*Aging Into the 21st Century* Lissy F. Jarvik, Helene Kratz, 1978     [Demographic and Socioeconomic Aspects of Aging in the United States](#) Jacob S. Siegel, Maria Davidson, 1984 Brings together and analyzes data on selected topics related to the demographic and socioeconomic characteristics of the older population in the United States. The report covers for older persons age, sex and race, geographic distribution and residential mobility.

*A History of Denmark from the Viking Age to the 21st Century* Mary Hilson, Bjørn Poulsen, Thorsten Borring Olesen, 2023-11-30 Beginning with the emergence of a Danish kingdom during the Viking Age, this book provides an introduction to the history of Denmark as a political entity from the eighth century to the present day. It shows how what we know as Denmark has evolved from Cnut the Great's North Sea empire in the eleventh century through disintegration and civil war in the Middle Ages, the Kalmar Union of 1397–1523 and the establishment of the absolutist state and its overseas colonies in the seventeenth century to the emergence of the modern nation state during the nineteenth century. The book also deals with significant developments in the economic, social and cultural history of Denmark and sheds light on complex problems such as the country's relationship with its Nordic neighbours, the origins of the current border with Germany and the historical development of the Danish welfare state.

*Rural Aging in 21st Century America* Nina Glasgow, E. Helen Berry, 2012-12-14 This book investigates sociological, demographic and geographic aspects of aging in rural and nonmetropolitan areas of the United States. Population aging is one of the most important trends of the 20th and 21st centuries and it is occurring worldwide, especially in more developed countries such as the United States. Population aging is more rapid in rural than urban areas of the U.S. In 2010, 15 percent of the nonmetropolitan compared to 12 percent of the metropolitan population were 65 years of age and older. By definition, rural communities have smaller sized populations and more limited healthcare, transportation and other aging relevant services than do urban areas. It is thus especially important to study and understand aging in rural environments. *Rural Aging in 21st Century America* contributes evidence based policy relevant information on rural aging in the U.S. A primary objective of the book is to improve understanding of what makes the experience of rural aging different from aging in urban areas and to increase understanding of the aged change the nature of rural places. The book addresses unique features of rural aging across economic, racial, ethnic migration and other structures and patterns all with a focus on debunking myths about rural aging and to emphasize opportunities and challenges that rural places and older people experience.

[The Essential Guide to Aging in the Twenty-first Century](#) Donald H. Kausler, Barry C. Kausler, Jill A. Krupsaw, 2007 This third edition of *The Graying of America* has been retitled, revised and expanded. In concise, nontechnical language, it offers middle-aged and senior readers useful information on the effects of aging on health, the mind and behavior. Provided by publisher.

*A Generation of Change* Jacob S. Siegel, 1993-02-18 *A Generation of Change* is an exceptional study of the nation's elderly, a population that

has undergone profound changes in the years since World War II As modern medicine extends the average life span and the baby boom generation begins to approach middle age the number of older Americans is expected to more than double in the next century Currently 75 percent of U S health care expenditures go toward the elderly But as national trends toward early retirement and low birthrate continue an aging American population could face crises in meeting their financial and physical needs According to Jacob S Siegel in A Generation of Change astute public planning must be informed by an understanding of the demographic social and economic characteristics of the older population as it is today and as it will be in the coming years Siegel employs census and survey data from 1950 through the mid 1980s to describe a population constantly shifting in its ethnic and gender composition geographic distribution marital and living arrangements health employment and economic status Surprisingly there is tremendous disparity in the quality of life among the elderly Although their average poverty rate is below that of the general population there are dramatic levels of poverty among older women who are far more likely than men to live alone or in institutions As the elderly progress from the young old to the aged old those over 85 sharp differences emerge as income and employment decrease and degrees of chronic illness increase In addition residential location influences the quality of health care and public assistance available to the elderly an effect that may account for the marked migration of older people to Florida and Arizona Siegel analyzes the full range of characteristics for this heterogenous population and through comparisons with other age groups as well as with the elderly of the previous decades portrays the crucial influence of social and economic conditions over the life course on the quality of later life With our elderly population growing more numerous and long lived accurate information about them is increasingly essential A Generation of Change will serve as a valuable resource for policymakers seeking more effective solutions in critical areas such as housing long term health care and the funding of Social Security and retirement programs A Volume in the Russell Sage Foundation Census Series

**Teaching English** Yogendra Butt,2024-12-15 Teaching English Linguistics and Literature Combined explores the inextricable link between literature and language Despite being treated as separate subjects in traditional Nigerian secondary schools literature and English are deeply interconnected This book highlights the need to merge these disciplines to enhance students understanding and proficiency We examine how literary teachers often focus on the socio

cultural economic and religious meanings of texts while linguistic elements receive less attention This imbalance can lead to students excelling in literary analysis but struggling with English language skills Our book argues for a symbiotic relationship between literature and language suggesting integrated teaching approaches to improve education and learning outcomes Through practical suggestions we aim to address the poor academic performance observed at secondary and tertiary levels in Nigeria By fostering a comprehensive understanding of both literature and language students can achieve greater proficiency and success

*Globalism in the Middle Ages and the Early Modern Age*

Albrecht Classen,2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual

debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable
