social and cultural legacies of state division in Ireland and Palestine two regions where the trauma of partition continues to shape political events to this day Focusing on the period since the 1960s when the original partition settlements in each region were challenged by Irish and Palestinian nationalists Joe Cleary's book contains individual chapters on

**Critical Forms** Ross Wilson, 2023 *Critical Forms* is an account of the generic forms in which literary criticism has been undertaken It examines literary criticism from around 1750 to the present and examines prefaces selections and anthologies reviews lectures dialogues letters and life writing *Outposts*, 1994 *Architect Knows Best* Simon Richards, 2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport high rise living and machine inspired aesthetics came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged It was thought that the environmental determinist strand of the discourse was killed off at this time as well This book argues that it was not but on the contrary that it has deepened and diversified Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large By looking at and interviewing major figures and movements of recent years in Britain Europe and America including Leon Krier Peter Eisenman and Jane Jacobs Duany Jane Jacobs Robert Venturi and Denise Scott Brown it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings In doing so the book raises awareness of this strand within the discourse and examines its different purposes and manifestations It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase discusses why it is seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding Richards does not provide any simple solutions but in conclusion is critical of architect planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings

**The Figure of Knowledge** Sebastiaan Loosen, Rajesh Heynicks, Hilde Heynen, 2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar

architectural theory ascribed to **Agenda - An Anthology** William Cookson,1996 Anthology of works previously published in the journal Agenda Science Fiction After 1900 Brooks Landon,2014-05 First published in 2003 Routledge is an imprint of Taylor Francis an informa company *Anthologies of British Poetry* ,2021-11-22 From Tottel s Miscellany 1557 to the last twentieth century Oxford Book of English Verse 1999 anthologies have been a prime institution for the preservation and mediation of poetry The importance of anthologies for creating and re creating the canon of English poetry for introducing new programmes of poetry as a record of changing poetic fashions audience tastes and reading practices or as a profitable literary commodity has often been asserted Despite its impact however the poetry anthology in itself has attracted surprisingly little critical interest in Britain or elsewhere in the English speaking world This volume is the first publication to explore the largely unmapped field of poetry anthologies in Britain Essays written from a wide range of perspectives in literary and cultural studies and the point of view of poets editors publishers and cultural institutions aim to do justice to the typological functional and historical variety with which this form of publication has manifested itself from early modern print culture to the postmodern age of the world wide web Sagetrieb ,1993 **Agenda** William Cookson,1980 *A Language of Contemporary Architecture* Rafael Luna,Dongwoo Yim,2023-05-05 As a way to understand the contemporary project in architecture this book provides an index of ideas theories projects and definitions that string into a methodology for evaluating the contemporary language of architecture described as contemporism through a review of topology form and typology system and elements The contemporary project has been trying to answer the postmodern question of how to move beyond modernism through a thread of architectural styles that tried to respond to deficiencies from the modern promise and contextual changes Yet the question remains should this ongoing struggle to move beyond modernism be a stylistic battle Has the present architectural practice ever left the modernist tendencies and is there a structure for a contemporary language in architecture This book presents a collection of highly illustrated projects that have worked under these parameters to break away from modernism in order to present a holistic integration of topology and typology as a language for contemporism The index is illustrated with individual spreads which can be read sequentially or independently and encourages the reader to make their own connections It also includes interviews and contributions from Toyo Ito Anthony Vidler Ben van Berkel Christian Kerez and Greg Lynn This book is essential reading for undergraduate and graduate students in architecture **Rethinking the Meaning of Place** Lineu Castello,2016-03-23 The spread of newly invented places such as theme parks shopping malls and revamped historic areas necessitates a redefinition of the concept of place from an architectural perspective In this interdisciplinary work these invented places are categorized according to the different phenomenological experiences they are able to provide The book explores how such cloning spaces use placemaking and placemarketing in attempt to replicate the characteristics found in urban spaces traditionally viewed as successful and how these places can affect society s environmental perception A range of international empirical studies illustrates how such

invented places can be perceived as legitimate urban spaces and contribute towards the quality of life in today's cities

**Rationality: The Critical View** J. Agassi, I.C. Jarvie, 2012-12-06 In our papers on the rationality of magic we distinguished for purposes of analysis three levels of rationality. First and lowest rationality<sup>1</sup> the goal directed action of an agent with given aims and circumstances where among his circumstances we included his knowledge and opinions. On this level the magician's treatment of illness by incantation is as rational as any traditional doctor's blood letting or any modern one's use of antibiotics. At the second level rationality<sup>2</sup> we add the element of rational thinking or thinking which obeys some set of explicit rules a level which is not found in magic in general though it is sometimes given to specific details of magical thinking within the magical thought system. It was the late Sir Edward E. Evans Pritchard who observed that when considering magic in detail the magician may be as consistent or critical as anyone else but when considering magic in general or any system of thought in general the magician could not be critical or even comprehend the criticism. Evans Pritchard went even further he was sceptical as to whether it could be done in a truly consistent manner one cannot be critical of one's own system he thought. On this level rationality<sup>2</sup> of discussion we have explained earlier why we preferred Evans Pritchard's view of the magician's capacity for piecemeal rationality to Sir James Frazer's view that magic in general is pseudo rational because it lacks standards of rational thinking. The Oxford Handbook of Classical Chinese Literature (1000 BCE-900 CE) Wiebke Denecke, Wai-yee Li, Xiaofei Tian, 2017 This volume introduces readers to classical Chinese literature from its beginnings ca 10th century BCE to the tenth century BCE through a conceptual framework centered on textual production and transmission. It focuses on recuperating historical perspectives for the period it surveys and attempts to draw connections between the past and present. A Primer on Animal Rights Kim W. Stallwood, 2002 A stirring document on how animals are cruelly mistreated and commercially exploited for profit. The articles lay out the fundamental issues of animal rights. The book contains work by some of the leading authorities on animal protection issues including Jim Mason, Marc Bekoff, Mike Markarian, Betsy Swart, Norm Phelps, Wayne Pacelle, Pat Derby, Gene Bauston, Karen Davis, Richard Schwartz, Don Barnes and many others. All articles are up to date and full of important facts.
