Thies, 2024 The Oxford Handbook of Foreign Policy Analysis provides an inclusive and forward looking assessment of this subfield Edited and written by a team of word class scholars it sets the agenda for future research in FPA and in IR **Governing the Poor** Suzan Ilcan, Anita Lacey, 2011 Why have billions of dollars in aid failed to end poverty *International Intervention and State-making* Selver B.

Sahin, 2015-07-16 This book analyses the changing dynamics of sovereignty resulting from contemporary international state building interventions It aims to highlight how the exercise of exceptional forms of power by intervening agencies impacts on the sovereign capacity of intervened states Drawing upon in depth analyses of three case studies Kosovo East Timor and the Kurdistan Regional Government the book shifts the focus of the debate to the nature of contemporary intervention as an act of statemaking and argues that foreign intervention changes the dynamics of political power upon which sovereignty is structured At the same time it reveals how intervention reproduces the imposed conditions of international state making thus permanently internalising external regulatory mechanisms International intervention in other words becomes the constitutive element of governance in the newly created state This book will be of much interest to students of statebuilding war and conflict studies global governance security studies and IR *Adventures in Aidland* David Mosse, 2011-04-01

Anthropological interest in new subjects of research and contemporary knowledge practices has turned ethnographic attention to a wide ranging variety of professional fields Among these the encounter with international development has perhaps been longer and more intimate than any of the others Anthropologists have drawn critical attention to the interfaces and social effects of development s discursive regimes but oddly enough have paid scant attention to knowledge producers themselves despite anthropologists being among them This is the focus of this volume It concerns the construction and transmission of knowledge about global poverty and its reduction but is equally interested in the social life of development professionals in the capacity of ideas to mediate relationships in networks of experts and communities of aid workers and in the dilemmas of maintaining professional identities Going well beyond obsolete debates about pure and applied anthropology

the book examines the transformations that occur as social scientific concepts and practices cross and re cross the boundary between anthropological and policy making knowledge International Aid, Administrative Reform and the Politics of EU Accession Artan Karini, 2018-09-11 This book provides a detailed analysis of the dimensions and dynamics of the role of international aid in the reform and capacity development of public service in post communist Albania It challenges the technocratic results based management frameworks used by aid organizations and reports of official donors operating in the country context and offers a qualitative and critical assessment of the role of aid in administrative reform and capacity building Secondly the book highlights the specificity of the national politico administrative context and its ability to modify the process of policy transfer from aid organizations to the Albanian bureaucracy In doing so it illustrates the domestic challenges in the transfer process towards policy learning and makes a valuable contribution to the debate over the voluntary vs coercive administrative reform in Southeast Europe in relation to the politics of EU accession **The Project in**

International Development Caitlin Scott, 2023-06-26 The project has become fundamental to international development and humanitarian practice playing a key role in defining objectives funding streams and ultimately determining what success looks like This book provides a much needed overview of the project in international development practice guiding the reader through the latest theoretical debates and exploring the core tools and stages of planning and design The book starts with an overview of the role of the project through development history before taking the reader through the stages of a standard project management cycle Each chapter introduces the stage the most common tools used to support that phase of planning and the critical debates that exist around it with examples to illustrate discussions from around the world and a range of development fields The book explores the challenges to working effectively in contemporary aid contexts including the role of politics and the pressures wrought by the demands to demonstrate quantified results Throughout the book argues for the need to see the project as a form of governmentality that arranges resources and people in time and space and that extends neoliberal forms of managerial control in the sector Ending with suggestions for innovation this book is perfect for anyone looking for an accessible and engaging guide to the international development project whether student researcher or practitioner **Development Discourse and Global History** Aram Ziai, 2015-08-27 The manner in which people have been talking and writing about development and the rules according to which they have done so have evolved over time

