HIV positive voicelessness authors do not deny that activists have been vocal but that they continue to be ignored despite their vocality Contributors in Activism and Marginalization in the AIDS Crisis offer numerous examples of institutional control and demonstrate that institutional structures and not activists are controlling the public meaning of HIV related issues Readers learn how messages about HIV AIDS are produced negotiated modified and sustained through institutional mechanisms that serve mostly institutional interests rather than those of the HIV positive In gaining an understanding of these issues readers will begin to learn how to modify and strengthen activist efforts with valuable insight on the lack of HIV positive voices in mainstream news portrayals of HIV AIDS research on constructions of HIV disease at the state government level social constructions and how they affect HIV AIDS policy the political construction of AIDS and interest based struggles the emergent bio politics of HIV and homosexuality in the U S how institutional power works to govern public understanding of HIV disease Institutional structures are defined in this book as groups engaged in and defined by the production of various truths which sustain them Institutional power may be defined as the capacity to regulate constrain and disseminate versions of truth Activism and Marginalization in the AIDS Crisis reveals how HIV activist groups have been outmaneuvered when it comes to the production and dissemination of various truths about HIV AIDS by institutional structures more deeply steeped in social legitimacy and which have a superior capacity for message dissemination HIV AIDS activists HIV positive persons and those with AIDS HIV AIDS educators public and institutional policymakers health professionals and the general public will find this book essential to understanding the social constructions of HIV AIDS how these affect HIV AIDS related policy and public opinion and how to begin to cipher through the plethora of information to find and promote the truth **AIDS**

Subcommittee on Health and the Environment, 1989 **Biomedical Ethics Reviews • 1988** James M. Humber, Robert F. Almeder, 1989-04-06 Biomedical Ethics Reviews is an annual publication designed to review and update the literature on issues of central importance in bioethics today Ordinarily more than one topic is discussed in each volume of Biomedical Ethics Reviews This year however we have decided to devote the entire volume of Biomedical Ethics Reviews 1988 to discussion of one topic namely AIDS The rationale for this decision should be clear AIDS is arguably the most serious public health threat facing our nation today and the character of the disease is such that it creates special problems for ethicists philosophers theologians educators jurists health care professionals and politicians Indeed the questions that AIDS gives rise to are so numerous and complex that no one text could hope to treat them exhaustively Still if it is impossible in anyone text to deal with all of the perplexing difficulties that AIDS generates it nevertheless remains true that each addition to the AIDS literature contributes to our collective knowledge and in so doing brings us one step closer to resolving at least some of the problems associated with the disease We believe that the articles included in the present volume of Biomedical Ethics Reviews serve this purpose admirably and we hope the reader will agree
