Subcommittee on Departments of Labor and Health, Education, and Welfare, and Related Agencies Appropriations, 1965 **Culture, Biology, and Sexuality** David N. Suggs, Andrew W. Miracle, 1999 As the anthropological study of sex becomes more focused within the discipline this volume offers a cross section of current research that examines the biological and cultural interface of sexuality Through articles dealing with the difficulties in obtaining observational data and the relationship between biological and cultural influences the contributors seek to understand why anthropology has not been better able to integrate behavioral and ideological approaches Contributions range from methodological concerns such as the proposal for more holistic studies and the problem of relying strictly on people's reports of their sexual behavior to substantive issues such as cultural implications of biological research and how different cultures distinguish between romantic love and erotic sex Integrating a wide range of viewpoints the volume demonstrates that the study of sexuality is becoming more relevant to anthropology and provides a touchstone for scholars confronted with an increasingly bewildering array of approaches to this topic *Developments in*
