20 Years of the International AIDS Society Lars Kallings, Craig McClure, 2008-07

The Politics of Global AIDS Hakan Seckinelgin, 2016-10-05 This timely book looks critically at the policy response to AIDS and its institutionalization over time It raises important questions about who benefits who decides and in whose interests decisions are made Taking the early international response to the epidemic as its starting point and focusing on the work of agencies such as UNAIDS it identifies two logics underpinning strategy to date First the idea of HIV as a global emergency which calls for an extraordinary response Second the claim that medicine offers the best way of dealing with it The book also identified the rise of something more dominant namely Global AIDS or the logic and system that seeks to displace all others Promulgated by UNAIDS and its partner agencies Global AIDS claims to speak the truth on behalf of affected persons and communities everywhere Founded on solidarity claims concerning the international HIV movement and distinctive knowledge practices which determine what needs to be done Alternative views about the nature of the epidemic or the best response are rejected as irrelevant for falling outside the master framing of the epidemic that Global AIDS provides But to what extent is this biomedical and emergency framing of the epidemic sustainable and to what extent does it speak to the sustainability of lives as affected people wish them to be lived Does scientific and biomedical advance provide all the answers or do important social and political issues need to be addressed This book provides an innovative framework with which to think about these and other sustainability challenges for the future

Socialising the Biomedical Turn in HIV Prevention Susan Kippax, Niamh Stephenson, 2016-06-28 This book concerns HIV prevention In it the authors argue that until the world focuses its attention on the social issues carried and revealed by AIDS it is unlikely that HIV transmission will be eradicated or even significantly reduced The book argues that we are currently witnessing the remedicalisation or the continuing biomedicalisation of HIV prevention which began in earnest after the development of successful HIV treatment and that this biomedical trajectory continues with the increasing push to use HIV treatments as prevention undermining what has been in many countries a successful prevention response This wide ranging study argues that HIV prevention involves enabling people and communities to discuss sex sexuality and drug use and informed by these discussion devising

locally effective strategies for promoting safe sexual and drug injection practices The HIV Pandemic Peter Piot,2007-12-14 As we approach the 25th anniversary of the first recognition of HIV AIDS in 1981 this book reflects on the international impact of the disease It has persistently remained a global issue with more than 50 million people worldwide estimated to have been infected since that date This ambitious book written by 165 authors from 30 countries offers a multi country comparative study that examines how the response to the common global threat of HIV is shaped by the history culture institutions and health systems of the individual countries affected Increasingly the shift of health systems has been from prevention only as the main containment strategy to a strategy that includes scaling up HIV treatment and care and prevention services including antiretroviral therapy Thus all parts of the health system must be involved policy makers healthcare professionals and users of the services have been forced to think differently about how services are financed how resources are allocated how systems are structured and organized how services are delivered to patients and how the resulting activity is monitored and evaluated in order to improve the effectiveness efficiency equity and acceptability of the response This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system Most chapters combine a health policy expert with an HIV specialist allowing both a top down health system approach and a bottom up HIV specific perspective There are thematic and analytical sections which provide an overview and some suggestions for solutions to the most serious outstanding issues and chapters which analyse specific country and organisational responses There is no perfect health system but the evidence provided here allows the sharing of knowledge and a opportunity to assess the impact and reactions to an epidemic that must be considered a long term issue **Handbook of Pediatric HIV Care** Steven L.
