Reform and Development of Agriculture in China Zhou Li, 2017-02-09 This book provides a detailed review of the accumulated experience and lessons from China s agricultural reform and opening up since the late 1970s examining various aspects of this transition and providing a new perspective that can contribute to developing economic theories The success of China s reform and opening up creates benefits for farmers and is driven by farmers The past experience problems revealed and lessons learned from failures of market orientated and progressive reform can provide valuable guidance for those developing countries still lagging behind China

Agricultural Reform in China Simon Powell, 1992

Agricultural Reform in China Yiping Huang, 1998-01-13 Chinese agriculture has experienced some radical changes over the past twenty years Following the

successful introduction of the household production system in the early 1980s difficulties were encountered in establishing a unified domestic agricultural market in the later 1980s and 1990s Through a comprehensive analysis of the changes in the Chinese agricultural institutions between the late 1970s and the mid 1990s this study attempts to provide some answers to the main questions presently facing the agricultural sector It focuses on the key elements of the pre reform agricultural institutions reviews the ways these institutions were refashioned and assesses the resulting changes in agricultural development The implications of different policy choices are carefully considered with the assistance of a computable general equilibrium model The author argues that China should push forward with its market oriented reform measures and introduce the rigours of international competition into the agricultural sector

China's Rural-Urban Inequality in the Countryside Yan Gao, Shailaja Fennell, 2018-03-15 This book approaches the issue of rural urban inequality through fieldwork conducted in a specific township Zuogang in Qinggang County part of Heilongjiang Province in northeastern China Presenting painstaking fieldwork in a single location it successfully illuminates fundamental aspects of the reality and the complexity of rural urban inequality that cannot be found in macro level studies most of which are prepared by economists The book offers a unique combination of rigorous economic analysis with insightful social and anthropological analysis as well as revealing interviews with local government officials This approach provides a rich tapestry of rural perceptions of rural urban inequality With in depth analysis and empirical evidence on questions concerning the development and root causes of urban rural disparities the book significantly enriches our understanding of the widely discussed issue of rural urban income inequality but from the unique perspective of rural China

Farmland, Farming and Food in the National Economy of China, 1947 - 2020 Jane Du, 2024-11-29 This book presents a concise yet detailed analysis of China's agricultural economy and food security in historical perspective The book begins with an overview of China's socialist economic transition and Deng Xiaoping's reforms with an emphasis on

agricultural economy and food production before discussing China's food industry and security in more recent years. Combining accessible qualitative interpretations with a rich data set, the author analyses the transitions and evolving policies in China's agricultural production and shows how these are essential for understanding contemporary food security challenges in the country. Covering topics including food imports and supply, dietary changes, international trade policies, and other geopolitical factors impacting food security, the book presents new insights into the interplay between domestic and international systems. Bridging gaps between historical understanding and contemporary policy relevance, this book will be useful reading for researchers in varied disciplines including economic history, agricultural economics, China's economy, and economic development.

How Reform Worked in China Yingyi Qian, 2017-11-24. A noted Chinese economist examines the mechanisms behind China's economic reforms, arguing that universal principles and specific implementations are equally important. As China has transformed itself from a centrally planned economy to a market economy, economists have tried to understand and interpret the success of Chinese reform. As the Chinese economist Yingyi Qian explains, there are two schools of thought on Chinese reform: the School of Universal Principles, which ascribes China's successful reform to the workings of the free market, and the School of Chinese Characteristics, which holds that China's reform is successful precisely because it did not follow the economics of the market but instead relied on the government. In this book, Qian offers a third perspective, taking certain elements from each school of thought but emphasizing not why reform worked but how it did. Economics is a science, but economic reform is applied science and engineering. To a practitioner, it is more useful to find a feasible reform path than the theoretically best way. The key to understanding how reform has worked in China, Qian argues, is to consider the way reform designs respond to initial historical conditions and contemporary constraints. Qian examines the role of transitional institutions, not best practice institutions, but incentive-compatible institutions in Chinese reform: the dual-track approach to market liberalization, the ownership of firms, viewed both theoretically and empirically, government decentralization, offering and testing hypotheses about its link to local economic development, and the specific historical conditions of China's regional-based central planning.

Food Security and Farm Land Protection in China Yushi Mao, Nong Zhao, Xiaojing Yang, 2012-12-31. News. Mao Yushi, one of China's most outspoken and influential activists for individual rights and free markets, has been named the 2012 winner of the Cato Institute's Milton Friedman Prize for Advancing Liberty. The objective of publishing this book is to let the general public have a better understanding of the food security situation in China and better comprehension of the merit of allocating land through market mechanism. In addition, it makes the public aware of the inefficiencies of current government-regulated

land system As a populous country in the world China emphasizes too much importance of food to ensure people's sufficient consumption There is a national policy to protect farm land farm land protection refers to 18 hundred million mu of farmland which is specifically designated for food production only Unirule defined the national food security as the capability to solve food shortages and calculated the gap between food supply and demand Two approaches can be used to solve the above food gap Food security problems will not happen under situations of free trade and factors substitution in market economy substantial storage and foreign exchange income In modern China food insecurity or great famine only happened in planned economy To link tightly farm land size and grain yield and even food security is baseless both in theory and practices The previous red line of 21 hundred million mu was already broken through The current red line of 18 hundred million mu will also be broken through in view of the process of industrialization and urbanization In fact farm land protection should focus on protecting the employment right of peasant in land
