This thought provoking work critically examines the tension between the principles of democracy and the need for effective state intervention in economic development exploring how the Fourth Republic has navigated this complex interplay. Through a comprehensive analysis the book unveils the contradictions inherent in Nigeria's political and economic structure revealing how democratic ideals often clash with the realities of governance policy implementation and economic progress. With empirical evidence and insightful theory the book highlights the challenges and opportunities faced by Nigeria as it seeks to balance the imperatives of democratic accountability with the goals of state led development. This book will be of great benefit to policy makers globally and constitutes an important contribution to the literature on developmental issues. *Trust, Voice, and Incentives* Hana Bixi, Ellen Lust, Michael Woolcock, 2015-05-29 This report examines the role of incentives, trust, and engagement as critical determinants of service delivery performance in MENA countries. Focusing on education and health the report illustrates how the weak external and internal accountability undermines policy implementation and service delivery performance and how such a cycle of poor performance can be counteracted. Case studies of local success reveal the importance of both formal and informal accountability relationships and the role of local leadership in inspiring and institutionalizing incentives toward better service delivery performance. Enhancing services for MENA citizens requires forging a stronger social contract among public servants, citizens, and service providers while empowering communities and local leaders to find best fit solutions. Learning from the variations within countries especially the outstanding local successes can serve as a solid basis for new ideas and inspiration for improving service delivery. Such learning may help the World Bank Group and other donors as well as national and local leaders and civil society in developing ways to enhance the trust, voice, and incentives for service delivery to meet citizens' needs and expectations. *Strengthening Science at the U.S. Environmental Protection Agency--National Research Council (NRC)*
