Aggregate Analysis In Chipped Stone:

Aggregate Analysis in Chipped Stone Christopher T. Hall, Mary Lou Larson, 2004 Many methods are now available for analyzing lithic debitage yet no single method is entirely reliable as a vehicle to meaningful interpretation of past behavior Contributors to this volume seek to identify the strengths and weaknesses in the more widespread and competing analytical forms while arguing for the use of multiple lines of evidence

Designing Experimental Research in Archaeology Jeffrey R. Ferguson, 2010-05-15 Designing Experimental Research in Archaeology is a guide for the design of archaeological experiments for both students and scholars Experimental archaeology provides a unique opportunity to corroborate conclusions with multiple trials of repeatable experiments and can provide data otherwise unavailable to archaeologists without damaging sites remains or artifacts Each chapter addresses a particular classification of material culture ceramics stone tools perishable materials composite hunting technology butchering practices and bone tools and experimental zooarchaeology detailing issues that must be considered in the development of experimental archaeology projects and discussing potential pitfalls The experiments follow coherent and consistent research designs and procedures and are placed in a theoretical context and contributors outline methods that will serve as a guide in future experiments This degree of standardization is uncommon in traditional archaeological research but is essential to experimental archaeology The field has long been in need of a guide that focuses on methodology and design This book fills that need not only for undergraduate and graduate students but for any archaeologist looking to begin an experimental research project

Contemporary Lithic Analysis in the Southeast Philip J. Carr, Andrew P. Bradbury, Sarah E. Price, 2012-07-13 Representing work by a mixture of veterans and a new generation of lithic analysts Contemporary Lithic Analysis in the Southeast explores fresh ideas while reworking and pushing the limits of traditional methods and hypotheses The variability in the southeastern lithic landscape over space and through time makes it a dynamic and challenging region for archaeologists Demonstrating a holistic approach and using a variety of methods this volume aims to derive information regarding prehistoric lifeways from lithic assemblages The contributors use data from a wide temporal span and a variety of sites across the Southeast ranging from Texas to South Carolina and from Florida to Kentucky Not merely cautionary tales these case studies demonstrate the necessity of looking beyond the bag of lithic material sitting in the laboratory to address the key questions in the organization of prehistoric lithic technologies How do field collection strategies bias our interpretations What is the relationship between technological strategies and tool design How can inferences regarding social and economic strategies be made from lithic assemblages Contributors William Andrefsky Jr Andrew P Bradbury Philip J Carr Carolyn Conklin D Randall Cooper Jason L Edmonds Jay D Franklin Albert C Goodyear III Joel Hardison Lucinda M Langston D Shane Miller George H Odell Charlotte D Pevny Tara L Potts Sarah E Price Douglas Sain Sarah C Sherwood Ashley M Smallwood Paul Thacker

Archaeological Concepts, Techniques, and Terminology for American Prehistoric Lithic Technology Wm Jack Hranicky, 2013-06-03

Archaeological Concepts Techniques and Terminology for American Prehistory Lithic Technology by Wm Jack Hranicky is a 600 page comprehensive publication that encompasses the study of American prehistoric stone tools and implements It is a look up volume for studying the material culture of prehistoric people and using its concepts and methods for researching this aspect of archaeology There are over 3000 entries which are defined and illustrated It also has an extensive set of references and an overview for the study of stone tools Lithics William Andrefsky, Jr, 2005-12-08 This book is a fully updated and revised edition of William Andrefsky Jr s ground breaking manual on lithic analysis Designed for students and professional archaeologists this highly illustrated book explains the fundamental principles of the measurement recording and analysis of stone tools and stone tool production debris Introducing the reader to lithic raw materials classification terminology and key concepts it comprehensively explores methods and techniques presenting detailed case studies of lithic analysis from around the world It examines new emerging techniques such as the advances being made in lithic debitage analysis and lithic tool analysis and includes a new section on stone tool functional studies An extensive and expanded glossary makes this book an invaluable reference for archaeologists at all levels **From the Yenisei to the Yukon** Ted Goebel, Ian Buvit, 2011-08-25 Who were the first people who came to the land bridge joining northeastern Asia to Alaska and the northwest of North America Where did they come from How did they organize technology especially in the context of settlement behavior During the Pleistocene era the people now known as Beringians dispersed across the varied landscapes of late glacial northeast Asia and northwest North America The twenty chapters gathered in this volume explore in addition to the questions posed above how Beringians adapted in response to climate and environmental changes They share a focus on the significance of the modern human inhabitants of the region By examining and analyzing lithic artifacts geoarchaeological evidence zooarchaeological data and archaeological features these studies offer important interpretations of the variability to be found in the early material culture the first Beringians The scholars contributing to this work consider the region from Lake Baikal in the west to southern British Columbia in the east Through a technological organization approach this volume permits investigation of the evolutionary process of adaptation as well as the historical processes of migration and cultural transmission The result is a closer understanding of how humans adapted to the diverse and unique conditions of the late Pleistocene *Journal of Middle Atlantic Archaeology*, 2004 *Prehistoric Hunter-Gatherers of the High Plains and Rockies* Marcel Kornfeld, George C Frison, Mary Lou Larson, 2016-06-16 A comprehensive revision of the classic prehistory of the North American high plains *Montane Foragers* Mark S. Aldenderfer, 1998 All previous books dealing with prehistoric hunter gatherers in the high Andes have treated ancient mountain populations from a troglodyte s perspective as if they were little different from lowlanders who happened to occupy jagged terrain Early mountain populations have been transformed into generic foragers because the basic nature of high altitude stress and biological adaptation has not been addressed In *Montane Foragers* Mark Aldenderfer builds a unique and penetrating model of

montane foraging that justly shatters this traditional approach to ancient mountain populations Aldenderfer's investigation forms a methodological and theoretical tour de force that elucidates elevational stress what it takes for humans to adjust and survive at high altitudes In a masterful integration of mountain biology and ecology he emphasizes the nature of hunter gatherer adaptations to high mountain environments He carefully documents the cultural history of Asana the first stratified open air site discovered in the highlands of the south central Andes He establishes a number of major occurrences at this revolutionary site including the origins of plant and animal domestication and transitions to food production the growth and packing of forager populations and the advent of some form of complexity and social hierarchy The rich and diversified archaeological record recovered at Asana which spans from 10 000 to 3 500 years ago includes the earliest houses as well as public and ceremonial buildings in the central cordillera Built used and abandoned over many millennia the Asana structures completely transform our understanding of the antiquity and development of native American architecture Aldenderfer's detailed archaeological case study of high elevation foraging adaptation his description of this extreme environment as a viable human habitat and his theoretical model of montane foraging create a new understanding of the lifeways of foraging peoples worldwide

Human Expeditions Stephen Chrisomalis, André Costopoulos, 2013-12-06 In its 2007 obituary of Bruce Trigger 1937-2006 the Times of London referred to the Canadian anthropologist and archaeologist as Canada's leading prehistorian and one of the most influential archaeologists of his time Trained at Yale University and a faculty member at McGill University for more than forty years he was best known for his History of Archaeological Thought which the Times called monumental Trigger inspired scholars all over the world through his questioning of assumptions and his engagement with social and political causes Human Expeditions pays tribute to Trigger's immense legacy by bringing together cutting edge work from internationally recognized and emerging researchers inspired by his example Covering the length and breadth of Trigger's wide ranging interests from Egyptology to the history of archaeological theory to North American aboriginal cultures this volume highlights the diversity of his academic work and the magnitude of his impact in many different areas of scholarship

PaleoAmerican Archaeology in Virginia Wm Jack Hranicky, 2017-10-10 This book is a full color study of over 500 pre Clovis stone artifacts of Virginia With the 22K year date of the Cinmar bipoint in Virginia there is ample evidence of artifact classes that are older than Clovis Over 50 tool types are illustrated and discussed Artifact single site collections are documented The book argues the differences between Holocene biface technology with the blade and core technology of the Pleistocene era The requirements for identifying Pleistocene artifacts is presented such as platforms remaining cortex and invasive retouch They are presented in a tool model Major stones namely jasper are discussed as a lithic determinism The east coast distribution is presented for various tool types Additionally as a major focus cross Atlantic flake blade identical tools from Europe are illustrated with Middle Atlantic artifacts Artifact ergonomics such as right left handed tools hypothetical tool center are argued Structural and functional axis are shown and described on how

to identify them on tools Overall this book presents an initiating view of the archaeology needed to study Pleistocene era artifacts on the American east coast **Toward a Behavioral Ecology of Lithic Technology** Todd A. Surovell, 2012-02-01 Modern humans and their hominid ancestors relied on chipped stone technology for well over two million years and colonized more than 99 percent of the Earth's habitable landmass in doing so Yet there currently exist only a handful of informal models derived from ethnographic observation experiments engineering and common sense to explain variability in archaeological lithic assemblages Because the fundamental processes of making using and discarding stone tools are at root exercises in problem solving Todd Surovell asks what conditions favor certain technological solutions Whether asking if a biface should be made thick or thin or if a flake should be saved or discarded Surovell seeks answers that extend beyond a case by case analysis One avenue for addressing these questions theoretically is formal mathematical modeling Here Surovell constructs a series of models designed to link environmental variability to human decision making as it pertains to lithic technology To test the models Surovell uses data from the analysis of more than 40 000 artifacts from five Rocky Mountain and Northern Plains Folsom and Goshen complex archaeological sites dating to the Younger Dryas stadial ca 12 600 11 500 years BP The primary result is the production of powerful new analytical tools useful to the interpretation of archaeological assemblages Surovell's goal is to promote modeling and explore the general issues governing technological decisions In this light his models can be applied to any context in which stone tools are made and used **High Resolution Archaeology and Neanderthal Behavior** Eudald Carbonell i Roura, 2012-03-13 The aim of this book is to provide a new insight on Neanderthal behaviour using the data recovered in level J of Roman rockshelter north eastern Spain Due to the sedimentary dynamics that formed the Roman deposit the occupation layers are characterized by a high temporal resolution which makes it easier to interpret the archaeological data in behavioural terms In addition the different analytical domains geoarchaeology lithic technology zooarchaeology taphonomy anthracology palaeontology are addressed from a spatial perspective that is basic to understand human behaviour but also to evaluate the behavioural inferences in the framework of the archaeological formation processes *A Companion to Gender Prehistory* Diane Bolger, 2012-09-25 An authoritative guide on gender prehistory for researchers instructors and students in anthropology archaeology and gender studies Provides the most up to date comprehensive coverage of gender archaeology with an exclusive focus on prehistory Offers critical overviews of developments in the archaeology of gender over the last 30 years as well as assessments of current trends and prospects for future research Focuses on recent Third Wave approaches to the study of gender in early human societies challenging heterosexist biases and investigating the interfaces between gender and status age cognition social memory performativity the body and sexuality Features numerous regional and thematic topics authored by established specialists in the field with incisive coverage of gender research in prehistoric and protohistoric cultures of Africa Asia Europe the Americas and the Pacific *Recording Clovis Points- Second Edition* Wm Jack Hranicky, 2010-04 There's no

Neanderthal Lifeways, Subsistence and Technology Nicholas J. Conard, Jürgen Richter, 2011-02-11 The 150th anniversary of the discovery of the famous Neanderthal fossils gave reason for an international and interdisciplinary symposium in Bonn Germany The present book arose from this congress and focuses on multiple aspects of archaeological investigation on Neanderthal lifeways In depth studies of top ranking scientists provide a detailed and comprehensive survey of contemporary research on our Pleistocene relatives Examinations and debates are embedded in a variety of regions and time frames Chronology subsistence land use and cultural adaptations among late Neanderthals form the major trajectories of the book The wide range of approaches involved leads to an increasing understanding of the facets of and the variability of Neanderthal behavioural patterns The present volume is complemented by a paleontologically orientated publication of the same congress edited by Gerd Christian Weniger and Silvana Condemi

The Mountaineer Site Brian N. Andrews, David J. Meltzer, Mark Stiger, 2021-06-07 The Mountaineer Site presents over a decade s worth of archaeological research conducted at Mountaineer a Paleoindian campsite in Colorado s Upper Gunnison Basin Mountaineer is one of the very few extensively excavated long term Folsom occupations with evidence of built structures The site provides a rich record of stone tool manufacture and use as well as architectural features and offers insight into Folsom period adaptive strategies from a time when the region was still in the grip of a waning Ice Age Contributors examine data concerning the structures the duration and repetition of occupations and the nature of the site s artifact assemblages to offer a valuable new perspective on human activity in the Rocky Mountains in the Late Pleistocene Chapters survey the history of fieldwork at the site and compare and explain the various excavation procedures used discuss the geology taphonomic history and geochronology of the site analyze artifacts and other recovered materials examine architectural elements and compare the present and past environments of the Upper Gunnison Basin to gain insight into the setting in which Folsom groups were operating and the resources that were available to them The Folsom archaeological record indicates far greater variability in adaptive behavior than previously recognized in traditional models The Mountaineer Site shows how accounting for reduced mobility more

generalized subsistence patterns and variability in tool manufacture and use allows for a richer and more accurate understanding of Folsom lifeways It will be of great interest to graduate students and archaeologists focusing on Paleoindian archaeology hunter gatherer mobility lithic technological organization and prehistoric households as well as prehistorians anthropologists and social scientists Contributors Richard J Anderson Andrew R Boehm Christy E Briles Katherine A Cross Steven D Emslie Metin I Eren Richard Gunst Kalanka Jayalath Brooke M Morgan Cathy Whitlock
