Privacy and Disclosure of HIV in Interpersonal Relationships Kathryn Greene, Valerian J. Derlega, Gust A. Yep, Sandra Petronio, 2003-06-20 As the HIV epidemic enters its third decade, it remains one of the most pressing health issues of our time. Many aspects of the disease remain under-researched, and inadequate attention has been given to the implications for the relationships and daily lives of those affected by HIV. Disclosing an HIV diagnosis remains a decision process fraught with difficulty, and despite encouraging medical advances, an HIV diagnosis creates significant anxiety and distress about one's health, self-identity, and close relationships. This book provides an overarching view of existing research on privacy and disclosure, while bringing together two significant areas: self-disclosure as a communication process and the social relational consequences of HIV/AIDS. The unifying framework is communication privacy management, and the focus of this volume is on private, voluntary, relational disclosure, as opposed to forced or public disclosure. Utilizing numerous interviews with HIV patients and their families, the authors examine disclosure in a variety of social contexts, including relationships with intimate partners, families, friends, health workers, and coworkers. Of note are the examinations of predictors of willingness to disclose HIV infection, the message features of disclosure, and the consequences of both disclosure and non-disclosure. This volume, with its personal exercises and sources of additional information, offers an invaluable resource for individuals living with HIV and their significant others, as well as for professionals in the fields of health communication, social and health psychology, family therapy, clinical and counseling psychology, relationship research, infectious disease, and social service. *When AIDS*

The Humanities and the Dynamics of African Culture in the 21st Century John Ayotunde Isola Bewaji,Kenneth W. Harrow,Eunice E. Omonzejie,2017-05-11 That Africa is at a crossroads in an increasingly globalised world is indisputable Equally unassailable is the fact that the humanities as a broad field of intellection research and learning in Africa appears to have been pigeonholed in debates of relevance in the development aspirations of many African nations Historical experiences and contemporary research outputs indicate however that the humanities in its various shades is critical to Africa s capacity to respond effectively to such problems as security corruption political ineptitude poverty superstition and HIV AIDS among many other mounting challenges which confront the people of Africa The vibrancy and resilience of Africa s cultures against these and other odds of globalisation episodes in the course of our history demand the focused attention of academia to exploit their relevance to contemporary issues This collection provides a comprehensive overview of issues in the humanities at the turn of the 21st century which create a veritable platform for the global redefinition and understanding of Africa s rich cultures and traditions Such areas covered include ruminations in metaphysics and psychology pathos and ethos cinematic and literary connections and historical conceptualisations

Recovering Bodies G. Thomas Couser, 1997-11-01 This is a provocative look at writing by and about people with illness or disability in particular HIV AIDS breast cancer deafness and paralysis who challenge the stigmas attached to their conditions by telling their lives in their own ways and on their own terms Discussing memoirs diaries collaborative narratives photo documentaries essays and other forms of life writing G Thomas Couser shows that these books are not primarily records of medical conditions they are a means for individuals to recover their bodies or those of loved ones from marginalization and impersonal medical discourse Responding to the recent growth of illness and disability narratives in the United States such works as Juliet Wittman's *Breast Cancer Journal* John Hockenberry's *Moving Violations* Paul Monette's *Borrowed Time* An AIDS Memoir and Lou Ann Walker's *A Loss for Words* The Story of Deafness in a Family Couser addresses questions of both poetics and politics He examines why and under what circumstances individuals choose to write about illness or disability what role plot plays in such narratives how and whether closure is achieved who assumes the prerogative of narration which conditions are most often represented and which literary conventions lend themselves to representing particular conditions By tracing the development of new subgenres of personal narrative in our time this book explores how explicit consideration of illness and disability has enriched the repertoire of life writing In addition Couser's discussion of medical discourse joins the current debate about whether the biomedical model is entirely conducive to humane care for ill and disabled people With its sympathetic critique of the testimony of those most affected by these conditions *Recovering Bodies* contributes to an understanding of the relations among bodily dysfunction cultural conventions and identity in contemporary America

Colossal Control Failures Jack P. Gibbs, 2015-11-17 This fascinating book analyzes 13 control failures in human history from Robespierre's promotion of the French Revolution to Hoover's efforts to stop the Great Depression to the intelligence failures of 9/11. Assessing the causes of 10 additional historical cases, the author's comparative analysis shows how each leadership failure was caused by an expansion of the range of control attempts, their scope, and/or their diversity. A leader's or other actor's attempts to broaden the range of control targets have been most important in causing great human failures. The analysis is timely during an era when war, global warming, and other vexing problems plague our society. *Theorizing Histories of Rhetoric* Michelle Ballif, 2013-02-25 During the decades of the 1980s and 1990s, historians of rhetoric, composition, and communication vociferously theorized historiographical motivations and methodologies for writing histories in their fields. After this fertile period of rich, contested, and impassioned theorization, scholars busily undertook the composition of numerous historical works complicating master narratives and recovering silenced voices and rhetorical practices. Yet though historians in these fields have gone about the business of writing histories, the discussion of theorization has been quiet. In this welcome volume, fifteen scholars consider once again the theory of historiography, asking difficult questions about the purposes and methodologies of writing histories of rhetoric, broadly defined, and questioning what it means, what it should mean, what it could mean to write histories of rhetoric, composition, and communication. The topics addressed include the privileging of the literary and the textual over material artifacts as prime sources of evidence in the study of classical rhetoric; the use of rhetorical hermeneutics as a methodology for interpreting past practices; the investigation of feminist methodologies that do not fit into the dominant modes of feminist historiographical work; and the examination of archives with a queer eye to better construct nondiscriminatory narratives. Contributors also explore the value of approaching historiography through the lenses of jazz improvisation and complexity theory and the historiographical method of writing the future in ways that refigure our relationships to time and to ourselves. Consistently thoughtful and carefully argued, these essays successfully revive the discussion of historiography in rhetoric, inspiring fresh avenues of exploration in the field. *South African Medical Journal*, 2000 **Deleuzian Critique of Queer Thought** Nir Kedem, 2024-03-05 Holding queer theory to its promise to revolutionise our ways of thinking, Nir Kedem offers a forceful encounter between Deleuze's work and contemporary queer thought to provide both critical and practical means to re-evaluate and rework key concepts and methods, especially sexuality. Kedem provides a new pragmatic approach to working with Deleuze across multiple disciplines, a rigorous demonstration of its critical and creative power, as well as extensive analysis of the relations between Deleuze and queer thought. All of which exemplify that, despite if not owing to the unassuming role of sexuality in his thought, Deleuze proves to be queer thought's true ally. *American Journal of Public Health*, 1995-07 *AIDS in the Twenty-First Century* T.
