Agrarian Question In Socialist Transitions:

The Agrarian Question in Socialist Transitions Ashwani Saith, 2013-10-28 First published in 1986 This collection of eight essays begins with a piece that constructs a preliminary argument concerning the position of the peasantry in the twin transitions the first to industrialisation and the second towards socialism In the poor developing country launching upon both simultaneously the agrarian question bifurcates into two dichotomous sets of issues ~*Theæ agrarian question in socialist transitions* Ashwani Saith, 1985 [Special Issue on the Agrarian Question in Socialist Transitions](#) Ashwani Saith, 1985

Special Issue on the Agrarian Question in Socialist Transitions Ashwani Saith, 1985 **Theorizing Transition** John Pickles, Adrian Smith, 2005-08-31 Examining transformations using a variety of perspectives Theorizing Transition provides both a rich empirical map of the dimensions of post Communism and raises important theoretical issues about how we interpret these changes **The Elgar Companion to Marxist Economics** Ben Fine, Alfredo Saad-Filho, Marco Boffo, 2012-01-01 This Companion takes stock of the trajectory achievements shortcomings and prospects of Marxist political economy It reflects the contributors shared commitment to bringing the methods theories and concepts of Marx himself to bear across a wide range of topics and perspectives and it provides a testimony to the continuing purpose and vitality of Marxist political economy As a whole this volume analyzes Marxist political economy in three areas the critique of mainstream economics in all of its versions the critical presence of Marxist political economy within and its influence upon each of the social science disciplines and cutting across these the analysis of specific topics that straddle disciplinary boundaries Some of the contributions offer an exposition of basic concepts accessible to the general reader laying out Marx s own contribution its significance and subsequent positions and debates with and within Marxist political economy The authors offer assessments of historical developments to and within capitalism and of its current character and prospects Other chapters adopt a mirror image approach of pinpointing the conditions of contemporary capitalism as a way of interrogating the continuing salience of Marxist analysis This volume will inform and inspire a new generation of students and scholars to become familiar with Marxist political economy from an enlightened and unprejudiced position and to use their knowledge as both a resource and gateway to future study **The Rise of Green Extractivism** Natacha Bruna, 2023-03-14 The Rise of Green Extractivism tackles the understudied interconnections between extractivism and climate smart policies and their implications for rural livelihoods both theoretically and empirically This new variation of extractivism arises as an innovative way in which capitalist production and accumulation unfolds and constitutes a convenient analytical tool in today s focus on reducing or compensating for emissions The book consolidates extractivism as a theoretical framework that fully challenges contemporary capitalism s dynamics particularly in the current global environmental crisis It explores new dynamics of accumulation resource grabbing and legitimation strategies These are approached as mechanisms of appropriation of resources that produce social economic and ecological implications to be

considered in the current agrarian question debates By analysing the implementation and outcomes of green policies the author shows that new strategies of capital accumulation arise through the creation of new commodities markets vehicles of accumulation and ways of legitimising capital accumulation A new and greener frontier of accumulation is constituted These emerging processes of commodification bring along new waves of expropriation that further cut into the necessary consumption of rural populations Insights from empirical cases explored in this book show how this new wave of green investments and projects directly linked to climate change concerns are further expropriating livelihoods and fuelling capital accumulation in the name of the fight against climate change This book will be of great interest to students scholars and researchers of political economy globalisation development studies economics political ecology agrarian studies and environmental studies It will also inform and provide policymakers with evidence based insights into their decision making process when designing and implementing climate change mitigation and adaptation policies especially in developing countries
