**Principles of Terrestrial Ecosystem Ecology** F Stuart Chapin III, Pamela A. Matson, Harold A. Mooney, 2006-04-10 Human activities are affecting the global environment in myriad ways with numerous direct and indirect effects on ecosystems The climate and atmospheric composition of Earth are changing rapidly Humans have directly modified half of the ice free terrestrial surface and use 40% of terrestrial production Our actions are causing the sixth major extinction event in the history of life on

Earth and are radically modifying the interactions among forests, rivers, streams and oceans. This book was written to provide a conceptual basis for understanding terrestrial ecosystem processes and their sensitivity to environmental and biotic changes. We believe that an understanding of how ecosystems operate and change must underlie our analysis of both the consequences and the mitigation of human caused changes. This book is intended to introduce the science of ecosystem ecology to advanced undergraduate students, beginning graduate students and practicing scientists from a wide array of disciplines. We also provide access to some of the rapidly expanding literature in the many disciplines that contribute to ecosystem understanding.

Captain Scott: Icy Deceits and Untold Realities Krzysztof Sienicki, 2016-11-01. This expertly written book is nothing less than a daring challenge to the prevailing views of Captain Robert F. Scott's journey to the South Pole and consequent disaster. Borrowing from various scientific disciplines, Krzysztof Sienicki lucidly argues against each of the presumed causes of Captain Scott and his companions' deaths. In particular, he demolishes the notions of extreme low temperatures, ferocious winds and food/fuel shortages as the main causes of the disaster. Using neural network computer simulations, he proves that the Extreme Cold, Snap, Never-Ending Gale and food/fuel scarcity never occurred. By eliminating the alleged causes of the disaster, the author provides data and arguments that the deaths of Scott, Wilson and Bowers were a matter of choice rather than fate. The choice was made long before there was an actual end of food/fuel and long before the end of the physical strength needed to reach delusive salvation at One Ton Depot.
