Henry Stewart, Alan J. Barnard, Keiichi Ōmura, 2002 **Research Justice** Andrew Jolivet, 2015-07-22 Challenging traditional models for conducting social science research within marginalized populations research justice is a strategic framework and methodological intervention that aims to transform structural inequalities in research This book is the first to offer a close analysis of that framework and present a radical approach to socially just community centered research It is built around a vision of equal political power and legitimacy for different forms of knowledge including the cultural spiritual and experiential with the goal of greater equality in public policies and laws that rely on data and research to produce social change *The Quest for Political Unity in World History* Stanley McCrory Pargellis, 1944 The Opening of Japan, 1853-1855 William McOmie, 2021-11-15 Sub titled A comparative study of the American British Dutch and Russian naval expeditions to compel the Tokugawa shogunate to conclude treaties and open ports to their ships this highly informed and widely researched study provides for the first time a more complete picture of the competition and cooperation distrust and open hostility of the four protagonists involved in this joint Western enterprise In 1852 the news of the US government's plan to send a large naval expedition to Japan to demand the opening of its ports to American ships excited public interest and elicited differing responses among the European powers For Russia Japan was a neighbouring empire to whose ports it had itself long sought access now its jealousy aroused and its own strategic interests seemingly under threat Russia could not permit the United States to possibly exclude it from Japanese ports In the wake of the Opium war the Dutch king had urged the shogun to peacefully open its ports to the other Western powers now the king and his ministers feared that the US expedition would take an overly aggressive approach that might involve the Netherlands in a war with Japan Having previously opened Chinese ports to the West Britain was occupied there and willing to take a wait and see attitude temporarily conceding a leading role to the United States in Japan France had also previously made approaches to Japan and

in case of a successful outcome would not lag far behind in sending its own warships to make arrangements with Japan. Thus the stage was set for the race between America and Russia to open Closed Japan and the surrounding seas while the Netherlands worked quietly behind the scenes and Britain and France waited in the wings. This volume documents in detail the plans and outcomes of each of the four powers' negotiations with Japan, lists the clauses of the resulting treaties and offers a comparative analysis of their merits and demerits. At the same time it provides a fascinating commentary on the way business was done by the Japanese with each country and its representatives.

Less comprehensive and more popularly written than the nine volume Kodansha Encyclopedia of Japan LJ 1 84 this single volume work is nevertheless a valuable reference source. It is extremely current including entries on such recent topics as the Recruit political scandal and current prime minister Kaifu Toshiki. While the articles in the Kodansha Encyclopedia are written by experts in the field and provide bibliographic references with nearly all of the entries the present work is authored entirely by Perkins whom the publisher identifies as an educator specializing in Buddhism and Japanese culture and has only a general bibliography at the end. For its more comprehensive treatment especially of historical topics and traditional culture the Kodansha remains a standard source but for its currency and value as a ready reference tool the Perkins volume will be a useful acquisition for most libraries as well. Its single volume format and lower cost make it an excellent acquisition for smaller libraries.
