Subcommittee on Health and the Environment,1988 *The Social Construction of AIDS Issues* Suiming Pan,2022-01-07 This book explores AIDS from a relatively macro perspective rather than concrete operational methods and focuses on the social construction of AIDS issues instead of its transmission level in the context of China First it begins with the theoretical analysis and the social significance of AIDS which is different from the simple conflict between different schools of thought Second it analyses the contest of various social powers in the process of AIDS construction and conclusion rather than making different explanations of policies Last but not least it elaborates on the central proposition i e the AIDS issue is a symbol of China s social restructuring process Only in an effort to advance such a process can we be more likely to find the best problem solving mode rather than clamouring repeatedly or giving countermeasures alone *Job Corps, AIDS, and Mental Health* ,1988

Subcommittee on Health and the Environment,1988 Changing the Course of AIDS David Dickinson,2011-01-15 Changing the Course of AIDS is an in depth evaluation of a new and exciting way to create the kind of much needed behavioral change that could affect the course of the global health crisis of HIV AIDS This case study from the South African HIV AIDS epidemic demonstrates that regular workers serving as peer educators can be as or even more effective agents of behavioral change than experts who lecture about the facts and so called appropriate health care behavior After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities David Dickinson describes the promise of this grassroots intervention workers educating one another in the workplace and community and the limitations of traditional top down strategies Dickinson s book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is We see what it means when workers directly tackle the kinds of sexual gender religious ethnic and broader social and political taboos that make behavior change so difficult particularly when that behavior involves sex and sexuality Dickinson s findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators In this book we see why peer education has so much to offer societies grappling with the HIV AIDS epidemic and why those interested in changing behaviors to ameliorate other health problems like obesity alcoholism and substance abuse have so much to learn from the South African example Public Health Reports ,1996 **Health Services Reports** ,1996 AIDS Issues: Parallel track proposal for clinical drug development; Confidentiality of AIDS information United States. serve older adults and their families The volume s 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging A truly monumental resource this handbook represents the best research on health and aging available to social workers today Worklife ,1988
