Air Mobility The Development Of A Doctrine:

Air Mobility Christop C. Cheng, 1994-04-21 In the immediate post World War II period Army aviation began to evolve from an observatory role to a mobility role Helicopter air mobility began to develop in the Army from 1949 onwards The outbreak of the Korean war assisted and accelerated the acceptance of greater helicopter air mobility within the Army The Eisenhower period was a golden age for Army aviation with rapid and extensive developments in air mobility doctrine and tactics There was also a strong research and development effort to overcome the initial technological lag These developments allowed the formation of the first air mobile division in 1965 to meet the growing demands of the Vietnam war This work gives a new understanding of the process of military innovation Moreover this case study has important general implications for future military policy making *Professional Journal of the United States Army* ,1995-07 Quarterly Review of Military Literature ,1993 Military Review ,1995 **Interservice Rivalry and Airpower in the Vietnam War** Ian Horwood, 2010 Explores the rivalry between the armed services of the U S relating to the employment of tactical airpower during the Vietnam War Not being an American Horwood is able to put a fresh perspective on this complex issue This study focuses on tactical airpower in S Vietnam between 1961 and 1968 Horwood avoids a lengthy discussion of the air war over N Vietnam focusing instead on the combat operations in the South He examines a number of issues which are relevant to the use of airpower in irregular warfare command and control of airpower the use of airpower at the tactical and the operational strategic level of war the role of helicopters and different service understandings of the proper role of airpower in a counterinsurgency **Eyes of Artillery** Edgar F. Raines, 2000 CMH Pub 70 31 Army Historical Series Examines the institutional origins of modern Army Aviation by recounting the experiences of the men who flew observed fire missions or Air Observations Posts AOP in light aircraft for the Field Artillery during World War 2 Identifies the circumstances and debate that gave rise to the AOP program *No Sure Victory* Gregory A. Daddis, 2011-06-01 Conventional wisdom holds that the US Army in Vietnam thrust into an unconventional war where occupying terrain was a meaningless measure of success depended on body counts as its sole measure of military progress In *No Sure Victory* Army officer and historian Gregory Daddis looks far deeper into the Army's techniques for measuring military success and presents a much more complicated and disturbing account of the American misadventure in Indochina Daddis shows how the US Army which confronted an unfamiliar enemy and an even more unfamiliar form of warfare adopted a massive and eventually unmanageable system of measurements and formulas to track the progress of military operations that ranged from pacification efforts to search and destroy missions The Army's monthly Measurement of Progress reports covered innumerable aspects of the fighting in Vietnam force ratios Vietcong North Vietnamese Army incidents tactical air sorties weapons losses security of base areas and roads population control area control and hamlet defenses Concentrating more on data collection and less on data analysis these indiscriminate attempts to gauge success may actually have hindered the army

s ability to evaluate the true outcome of the fight at hand a roadblock that Daddis believes significantly contributed to the many failures that American forces suffered in Vietnam Filled with incisive analysis and rich historical detail No Sure Victory is not only a valuable case study in unconventional warfare but a cautionary tale that offers important perspectives on how to measure performance in current and future armed conflict Given America s ongoing counterinsurgency efforts in Iraq and Afghanistan No Sure Victory provides valuable historical perspective on how to measure and mismeasure military success

The Airmobility Workhorse Slip Case Bill Kourelakos, 2025-09-30 Air Mobility Workhorse recounts the operational history of the Lockheed C 130 Hercules in Royal Australian Air Force RAAF service spanning the A E and H models from 1958 to 2012 leaving the current J model to be covered in the future The C 130 was the catalyst for a transformational shift from Second World War technology to leading edge aircraft systems in RAAF air mobility and the broader Air Force The Hercules has become iconic in Australian culture as the first thing viewers often see of news reports when Australia reaches out to the rest of the world to offer aid in times of disaster The author s intimate knowledge of the aircraft along with his extensive service on them brings an insight that only someone who has flown them in testing times can bring His extensive connections within the Hercules community have brought their stories from the inside to give readers a rare glimpse of service in military aviation It is a detailed and balanced reflection of what the mighty Hercules did for Australia and how it affected those who flew it maintained it supported it flew as passengers or benefited from the missions it conducted This aircraft was truly Australia s Air Mobility Workhorse Two full colour hardback volumes limited edition presented in a slipcase

Airmobility, 1961-1971 John J. Tolson, 1973 **Air Mobility** Robert C. Owen, 2013 Global air mobility is an American invention During the twentieth century other nations developed capabilities to transport supplies and personnel by air to support deployed military forces But only the United States mustered the resources and will to create a global transport force and aerial refueling aircraft capable of moving air and ground combat forces of all types to anywhere in the world and supporting them in continuous combat operations Whether contemplating a bomber campaign or halting another surprise attack American war planners have depended on transport and tanker aircraft

The Air War in Ukraine Dag Henriksen, Justin Bronk, 2024-08-01 This book provides a comprehensive account of the use of airpower in the first year of the Ukraine conflict Airpower has been central to political military and public debates from the outset of the Russo Ukrainian war After having started with whether the US and NATO should attempt to establish a No Fly Zone over Ukraine to protect the civilian population the international discussion soon focused on the underperformance of Russian airpower The fact that the initial contest for air superiority over Ukraine ended in an

uneasy state of mutual denial came as a surprise to Western analysts who suspected Kyiv would fall within a relatively short period of time The surprise and relief that it did not only fueled urgent and ongoing discussions on how NATO nations could support the Ukrainian war effort Regardless of nationality age level of education or ethnicity the near daily footage of Russian missiles bombs and drones hitting residential areas and bombarding infrastructure to deprive an entire population of electricity and water has been emotionally imprinted on generations who have only known peace Why the Russians have used airpower with such brutality and how Ukraine and its allies have defended against this threat is an important topic to understand even outside a specialist military audience The aim of this book therefore is to provide an analysis on why the air war over Ukraine unfolded as it did during the first year of the war This book will be of much interest to students of air power military and strategic studies Russian and eastern European politics and International Relations **LTG James M.**

Gavin: Theory And Influence Major Edward P. Gavin, 2014-08-15 This monograph approached Lieutenant General James M Gavin as a military theorist and explored his influence as the Army transitioned from World War II to the Cold War Gavin s theory of future warfare required an army with capability in atomic and non atomic warfare and he recognized the need for readiness for both limited peripheral wars and general war His theory shaped his vision of the functions organizations and technology required to succeed in future conflicts Gavin organized much of his writing around the concepts of mobility firepower and control that he felt were critical for future warfare His influence shaped development of tactical nuclear weapons missiles air mobility and organizational transformation following World War II and into the Cold War Gavin s theory of future warfare his understanding of the Soviet threat and his concepts of firepower mobility and control informed his model of how the Army should organize for future warfare He envisioned flexible division organizations capable of fighting dispersed over significant depth enabled by superior air and ground mobility to deliver firepower adequate prevail on future battlefields The organization that epitomized Gavin s concepts was the air mobile division that developed from his sky cavalry concept Gavin s advocacy for the air mobility concept and his specific actions to advance personnel and positions to build and refine sky cavalry and air mobility capabilities were key factors in the eventual development and acceptance of the airmobile division While airmobile divisions and sky cavalry would likely have emerged without Gavin his influence clearly advanced the ideas and shaped the form of the organizations **Air Force Journal of Logistics** ,2002 *History of Operations Research in the United States Army, Volume 2: 1961-1973*, 2008 ,2008 *Army Research and Development* ,1962
