Air Sea Rescue:

Air-sea Rescue Great Britain. Air Ministry, Great Britain. Ministry of Information, 1942 Beretter om den engelske eftersgnings og redningstjeneste som den var organiseret under 2 verdenskrig [Air Sea Rescue Bulletin](#), 1944 **The RAF Air Sea Rescue Service, 1918-1986** Jonathan Sutherland, Diane Canwell, 2013-04-14 Between 1918 and 1986 the marine branch of the Royal Air Force provided rescue facilities support and other services to this armed service In its pre 1941 guise as the Air Sea Rescue service the RAF had an inventory of over 200 motorboats supported by float aircraft engaged in rescue towing refueling and servicing RAF aircraft Amongst the many characters of this early period was none other than Lawrence of Arabia **Air Sea Rescue Bulletin** United States Search and Rescue Agency, 1944 *Air Sea Rescue Bulletin* Air Sea Rescue Agency. U. S. Coast Guard, 1944 **The Air Sea Rescue Manual** United States. Search and Rescue Agency, 1945

The RAF Air-Sea Rescue Service in the Second World War Norman Franks, 2016-11-30 When the Second World War began in 1939 it was thought that it would be fought along the same lines as the First World War with the Allied air forces operating from both Britain and France With the fall of Britains Northern European Allies in May 1940 all that changed From then onwards RAF aircraft operating over enemy and enemy held territory necessitated flights across both the North Sea and the English Channel This meant that aircrew in difficulties would be forced to come down in both of these bodies of water Therefore it was essential that some form of rescue service be made available to fish these airman from the water But there were no aircraft in existence at that time that were designed for such a task initially all that could be done was to use land planes to help locate anyone in the water drop a dinghy to them and then guide a boat to their position Obviously a quicker and more reliable means of rescue was needed and this came in the shape of the Supermarine Walrus an amphibian airplane that could land on both sea and land Several Flights of these airplanes were set up around the coast of Britain concentrated mainly around the south and southeast of England The Air Sea Rescue airmen did a magnificent job from 1941 45 rescuing hundreds of downed RAF and USAAF aircrew It took a special type of airman to undertake these rescues and another kind of courage As the war in North Africa developed Walrus aircraft were needed in the Mediterranean and later on either side of the Italian coast Walrus squadrons operated just as successfully in this theater as around Britain Aircrew operating over any stretch of water could always count on the ASR boys coming to their aid This is their story *Air-Sea Rescue in World War Two* Alan Rowe, Andy Andrews, 1995 Beretning om Royal Navy s eftersgnings og redningstjeneste i Nords en og Den engelske Kanal under 2 verdenskrig **The RAF Air Sea Rescue Service, 1918-1986** Jonathan Sutherland, Diane Canwell, 2010 Between 1918 and 1986 the marine branch of the Royal Air Force provided rescue facilities support and other services to this armed service In its pre 1941 guise as the Air Sea Rescue service the RAF had an inventory of over 200 motorboats supported by float aircraft engaged in rescue towing refueling and servicing RAF aircraft Among the many characters of this early period was none other than Lawrence of Arabia The Marine Craft Section itself came into existence in

February 1941 as a direct result of the compelling need to retrieve downed pilots from the sea Initially the craft were lightly armed but as the chivalry between the British and the German rescue services deteriorated the launches became heavily armed craft not only capable of defense but also attack They were supported by a wide variety of aircraft including Lysanders and Walruses The ASR was involved in Dieppe and D Day and operated in the Mediterranean and the Far East During the war years alone over 13 000 aircraft crew were saved by the ASR service in addition to the many hundreds of other servicemen whose vessels had been hit by mines or had fallen prey to submarines

The RAF Air/Sea Rescue Service in the Second World War Norman L. R. Franks,2016 *Call-out* Frederick R. Galea,2002 *Air-Sea Rescue 1941-1952* L. Douglas Keeney,2013-10 World War II arrived at a time when airplanes were scarcely thirty years old Engines were small passenger capacity was limited and only the biggest of the flying boats had the fuel tanks and safety features necessary to cross the oceans But war changed that quickly and within a year bombers and fighters were routinely crossing the Mediterranean the English Channel and most daunting of all the Atlantic and the Pacific Oceans Naturally the odds caught up with them and planes crashed In time hundreds of them were ditching a year and with that came the necessity to develop an air sea rescue service and from that comes this remarkable history of courage willpower and determination The air sea rescue service members faced hard choices and bad odds but they flew each mission determined to save one more pilot one more aircrew and to bring one more man home again Part of the Lost Histories of World War II series this important work includes firsthand accounts unpublished for seventy years *Air Sea Rescue During the Siege of Malta* Bill Jackson,2010-11-01 This important new book is one of few available eyewitness tales about the often overlooked role of the Air Sea Rescue teams during World War II Focussing on High Speed Launch HSL 107 which rescued close to 100 pilots during the siege of Malta this tale of heroism is a historically important personal account by Bill Jackson
