Overseas Development Institute, Tropical Agriculture Association, 1985 *Agricultural Development in China and Africa* Li Xiaoyun, Qi Gubo, Tang Lixia, Zhao Lixia, Jin Leshan, Guo Zhanfeng, Wu Jin, 2012-05-04 Many African countries are increasingly interested in learning from China s experiences in achieving effective agricultural development The Chinese government and academic community are also keen to share experiences and lessons with Africa China made agriculture one of its development assistance priorities at the Third FOCAC Summit in Beijing in 2006 This systematic comparative study of agricultural development in China and Africa provides a unique basis for African countries and international organizations seeking to understand agricultural development in China and for China to understand agricultural development on the African continent The book highlights experiences and lessons from China and in particular analyzes why Africa has not yet been able to emulate China s agricultural development trajectory It compares the similarities and discrepancies in conditions processes and outcomes between China and Africa from the perspectives of investment science and technology policies and international development aid Based on this it explores which experiences and lessons from China s agriculture development can be shared with African countries in order to contribute to the sustainable improvement and transformation of African agriculture It does not claim that China has all of the answers but while recognizing the diversity within both China and Africa concludes that much can be gained from such a comparison **Drought Disaster and Agricultural Development in India** Tapeshwar Singh, 1995 The Study Is Covered In 7 Chapters Probing Drought Disaster Water Resource Development Identification Of Drought Prone Areas Changing Agricultural Pattern Pattern Of Drought Occurrence Drought Impact

Assessment Drought Disaster Prevention Measures Conclusion Appendices Bibliography Index Economic Costs of Drought and Rice Farmers' Coping Mechanisms ,2007 Water Resources and Agricultural Development in the Tropics Christopher J. Barrow,2016-07-01 First published in 1988 There are many excellent texts on water supply and irrigation engineering irrigation economics agricultural development and the problems which often plague such efforts Few syntheses of such writings have been made despite a clear need for them from people interested in water resources and agricultural development students of geography economics development studies and agricultural management administrators planners and aid agency staff This book attempts to provide a broad interdisciplinary introduction for such people Climate change, drought and agriculture in Small Island Developing States Nisi, N.,Barrett, S.,Addison, S.,Salman, M.,Giusti, S.,Pék, E.,2024-08-05 Changes in agricultural and environmental practices can contribute to the emergence of agricultural drought conditions Unsustainable land use practices such as soil degradation deforestation and the destruction of wetlands can lead to decreased water availability and increased runoff Additionally certain agricultural practices like large scale irrigation and the cultivation of water intensive plant species can further deplete water resources leaving less water available for other purposes and diminishing groundwater levels In Small Island Developing States SIDS such challenges can easily become critical vulnerabilities Their remoteness and sensitive ecosystems enhance their exposure to natural hazards while their limited access to resources and high import costs often leave them with limited opportunities for economic diversification The report a result of the collaboration between FAO and IIED sheds light on the critical challenges of the agriculture sector in SIDS and provides insightful recommendations stemming from the broad consultations carried out in selected countries It identifies key areas for policy interventions and technical approaches and supports stakeholders in defining effective measures for drought risk resilience through improved land and water management **Climate Change and Agricultural Development** Udaya Sekhar Nagothu,2016-07-15 Two of the greatest current challenges are climate change and variability and food security Feeding nine billion people by 2050 will require major efforts aimed at climate change adaptation and mitigation One approach to agriculture has recently been captured by the widely adopted term of Climate Smart Agriculture CSA This book not only explains what this entails but also presents practical on the ground studies of practices and innovations in agriculture across a broader spectrum including agroecology and conservation agriculture in less developed countries It is shown that CSA is not a completely new science and a number of its recommended technologies have been used for some time by local farmers all over the world What is relevant and new is the approach to exploit their adaptation and mitigation potential However a major limitation is the lack of evidence based knowledge that is necessary for policy makers to prepare strategies for adaptation and mitigation This book assembles knowledge of CSA agroecology and conservation agriculture and perspectives from different regions of the world to build resilient food systems The first part analyzes the concept opportunities and challenges and provides a global perspective drawing particularly on studies from

Africa and Asia The second part of the book showcases results from various studies linked to soil water and crop management measures from an ongoing program in India as well as experiences from other regions The third section assesses the needs for an enabling policy environment mainstreaming gender and some final recommendations for up scaling and or out scaling innovations *Integrated Agricultural Development in Drought Prone Areas India*. Task Force on Integrated Rural Development,1973 **Sustainable Agricultural Systems** Edwards,2020-11-25 A unique look at how the adoption of sustainable farming methods is being pursued throughout the world This comprehensive book provides clear insight into research and education needs and the many points of view that come to bear on the issue of sustainability Essential for agricultural leaders in research education conservation policy making and anyone else interested in creating an economically and environmentally sustainable agriculture worldwide **Continuing the Commitment: Agricultural Development in the Sahel August 1986** , *The Intensive Agricultural Development Program in India* Carl Curtis Malone,Sherman Ellsworth Johnson,1971 Enabling pathways for drought finance in agriculture Food and Agriculture Organization of the United Nations,2023-08-30 Although risk based approaches to disaster management are particularly effective the rapid start up of risk financing is hardly conceivable in the case of a drought that has been grossly underfinanced Even if existing resources are spent more effectively the gap far exceeds the active finance flows Creating an enabling environment for the financial sector is the first step to intensifying investments and it must be done by aligning the interest of the involved actors including public and private stakeholders the development and scientific community and the impacted sectors This report provides an in depth analysis of the structural particularities and the status of drought finance It lines up pathways to stimulate the financial environment by proposing innovative strategies in other words enabling pathways It responds to the pressing concern of what innovative instruments and strategies should be used to make drought finance attractive for all sectors The goal is to roll out larger scale programmes to enable drought financing to yield a good return thus supporting the efforts of the global community to build drought resilience through increased finance flows By providing pragmatic steps towards the acceleration of drought finance the publication contributes to several Sustainable Development Goals SDGs including SDGs 1 2 5 6 13 15 and 17 It is in line with the objectives of the FAO Strategic Framework namely it addresses the objective of the Better Production to ensure resilient and sustainable agrifood systems and the objective of the Better Life to promote inclusive economic growth by reducing inequalities The Impact of Drought on Sub-Saharan African Economies Charlotte Benson,Edward J. Clay,1998-01-01 Little effort has been made to research the nonagricultural or economywide macroeconomic impact of droughts in Sub Saharan Africa In an effort to fill the gap this paper reports the findings of an exploratory study of the subject It provides insights into the impact of drought in Sub Saharan Africa in the past and suggests policy options for dealing with future droughts **World Bank Assistance to Agriculture in Sub-Saharan Africa** ,2007-01-01 Sub Saharan Africa is a critical development priority it has some of the

world's poorest countries and during the past two decades the number of poor in the Region has doubled to 300 million more than 40 percent of the Region's population Africa remains behind on most of the Millennium Development Goals MDGs and is unlikely to reach them by 2015 With some of the world's poorest countries Africa is a development priority for the donor community A major drag on Africa's development is the underperformance of the critical agriculture sector which has been neglected both by donors and governments over the past two decades The sector faces a variety of constraints that are particular to agriculture in Africa and make its development a complex challenge Poor governance and conflict in several countries further complicate matters IEG has assessed the development effectiveness of World Bank assistance in addressing constraints to agricultural development in Africa over the period of fiscal 1991-2006
