**Air Pollution Control** Howard D. Hesketh, 1996-03-14 Since the first edition was printed in 1991 there have only been minor changes in air regulations The opposing trenches used by environmental regulation proponents have deepened as each side increases their database Agencies and environmental groups have backed off a little in issues such as bubble policies and enforcement time tables This has made it extremely difficult for equipment vendors to anticipate industry requirements Overall the current market projections are not very favorable for the new equipment suppliers In contrast the service organizations are seeing increasing need for their help in areas such as dispersion modeling troubleshooting and testing Existing systems are being improved upon to keep them in operation There remains a continuous need for up to date references and training materials to serve these needs and it is for this purpose this revised edition is dedicated

**Air Quality Control** G. Baumbach, 2012-12-06 Air quality and air pollution control are tasks of international concern as for one air pollutants do not refrain from crossing borders and for another industrial plants and motor vehicles which emit air pollutants are in widespread use today In a number of the world's expanding cities smog situations are a frequent occurrence due to the number and emission intensity of air pollution sources Polluted air causes annoyances and can when it occurs in high concentrations in these cities constitute a serious health hazard How important clean air is to life becomes apparent when considering the fact that humans can do without food for up to 40 days without air however only a few minutes The first step towards improving the air quality situation is the awareness that a sound environment is as much to be aspired for as the development of new technologies improving the standard of living Technical progress should be judged especially by how environmentally benign clean and noiseless its products are Of these elements clean air is of special concern to me I hope that this book will awaken more interest in this matter and that it will lead to new impulses Due to the increasing complexity of today's machinery and industrial processes science and technology can no longer do without highly specialized design engineers and operators Environmental processes
