Economics with Heterogeneous Interacting Agents Alessandro Caiani, Alberto Russo, Antonio Palestrini, Mauro Gallegati, 2016-09-21
This book offers a practical guide to Agent Based economic modeling adopting a learning by doing approach to help the reader master the fundamental tools needed to create and analyze Agent Based models. After providing them with a basic toolkit for Agent Based modeling, it presents and discusses didactic models of real financial and economic systems in detail. While stressing the main features and advantages of the bottom up perspective inherent to this approach, the book also highlights the logic and practical steps that characterize the model building procedure. A detailed description of the underlying codes developed using R and C is also provided. In addition, each didactic model is accompanied by exercises and applications designed to promote active learning on the part of the reader. Following the same approach, the book also presents several complementary tools required for the analysis and validation of the models, such as sensitivity experiments, calibration exercises, economic network and statistical distributions analysis. By the end of the book, the reader will have gained a deeper understanding of the Agent Based methodology and be prepared to use the fundamental techniques required to start developing their own economic models. Accordingly, *Economics with Heterogeneous Interacting Agents* will be of particular interest to graduate and postgraduate students as well as to academic institutions and lecturers interested in including an overview of the AB approach to economic modeling in their courses.

Interreligious Reflections, Six Volume Set Alon Goshen-Gottstein,2018-08-08 This set includes all six volumes of Interreligious Reflections ABOUT VOLUME ONE Friendship is an outcome of as well as a condition for advancing interfaith relations However for friendship to advance there must be legitimation from within and a theory of how interreligious relations can be justified from the resources of different faith traditions Friendship Across Religions explores these very issues seeking to develop a robust theory of interreligious friendship from the resources of each of the participating traditions It also features individual cases as models and precedents for such relations in particular the friendship of Gandhi and Charlie Andrews his closest personal friend Contributors Balwant Singh Dhillon Timothy J Gianotti Alon Goshen Gottstein Maria Reis Habito Ruben L F Habito Ryan McAnnally Linz Stephen Butler Murray Eleanor Nesbitt Anantanand Rambachan Meir Sender Johann M Vento and Miroslav Volf ABOUT VOLUME TWO This book tackles the core problem of how painful historical memories between diverse religious communities continue to impact even poison present day relations Its operative notion is the healing of memory developed by John Paul II Chapters explore how painful memories of yesteryear can be healed and so address some of the root causes

Strategies from six different faith traditions are brought together in what is in some ways a cross religious brainstorming session that identifies tools to improve present day relations At the other pole of the conceptual axis of this book is the notion of hope If memory informs our past hope sets the horizon for our future How does the healing of memory open new horizons for the future And what is the notion of hope in each of our traditions that could lead to a common vision of good Between memory and hope this book seeks to offer a vision of healing that can serve as a resource in contemporary interfaith relations Contributors Rahuldeep Singh Gill Alon Goshen Gottstein Maria Reis Habito Flora A Keshgegian Anantanand Rambachan Meir Sender Muhammad Suheyl Umar and Michael von Br ck ABOUT VOLUME THREE The essays collected here prepared by a think tank of the Elijah Interfaith Academy explore the challenges associated with sharing wisdom learning teachings messages for good living How should religions go about sharing their wisdom These chapters representing six faith tradition Jewish Christian Muslim Hindu Sikh and Buddhist explore what wisdom means in each of these traditions why and how it should be shared internally and externally and the role of love and forgiveness in sharing This book offers a theory that can enrich ongoing encounters between members of faith traditions by suggesting a tradition based practice of sharing wisdom while preserving the integrity of the teaching and respecting the identity of anyone with whom wisdom is shared Contributors Pal Ahluwalia Timothy Gianotti Alon Goshen Gottstein Sallie B King Anantanand Rambachan Meir Sender Miroslav Volf ABOUT VOLUME FOUR All the world s religions are experiencing rapid change due to a confluence of social and economic global forces Factors such as the pervasive intrusion of globalizing political and economic developments polarized and morally equivalent presentations seen in the media and the sense of surety demanded in and promised by a culture dominated by science are some of the factors that have placed extreme pressure on all religious traditions This has stimulated unprecedented responses by religious groups ranging from fundamentalism to the syncretistic search for meaning As religion takes on new forms the balance between individual and community is disrupted and reconfigured Religions often lose the capacity to recall their ultimate purpose or lead their adherents toward it This is the situation we call the crisis of the holy It is a confluence of threats challenges and opportunities for all religions This volume explores the contours of pressures changes and transformations and reflects on how all our religions are changing By identifying commonalities across religions as they respond to these pressures The Crisis of the Holy recommends ways religious traditions might cope with these changes and how they might join forces in doing so Contributors Vincent J Cornell Alon Goshen Gottstein Sidney H Griffith Maria Reis Habito B Barry Levy Deepak Sarma Michael von Br ck ABOUT VOLUME FIVE The chapters collected in this book prepared by a think tank of the Elijah Interfaith Academy address the subject of religious leadership The subject is of broad relevance in the training of religious leaders and in the practice of religious leadership As such it is also germane to religious thought where reflections on religious leadership occupy an important place What does it mean to be a religious leader in today s world To what degree are the challenges that confront religious leadership today the same perennial challenges that

have arrested the attention of the faithful and their leaders for generations and to what degree do we encounter challenges today that are unique to our day and age One dimension is surely unique and that is the very ability to explore these issues from an interreligious perspective and to consider challenges opportunities and strategies across religious traditions Studying the theme across six faith traditions Christianity Islam Judaism Sikhism Hinduism and Buddhism The Future of Religious Leadership World Religions in Conversation recognizes the common challenges to present day religious leadership Contributors Awet Andemicael Timothy J Gianotti Alon Goshen Gottstein Anantanand Rambachan Maria Reis Habito Meir Sendor Balwant Singh Dhillon Miroslav Volf VOLUME SIX One of the biggest challenges for relations between religions is the view of the religious Other The question touches the roots of our theological views The Religious Other Hostility Hospitality and the Hope of Human Flourishing explores the views of multiple religious traditions on how to regard otherness How does one move from hostility to hospitality How can hospitality be understood not simply as social hospitality but as theological hospitality making room for the religious Other on theological grounds What is our vision for the flourishing of the Other while respecting his otherness This volume is an exercise in constructive interreligious theology By including Abrahamic and non Abrahamic traditions it approaches these challenges from multiple perspectives highlighting commonalities in approach and ways in which one tradition might inspire another Contributors Vincent J Cornell Alon Goshen Gottstein Richard P Hayes Lord Rabbi Jonathan Sacks Deepak Sarma Stephen W Sykes Dharma Master Hsin Tao Ashok Vohra The Guru's Guide to Transact-SQL Ken Henderson,2000 A book CD ROM guide to mastering Microsoft Transact SQL and developing the best possible code Some 600 code examples not only illustrate important concepts and best practices but also provide working Transact SQL code that can be incorporated into real world DBMS applications Begins by explaining language fundamentals such as database and table creation then moves on to advanced topics such as OLE automation The CD ROM contains a set of code examples from the book plus a SQL programming environment Henderson is a nationally recognized consultant and leading DBMS practitioner Annotation copyrighted by Book News Inc Portland OR **Gurus, Hired Guns, and Warm Bodies** Stephen R.