Development Discourse and Global History uses the archaeological and genealogical methods of Michel Foucault to trace the origins of development discourse back to late colonialism and notes the significant discontinuities that led to the establishment of a new discourse and its accompanying industry This book goes on to describe the contestations appropriations and transformations of the concept It shows how some of the trends in development discourse since the crisis of the 1980s the emphasis on participation and ownership sustainable development and free markets are incompatible with the original rules and thus lead to serious contradictions The Eurocentric authoritarian and depoliticizing elements in

development discourse are uncovered whilst still recognizing its progressive appropriations The author concludes by analysing the old and new features of development discourse which can be found in the debate on Sustainable Development Goals and discussing the contribution of discourse analysis to development studies This book is aimed at researchers and students in development studies global history and discourse analysis as well as an interdisciplinary audience from international relations political science sociology geography anthropology language and literary studies The Open Access version of this book available at <http://www.taylorfrancis.com/books/9781315753782> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Rethinking Biomedicine and Governance in Africa P. Wenzel Geißler, Richard Rottenburg, Julia Zenker, 2014-03-15 In the domain of health the relation between bodies citizenship nations and governments has changed beyond recognition over the past four decades especially in Africa In many regions populations are now faced with a total lack of medical care and the disciplinary regimes of modernity are faint memories In this situation new critical insights beyond the critique of old modernization and the disciplinary regimes of imperial times are needed How can we keep up our sophisticated criticism of knowledge regimes and our doubts with regard to narratives of development when so many people in Africa are dreaming about modernity and are envisioning their own renaissance

National Ownership and Security Sector Reform in Mali Karoline Eickhoff, 2020-01-22 Karoline Eickhoff provides an in depth analysis of the role that national ownership as a key policy principle of international development and peacebuilding plays in shaping the discourses and practices of external interventions in the context of the peace process in Mali Engaging critically with the day to day work experience and perceptions of practitioners working on supporting the reform of the Malian security sector in 2015-2016 the author explores how external actors make sense of an abstract policy model vis-à-vis other organisational demands and constraints arising at the field level This book concludes with policy recommendations on how the gap between ownership policy and external actors field level practices can be addressed

In the Shadow of Good Governance Gerhard Anders, 2009-10-26 In the Shadow of Good Governance traces the implementation of the good governance agenda in Malawi from the loan documents signed by the representatives of the government and the Bretton Woods institutions to the individual experiences of civil servants who responded in unforeseen ways to the reform measures Ethnographic evidence gathered in government offices neighbourhoods and the private homes of civil servants living in Malawi's urban and peri-urban areas undermines the common perception of a disconnect between state institutions and society in Africa Instead the book presents a comprehensive analysis of civil servants' attempts to negotiate the effects of civil service reform and economic crisis at the turn of the 21st century

The New Development Management Sadhvi Dar, Professor Bill Cooke, 2013-07-18 Development management is an idea that blends the seemingly innocuous claims of managerialism with notions of modernity and utopian ideals of third world progress This book views both phenomena as problematic and modernizing interventions In doing so it overturns and reclaims such ideas as participation

community governance NGOs and civil society The contributors argue that the practices of development are often threaded together by the language of managerialism reports logframe encounters with the boss yet all of these serve to further development's disengagement from the mundane In voicing such concerns about the way development is going and about the encroachment of managerialism The New Development Management will breathe fresh life into post development debates

The Oxford Handbook of Governance and Limited Statehood Thomas Risse,Tanja A. Börzel,Anke Draude,2018 Unpacking the major debates this Oxford Handbook brings together leading authors of the field to provide a state of the art guide to governance in areas of limited statehood where state authorities lack the capacity to implement and enforce central decision and or to uphold the monopoly over the means of violence While areas of limited statehood can be found everywhere not just in the global South they are neither ungoverned nor ungovernable Rather a variety of actors maintain public order and safety as well as provide public goods and services While external state governors and their interventions in the global South have received special scholarly attention various non state actors from NGOs to business to violent armed groups have emerged that also engage in governance This evidence holds for diverse policy fields and historical cases The Handbook gives a comprehensive picture of the varieties of governance in areas of limited statehood from interdisciplinary perspectives including political science geography history law and economics 29 chapters review the academic scholarship and explore the conditions of effective and legitimate governance in areas of limited statehood as well as its implications for world politics in the twenty first century The authors examine theoretical and methodological approaches as well as historical and spatial dimensions of areas of limited statehood and deal with the various governors as well as their modes of governance They cover a variety of issue areas and explore the implications for the international legal order for normative theory and for policies toward areas of limited statehood

