International Handbook of Population Aging Peter Uhlenberg, 2009-04-29 The International Handbook of Population Aging examines research on a wide array of the profound implications of population aging It demonstrates how the world is changing through population aging and how demography is changing in response to it *Fearful Symmetry - The Fall and Rise of Canada's Founding Values* Brian Lee Crowley, 2013-07-27 In the 1960s Canada began a seismic shift away from the core policies and values upon which the country had been built A nation of makers transformed itself into a nation of takers Crowley argues that the time has come for the pendulum to swing back back to a time when Canadians were less willing to rely on the state for support when people went where the work was rather than waiting for the work to come to them Thought provoking meticulously detailed and ultimately polarizing Fearful Symmetry is required reading for anyone who is interested in where this country began where it s been and where it s going *Labor Market Policies in Canada and Latin America: Challenges of the New Millennium* R. Albert Berry, 2013-03-14 Canada and the countries of Latin America are in the midst of major changes and choices in the area of labor markets and related social policy These decisions are likely to have profound consequences for the quality of life of workers throughout the hemisphere Labor Market Policies in Canada and Latin America Challenges of the New Millennium reviews the evidence of Canada and Latin America on three major labor policy instruments unemployment insurance minimum wages and training and on the effects of the payroll taxes which are the main means of funding the unemployment insurance system and other components of social expenditure This is the first

study attempting an in depth comparison of these labor policy instruments between Canada and Latin America The useful juxtaposition of Canadian and Latin American experiences comes at a time when the trend in Canada is to back away from the perhaps overly generous or ineffectively administered elements of the labor legislation social security net and when Latin American countries have undertaken significant reforms of their past systems but require further changes to move toward the sorts of legislation and support systems that characterize developed countries The experiences of Canada and Latin America are mutually relevant since all are small economies forced to adjust to events at the world or hemispheric level and most are inclined to approach policy in an intermediate fashion which falls between the more market oriented American and the more interventionist European models Together with its comparative aspect this volume attempts a more balanced and in depth assessment in each of the policy areas than has hitherto been available The gradually increasing base of available empirical data on the period after the reforms has been used in the studies which provide thorough syntheses of the available research for Canada and Latin America **A Portrait of Seniors in Canada, 2006** Martin Turcotte, Grant

Schellenberg, 2007 Aging of the population is probably one of the most discussed and debated subjects in Canada today

Ethics and Aging James Edward Thornton, Earl Raye Winkler, 2011-11-01 This book is an important and timely look at issues of ethics in aging It reflects the complexity of these questions but develops them in relation to a single general theme that of the involvement of the elderly in the design of social policy and the research which affects them Moral problems involving the elderly are many faceted Accurate understanding and social response demand some integration of experience sensibility and knowledge provided by different perspectives Ethics and Aging incorporates viewpoints from gerontology philosophy law theology sociology psychology medicine nursing and economics