The Aid Effect David Mosse,David Lewis,2005-10-20 Today international development policy is converging around ideas of neoliberal reform democratisation and poverty reduction What does this mean for the local and international dimensions of aid relationships The Aid Effect demonstrates the fruitfulness of an ethnographic approach to aid policy reform and global governance The contributors provide powerful commentary on hidden processes multiple perspectives or regional interests behind official aid policy discourses The book raises important questions concerning the systematic social effects of aid relationships the nature of sovereignty and the state and the working of power inequalities built through the standardisations of a neoliberal framework The contributors take on new challenges to anthropology presented by a global aid architecture which no longer operates through discrete projects but has moved on to sector wide approaches budgetary support and other macro level instruments of development but they remain faithful to the fieldwork methodology that is anthropology's strength and the source of rare insight

Rethinking Gender Equality in Global Governance Lars Engberg-Pedersen,Adam Fejerskov,Signe Marie Cold-Ravnkilde,2019-04-26 A very valuable and much needed book on a central element in the processes of social change the construction and reconstruction of

social norms as they move between global and local levels Naila Kabeer London School of Economics and Political Science UK This book explores how gender equality norms are ever evolving and argues convincingly that we cannot take their effectiveness nor their acceptance for granted Judith Kelley Duke Sanford School of Public Policy USA In an era of increasing resistance to gender equality this is a much needed volume that attends to how gender equality norms are interpreted and contested in governance organisations ranging from the UN and the EU to Mercosur and women s NGOs in India and Uganda Ann Towns University of Gothenburg Sweden This edited collection provides a new theoretical approach to the study of how global norms influence social processes It analyses the institutional and highly political processes whereby actors be they local national regional or trans national engage with global norms of gender equality The editors bring together key thinkers who emphasise how context and history effect norm engagement and how particular groups and actors tend to be marginalised from discussions of global norms By proposing a situated approach that underlines the contingent multi level processes that occur when actors interpret use manipulate bend or betray norms notions of norm diffusion are fundamentally challenged This book makes a further crucial contribution to the study of norms and gender equality in global governance by analysing very different empirical contexts from New Delhi and St Petersburg to the Organisation of American States and from Kampala and New York to the European Union

Local Politics, Global Impacts Olivier Charnoz, Virginie Diaz Pedregal, 2016-05-06 Serving as a touchstone for a much needed research program on social scales this volume challenges disciplinary boundaries and brings into focus a paradoxical state of affairs in contemporary thought the domain of local global interactions has not yet been identified as an object of analysis in its own right despite engaging a large multi disciplinary research community with strong potential for cross fertilization Bringing together internationally renowned as well as emerging scholars this book presents concrete case studies framed by theoretical concern with the issue of scale It demonstrates that a diverse array of theoretical methodological and empirical perspectives can productively converge on a common set of problems related to social temporal and spatial scales and contemporary globalization *Local Politics Global Impacts* will stimulate empirical and theoretical research that focuses on understanding how political concepts practices and instruments translate across scales and contribute to the emergence of a self aware community of scholars and practitioners focusing explicitly on modelling the dynamics of local regional global interactions

The Gloss of Harmony Birgit Müller, 2013-10-09 *The Gloss of Harmony* focuses on agencies of the United Nations examining the paradox of entrusting relatively powerless and underfunded organisations with the responsibility of tackling some of the essential problems of our time The book shows how international organisations shape the world in often

unexpected and unpredictable ways The authors of this collection look not only at the official objectives and unintended consequences of international governance but also at how international organisations involve collective and individual actors in policy making absorb critique attempt to neutralise political conflict and create new political fields with local actors and national governments The Gloss of Harmony identifies the micro social processes and complexities within multilateral organisations which have up to now been largely invisible This book will have wide appeal not only to students and academics in anthropology business studies and sociology but also to all practitioners concerned with international governance

Exploring Civic Innovation for Social and Economic Transformation Kees Biekart, Wendy Harcourt, Peter Knorringa, 2016-05-12 This edited collection examines the globally rising phenomenon of civic innovation Combining nuanced theory with rich empirical examples this book defines the dynamic and complex process of civic innovation as the multiple economic political and social processes where peoples organizations movements and ideas are shaping struggles for global justice on the interface of capitalism Exploring Civic Innovation for Social and Economic Transformation reflects the increasingly holistic approach to development in terms of both teaching and research and illustrates how civic innovation happens everywhere at the global and institutional level as well as in communities and for individuals Through conceptual debate and narrative accounts this book explores the new practices emerging from varying economies transformative empowerment strategies in global value chains local politics of social movements and the struggles for rights in regards to race gender and sexuality Bringing together scholars from a range of disciplines this book would be of interest to post graduate students of development studies with an interest in social research
